Pricing Life Peter A. Ubel, 2000 A rational look at health care rationing from ethical economic psychological and clinical perspectives Although managed health care is a hot topic too few discussions focus on health care rationing who lives and who dies death versus dollars In this book physician and bioethicist Peter A Ubel argues that physicians health insurance companies managed care organizations and governments need to consider the cost effectiveness of many new health care technologies In particular they need to think about how best to ration health care Ubel believes that standard medical training should provide physicians with the expertise to decide when to withhold health care from patients He discusses the moral questions raised by this position and by health care rationing in general He incorporates ethical arguments about the appropriate role of cost effectiveness analysis in health care rationing empirical research about how the general public wants to ration care and clinical insights based on his practice of general internal medicine Straddling the fields of ethics economics research psychology and clinical medicine he moves the debate forward from whether to ration to how to ration The discussion is enlivened by actual case studies

Measuring Health Ian McDowell, 2006-03-09 Worldwide economic constraints on health care systems have highlighted the importance of evidence based medicine and evidence based health policy The resulting clinical trials and health services research studies require instruments to monitor the outcomes of care and the output of the health system However the over abundance of competing measurement scales can make choosing a measure difficult at best Measuring Health provides in depth reviews of over 100 of the leading health measurement tools and serves as a guide for choosing among them LNow in its third edition this book provides a critical overview of the field of health measurement with a technical introduction and discussion of the history and future directions for the field This latest edition updates the information on each of the measures previously reviewed and includes a complete new chapter on anxiety measurement to accompany the one on depression It has also added new instruments to those previously reviewed in each of the chapters in the book LChapters cover measurements of

physical disability social health psychological well being anxiety depression mental status testing pain general health status and quality of life Each chapter presents a tabular comparison of the quality of the instruments reviewed followed by a detailed description of each method covering its purpose and conceptual basis its reliability and validity and where possible shows a copy of the actual scale To ensure accuracy of the information each review has been approved by the original author of each instrument or by an acknowledged expert
