Scorched Earth

Emmanuel Kreike, 2022-10-25 A global history of environmental warfare and the case for why it should be a crime The environmental infrastructure that sustains human societies has been a target and instrument of war for centuries resulting in famine and disease displaced populations and the devastation of people's livelihoods and ways of life Scorched Earth traces the history of scorched earth military inundations and armies living off the land from the sixteenth to the twentieth century arguing that the resulting deliberate destruction of the environment environcide constitutes total war and is a crime against humanity and nature In this sweeping global history Emmanuel Kreike shows how religious war in Europe transformed Holland into a desolate swamp where hunger and the black death ruled He describes how Spanish conquistadores exploited the irrigation works and expansive agricultural terraces of the Aztecs and Incas triggering a humanitarian crisis of catastrophic proportions Kreike demonstrates how environmental warfare has continued unabated into the modern era His panoramic narrative takes readers from the Thirty Years War to the wars of France's Sun King and from the Dutch colonial wars in North America and Indonesia to the early twentieth century colonial conquest of southwestern Africa Shedding light

on the premodern origins and the lasting consequences of total war Scorched Earth explains why ecocide and genocide are not separate phenomena and why international law must recognize environmental warfare as a violation of human rights

Deforestation and Reforestation in Namibia Emmanuel Kreike,2009-10-26 Descriptions of the late 1800s landscape in the Ovambo floodplain in north central Namibia closely match the area s late 1900s appearance suggesting that little change occurred between the pre colonial baseline and the postcolonial outcome Yet paradoxically colonial conquest population pressure biological invasions new technology and economic globalization caused both dramatic deforestation and reforestation in less than a century The paradox stems from the fact that the prevailing global environmental models obscure and homogenize the process of environmental change different and contradictory interpretations are dismissed as alternative readings or misreadings of the same process Deforestation and Reforestation however argues that the paradox highlights the need to reframe environmental change as plural processes occurring along multiple trajectories that may be dissynchronized and asymmetrical

Preaching to a Post-Everything World Zack Eswine, 2008-04-01 Zack Eswine starts this unique pastoral resource with a captivating question: Could I now reach who I once was? Challenging the idea that today's preachers must do away with biblical or expository preaching if they are to reach non-Christian people, Eswine offers a way of preaching that embraces biblical exposition in missional terms. Recognizing all of the different cultural situations in which the gospel must be preached, he gives preachers practical advice on preaching in a global context while remaining faithful to the Bible. Pastors, seminarians, and church and ministry leaders who speak in various contexts will welcome this fresh, thoughtful examination of bringing the Word to today's multi-everything, post-everything world.
