How To Become Good Parents

Becoming Good Parents

John Lewis

Becoming Good Parents:

Becoming Good Parents Mufid James Hannush, 2012-02-01 *Becoming Good Parents* goes beyond a psychological understanding of parenting to include a deeper explication of the philosophical moral and existential spiritual dimensions of parenting. It counters the contemporary notion that parents can be satisfied with simply being good enough in their parenting practices which encourages a sense of complacency. Through everyday examples illustrative use of Harper Lee's moral novel *To Kill a Mockingbird* and a reinterpretation of the theoretical viewpoints of psychologists Erik Erikson, Heinz Kohut and Rollo May along with philosophers Iris Murdoch and Michael Gelven, the author argues that the struggle toward perfection/goodness is a natural human impulse. Parenting provides an optimal context for the practice of character refinement which can potentially contribute to the psychological and spiritual growth of both parents and children. Ultimately the book demonstrates that by becoming good parents we become good persons.

Becoming Better Parents Maurice Balson, 1994 *Becoming Better Parents* is designed to help parents understand and respond to their children's behaviour in an encouraging and constructive way. It shows parents how to Encourage their child's sense of positive self-esteem. Communicate openly without blame. Use natural or social consequences instead of punishment to encourage the development of self-discipline in their child. Allow children to make choices and take responsibility in keeping with their age and abilities. Improve negotiation and problem-solving skills. Make decisions as a family. [10 Minutes to Become a Better Parent](#) Ri Rin Shin, 2023-05-04

Becoming a better parent is an ongoing process that requires effort and patience. However, spending just 10 minutes every day focusing on your child can make a big difference. By listening to your child and engaging in an activity with them, you can create positive memories and build a stronger relationship. Showing empathy towards your child's emotions and acknowledging their feelings can also help them develop emotional intelligence and feel more secure in their relationship with you. Finally, practicing positive reinforcement by catching your child doing something good and giving them positive feedback can help build their confidence and encourage positive behavior. By consistently focusing on these simple activities for just 10 minutes a day, you can become a better parent and strengthen your bond with your child. [Who's Fit to be a Parent?](#) Mukti Jain Campion, 2005-06-29 In recent years the notion of parenting and parenthood have increasingly come under examination from the media and professionals and in particular government and politicians. More and more parents are being held to account by society for their failure to deliver the sort of citizens it wants. But what are parents supposed to be doing? Are there some people that are inherently unfit to be parents and does there exist a body of knowledge that defines fit parenting? Who's fit to be a parent covers this highly topical and important subject in a stimulating and accessible way that cuts across numerous professional disciplines and opens up the boundaries between professional and personal expertise on parenting. It is essential reading for any professional or student of social work and social policy, those working in the voluntary services concerned with the family, social policy makers and for anyone interested in understanding what it means

Sandlin, Peter McLaren, 2010-09-28 Distinguished international scholars from a wide range of disciplines explore consumption and its relation to learning identity development and education This volume is unique within the literature of education in its examination of educational sites both formal and informal where learners and teachers are resisting consumerism and enacting a critical pedagogy of consumption

Indirect Parenting Interventions, Neuroscience and the Parent-Child Relationship Thomas W. Roberts, 2024-10-21 This volume explores indirect parenting behavior that changes the structure of the parent child relationship examining the ecological dimension of parenting in addition to nurturance and control Drawing on neuroscientific research in parenting it provides a model for how children learn implicitly and how parents can relate to children through indirect means Roberts argues that first order parenting techniques teaching specific behaviors to reduce unwanted child behaviors are overused He examines and offers guidance on how indirect interventions that place emphasis on the interactional components of the parent child relationship such as modelling storytelling reframing humor and paradox can support parents and children in developing positive relationships Addresses the latest brain research and its application to parent child interactions Introduces the student to aspects of the parent child relationship that are not covered in most courses Useful to clinicians who work directly with parents Offers a perspective on parenting that differs from most parenting models Facilitates awareness of how unconscious and nonverbal communication affects parenting Serves to deepen the relationship with the child and curb unwanted behavior Indirect Parenting Interventions Neuroscience and the Parent Child Relationship will be thought provoking reading for students and scholars of parenting and family systems as well as clinicians who work directly with parents giving them a broader perspective in dealing with parent child interactions

