Gold and Power in Ancient Costa Rica, Panama, and Colombia Jeffrey Quilter, John W. Hoopes, 2003 The lands between Mesoamerica and the Central Andes are famed for the rich diversity of ancient cultures that inhabited them Throughout this vast region from about AD 700 until the sixteenth century Spanish invasion a rich and varied tradition of goldworking was practiced The amount of gold produced and worn by native inhabitants was so great that Columbus dubbed the last New World shores he sailed as Costa Rica the Rich Coast Despite the long recognized importance of the region in its contribution to Pre Columbian culture very few books are readily available especially in English on these lands of gold *Gold and Power in Ancient Costa Rica Panama and Colombia* now fills that gap with eleven articles by leading scholars in the field Issues of culture change the nature of chiefdom societies long distance trade and transport ideologies of value and the technologies of goldworking are covered in these essays as are the role of metals as expressions and materializations of spiritual political and economic power These topics are accompanied by new information on the role of stone statuary and lapidary work craft and trade specialization and many more topics including a reevaluation of the concept of the Intermediate Area Collectively the volume provides a new perspective on the prehistory of these lands and includes articles by Latin American scholars whose writings have rarely been published in English

Knight, 2013 This book offers an overview of iconographic methods and their application to archaeological analysis It offers a truly interdisciplinary approach that draws equally from art history and anthropology Vernon James Knight Jr begins with a historiographical overview addressing the methodologies and theories that underpin both archaeology and art history He then demonstrates how iconographic methods can be integrated with the scientific methods that are at the core of much archaeological inquiry Focusing on artifacts from the pre Columbian civilizations of North and Meso American sites Knight shows how the use of iconographic analysis yields new insights into these objects and civilizations

Heraldry for the Dead Katina T. Lillios, 2010-01-01 In the late 1800s archaeologists began discovering engraved stone plaques in Neolithic 3500 2500 BC graves in southern Portugal and Spain About the size of one's palm usually made of slate and incised with geometric or more rarely zoomorphic and anthropomorphic designs these plaques have mystified generations of researchers What do their symbols signify How were the plaques produced Were they worn during an individual's lifetime or only made at the time of their death Why indeed were the plaques made at all Employing an eclectic range of theoretical and methodological lenses Katina Lillios surveys all that is currently known about the Iberian engraved stone plaques and

advances her own carefully considered hypotheses about their manufacture and meanings After analyzing data on the plaques workmanship and distribution she builds a convincing case that the majority of the Iberian plaques were genealogical records of the dead that served as durable markers of regional and local group identities Such records she argues would have contributed toward legitimating and perpetuating an ideology of inherited social difference in the Iberian Late Neolithic

Painting the Cosmos Alan Grinnell,2024-12-01 The result of decades of study Alan Grinnell s *Painting the Cosmos* presents the spectacular and underappreciated art of Panama and its revealing iconography Emphasizing brightly painted polychrome designs with complex iconography on myriad ceramic forms the art of Central Panama ca 200 BCE 1500 CE is highly distinctive compared to other pre Columbian cultures The book illustrates more than eight hundreds vessels in full color many of which will be unfamiliar even to pre Columbian specialists and proposes interpretations of the iconography informed by the archaeology history and ethnohistory of the region In these animistic cultures much of the iconography reflected interactions of humans with the natural world The author identifies persistent design themes that reflect the myths and beliefs of these ancient peoples Enriched by current scholarship this beautifully produced volume fills a major gap in the knowledge of and appreciation for the art and cultures of the ancient Americas It serves as both an introduction to this unique and relatively unknown culture and a resource for scholars in pre Columbian history art and culture

Latin American Indian Literatures Journal ,1996 **The Jaguar Within** Rebecca R. Stone,2012-09-21 An important new way of viewing the prehistoric art of the Americas The Jaguar Within demonstrates that understanding a work of art s connection with shamanic trance can lead to an appreciation of it as an extremely creative

solution to the inherent challenge of giving material form to nonmaterial realities and states of being Shamanism the practice of entering a trance state to experience visions of a reality beyond the ordinary and to gain esoteric knowledge has been an important part of life for indigenous societies throughout the Americas from prehistoric times until the present Much has been written about shamanism in both scholarly and popular literature but few authors have linked it to another significant visual realm art In this pioneering study Rebecca R Stone considers how deep familiarity with and profound respect for the extra ordinary visionary experiences of shamanism profoundly affected the artistic output of indigenous cultures in Central and South America before the European invasions of the sixteenth century Using ethnographic accounts of shamanic trance experiences Stone defines a core set of trance vision characteristics including enhanced senses ego dissolution bodily distortions flying spinning and undulating sensations synaesthesia and physical transformation from the human self into animal and other states of being Stone then traces these visionary characteristics in ancient artworks from Costa Rica and Peru She makes a convincing case that these works especially those of the Moche depict shamans in a trance state or else convey the perceptual experience of visions by creating deliberately chaotic and distorted conglomerations of partial inverted and incoherent images

Soils Stones and Symbols Cultural Perceptions of the Mineral World Nicole Boivin, Owic, 2013-07-04 Ethnographic and archaeological records feature a rich body of data suggesting that understandings of the mineral world are in fact both culturally variable and highly diverse *Soils Stones and Symbols* highlights studies from the fields of anthropology archaeology and philosophy that demonstrate that not all individuals and societies view minerals as commodities to be exploited for economic gain or as passive objects of disembodied scientific enquiry In visiting such diverse contexts as contemporary India colonial period Australia and prehistoric Europe and the Americas the papers in this volume demonstrate that in pre industrial societies minerals are often symbolically meaningful ritually powerful and deeply interwoven into not just economic and material but also social cosmological mythical spiritual and philosophical aspects of life In addressing the theme of the mineral world this book is not only unique within the social and geo sciences but also at the forefront of recent attempts to demonstrate the importance of materiality to processes of human cognition and sociality It draws upon theoretical developments relating to meaning experience the body and material culture to demonstrate that studies of rock art landscapes architecture technology and resource use are all linked through

the minerals that constantly surround us and are the focus of our never ending attempts to understand and transform them
