Bearing Witness to Epiphany John Russon,2014-02-07 In this probing sequel to the popular and award winning Human Experience John Russon asks What is it to be a person The answer the key to our humanity lies in our sexuality where we experience the freedom to shape identities creatively in cooperation with another With grace and philosophical rigor Russon shows that an exploration of sexuality not only illuminates the psychological dimensions of our interpersonal lives but also provides the basis for a new approach to ethics and politics Responsibilities toward others he contends develop alongside our personal growth Bearing Witness to Epiphany brings to light the essential relationship between ethical and political bonds and the development of our powers of expression leading to a substantial study of the nature and role of art in human life

The Experimental Psychology of Beauty C.W. Valentine,2015-06-05 Originally published in 1962 the experimental study of aesthetics was a field particularly associated with the name of C W Valentine who in this book provided a critical review of research carried out since the end of the nineteenth century principally by British and American psychologists The investigations described many of them conducted by the author are concerned with individual responses to what is commonly regarded as beautiful in painting music and poetry an important distinction being made between the perception of objects as beautiful as opposed to pleasing The reactions of children and adults and of people having different ethnic and social

backgrounds are explored in a variety of experiments dealing with specific elements including colour form and balance in painting musical intervals discord harmony melody and tempo and rhythm metre imagery and associations in classical and romantic poetry Other experiments seek to disclose the temperamental and attitudinal factors underlying individual differences in the judgement and appreciation of specific works of art Of particular interest are the studies of responses to modern paintings poems and musical compositions The findings throw light on the development of discrimination and taste and suggest the possibility of some common factor in the appreciation of these three arts It was felt that critics as well as psychologists and aestheticians would find much to encourage reflection and to stimulate further research

Young Language Learners' Motivation and Attitudes Sybille Heinzmann, 2013-06-20 Taking three different perspectives this book looks at primary school children's language learning motivation and language attitudes In adopting a longitudinal perspective the book fills a research gap and provides a macro level analysis of motivational development over time It reveals a surprising amount of stability in primary school children's motivational and attitudinal development The comparative perspective looks at the learners affective dispositions with regard to English theorized as a global language and French theorized as a national language The comparisons between global language and national language are relevant across the world especially in situations where instruction in languages other than English struggles to get attention The results reveal sizeable differences between the two languages with children being substantially more motivated to learn English than to learn French Finally the explanatory section identifies key antecedents of the learners motivational and attitudinal dispositions and thereby opens up paths for intervention relevant for those working in the field of language instruction