Parenting Anna Marina Mariani, 2008 The book provides a necessary commitment for a stronger preventive attitude to parenting in other words parents could and should educate themselves for parenthood in order to be able to provide their children those guiding maps for personal growth Attributing so much importance to a self formation in motherhood and fatherhood does not reduce the family to a secondary social role in order to avoid pathological issues and intergenerational clashes rather it wants to urge in committing for their children s growth formation without any neurotic search for perfection and educational abstentions Will we be able to support those adults willing to be good parents but not parents acting well The book tries to offer theoretical views choosing to privilege the informality that the family code requires in order that those parents in normal situations and not only those who have problems or difficulties would find guiding lines to appropriately face common and general issues this not according to the strict canons of formal education but to an education among adults that does not enclose the family in material and always private and individual experiences to the detriment of spiritual and more general dimensions Women's Sexual Experience Martha Kirkpatrick, 2012-12-06 This book like its companion volume Women s Sexual Development is a potpourri of ideas not campaign literature to promote a particular point of view

The editor agrees with some of her authors and strongly disagrees with others The facts are few the questions many The intent of both books is to evoke questions delay convictions invite controversy and plead for opening minds The examination and explanation of women's sexual experience has long been the province of men The is and the oughts have been hopelessly confused by the investigators or exhorters biases and limited experience as well as by the use of the male sexual experience as the model for all human sexual experience Women at long last are talking not only to each other in personal journals and letters but also in the more formal worlds of academic and scientific publications The papers in this book come from many sources Some are academic some are experiential journalistic or personal Several emphasize the lack of adequate research and data but address an issue that is just appearing on the surface of contemporary controversy and concern Many topics and sources of information are missing Treatment of Child and Adult Survivors Byrgen P.

Finkelman,2013-08-06 First published in 1995 This is Volume five of a series that looks at the developmental stages in addressing the complex and social problem of child abuse The articles in this volume address the treatment of child victims and adult survivors of childhood sexual physical and emotional abuse and neglect Where physical abuse is concerned treatment of victims and survivors lagged far behind the treatment of sexual abuse victims and survivors This may be due in part to the fact that in cases of physical abuse with its physical manifestations that heal more attention is paid to the immediate physical safety of children than to their short and long term emotional needs Thereafter the focus of treatment tended to be on parents in hopes of preventing further abuse rather than on the abused children *Becoming Parents and Overcoming Obstacles* Emanuela Quagliata,2018-05-01 There are many books that deal with pregnancy and maternity and a large number of magazines and articles on paediatric nursing that examine these subjects from different points of view This volume is not a manual and is not intended to explain to future parents what to do and what to avoid The objective is rather to look at the most significant and problematic aspects of this delicate phase of a woman's life and that of a couple It seeks to offer a key to understand the deep significance and complexity of the path to follow to become parents and to face fears linked to the difficulty of procreation using the tools of observation and psychoanalytic listening Reviewing several experiences of clinical work the authors offer reflections on the personal experiences of women and couples and the difficulties which can be met when the desire for a child is disappointed A maternity and parenting project can be frustrated by miscarriages and encounter the fear of infertility How are the problems of sterility or spontaneous abortion experienced

The Light of the World Antoinette Bourignon,1863 Mother is heaven and Father is way to heaven Nadeem Pasha,2025-02-24 Mother is Heaven and Father is Path of Heaven is a heartwarming and thought provoking book that explores the profound impact of family values and relationships on our lives Through inspiring stories and insightful reflections author Nadeem Pasha shares valuable lessons on the importance of nurturing meaningful connections embracing our true potential and navigating life's challenges with resilience and faith This uplifting book is a testament to the

Developing the Virtues Julia Annas,Darcia Narváez,Nancy E. Snow,2016 Ethicists and psychologists have become increasingly interested in the development of virtue in recent years approaching the topic from the perspectives of virtue ethics and developmental psychology respectively Such interest in virtue development has spread beyond academia as teachers and parents have increasingly striven to cultivate virtue as part of education and child rearing Looking at these parallel trends in the study and practice of virtue development the essays in this volume explore such questions as How can philosophical work on virtue development inform psychological work on it and vice versa How should we understand virtue as a dimension of human personality What is the developmental foundation of virtue What are the evolutionary aspects of virtue and its development How is virtue fostered How is virtue exemplified in behavior and action How is our conception of virtue influenced by context and by developmental and social experiences What are the tensions impediments and prospects for an integrative field of virtue study Rather than centering on each discipline the essays in this volume are organized around themes and engage each other in a broader dialogue The volume begins with an introductory essay from the editors that explains the full range of philosophical and empirical issues that have surrounded the notion of virtue in recent years
