Creating The Country:

Creating Country Music Richard A. Peterson, 2013-04-26 In *Creating Country Music* Richard Peterson traces the development of country music and its institutionalization from Fiddlin John Carson's pioneering recordings in Atlanta in 1923 to the posthumous success of Hank Williams. Peterson captures the free wheeling entrepreneurial spirit of the era detailing the activities of the key promoters who sculpted the emerging country music scene. More than just a history of the music and its performers, this book is the first to explore what it means to be authentic within popular culture. Peterson restores to the music a sense of fun and diversity and possibility that more naive fans and performers miss. Like Buck Owens, Peterson knows there is no greater adventure or challenge than to act naturally. Ken Emerson, Los Angeles Times Book Review. A triumphal history and theory of the country music industry between 1920 and 1953. Robert Crowley, *International Journal of Comparative Sociology*. One of the most important books ever written about a popular music form. Timothy White, *Billboard Magazine*.

Managing Financial Risks in indebted Developing Countries International Monetary Fund, 1989-06-16 This paper examines the types of market related hedging instruments that could potentially be useful to indebted developing countries as they seek to manage the financial risks created by variability of the prices of external assets and commodities. The paper reviews the variability in interest rates, exchange rates, and prices of primary commodities, and then analyzes the effects of this variability on the domestic and external performance of indebted developing countries. Market related hedging instruments that are accessible to indebted developing countries are also examined.
