Practical Rules Alan H. Goldman, 2001-09-06 Rules proliferate some are kept with a bureaucratic stringency bordering on the absurd while others are manipulated and ignored in ways that injure our sense of justice Under what conditions should we make exceptions to rules and when should they be followed despite particular circumstances The two dominant models in the literature on rules are the particularist account and that which sees the application of rules as normative Taking a position that falls between these two extremes Alan Goldman provides a systematic framework to clarify when we need to follow rules in our moral legal and prudential decisions and when we ought not to do so The book distinguishes among various types of rules it illuminates concepts such as integrity self interest and self deception and finally it provides an account of ordinary moral reasoning without rules This book will be of great interest to advanced students and professionals working in philosophy law decision theory and the social sciences

On Becoming Responsible Michael S. Pritchard, 1991 Pritchard provides a deliberate and convincing argument for a starting point for the discussion of moral development on in which self regard and empathy provide equally essential groundings for individual morality Drawing essential elements from the work of Reid Strawson Rawls Kohlberg and Gilligan he builds a comprehensive framework for tracing moral development from childhood one that allows human morality to be grounded in both reason and emotion and that recognizes the importance to morality of justice and rights as well as caring and responsibility

The University *Becoming* Søren S. E. Bengtson, Sarah Robinson, Wesley Shumar, 2021-06-23 This volume wholeheartedly engages with the current climate in higher education and provides not only a thorough analysis of the foundational elements constituting higher education but also a critical discussion of possible connections to societal and cultural domains and policy debates Today higher education institutions and programs are beset with multiple and often conflicting pressures and

demands Higher education is regarded by societies in general and at the political level in particular as a pathway to securing continued economic growth and ensuring cultural growth in surrounding societal contexts Future academics are expected to become experts within their disciplines and at the same time to acquire and develop generic competences and transferable skills directly translatable into job market and professional contexts These conflicting and fragmented policy approaches to higher education leaves academic leaders teacher researchers and students with an incoherent curriculum and a confused and eroded academic identity and societal outlook Much literature within higher education research that engages with similar topics are dominated by a backwards looking and heavy critique of current political and educational conditions for the university and higher education This volume suggests a new tack that is defined by openness and optimism towards possibilities for a transformative higher education curriculum that at the same time stays firmly rooted within the foundational academic soil By drawing on and contributing to the emerging research field the philosophy and theory of higher education the book combines critique with a constructive and future oriented approach and outlook on higher education Further it combines and links philosophical discussions on the idea of the future university with societal responsibility and a curricular and formational awareness **A Voice to Enlighten and Empower** Jerome

Jochensen,2011-02-28 Too many students are disappointed They want to make a difference in their chosen professions They are inspired by successful visionaries but they have little idea how to follow in their oversized footsteps Their colleges and universities promise more professional development than they can possibly deliver especially in terms of moral development for the professions Experts coming from a range of perspectives in higher education agree that moral formation for the professions must increasingly take place in higher education Tragically the recent evolution of teaching has stripped educators of much of the rationale for moral formation The recent record of moral lapses by managers testifies to this crisis of moral education The authors call for a revival of moral formation in higher education for the professions They supply the needed resources to redesign classic as well as cutting edge teaching and learning toward practical moral education in the professions This book is carefully designed to apply traditional Christian principles appropriately to evolving professional practices The authors strategies address the problems surrounding calling vocation and the growing need for virtue training in the professions In particular the authors provide clear direction for how to meet the need for professional profiles that

meet the standards of the marketplace Practice and Profile provides the reader with a tested and proven model of faith formation appropriate to the professions It also goes into specific useful detail as to how the model mobilizes learning in classroom and professional settings It aids institutions of higher learning in their struggle with demands for new learning environments and new moral competencies Foremost it gives students a grasp of how to become dedicated professionals who make a difference

Reclaiming Value in International Development Chloe Schwenke, 2008-12-30 International development has complex unintended effects on the realities of equity rights governance and conflict in poor countries Yet the myriad moral questions and quandaries encountered at every turn by development policymakers and practitioners are seldom thought about or articulated in a rigorous fashion Instead development specialists are trained to focus on the technocratic aspects of economic aid delivery and to disregard the moral issues raised by the adverse collateral consequences of aid programs for many people communities institutions and environments in the developing countries Reclaiming Value in International Development is the first book to bridge the divide between ethics and development from the perspective of a seasoned development practitioner who is also a trained ethicist Schwenke formally enlarges the concept of development to include its moral dimension to denote beneficial change that alleviates human misery and environmental degradation in poor countries and reinforces universal ethical norms such as human dignity essential freedoms social justice peace civic virtue human flourishing the common good gender equality safety and security and participation and inclusion She applies this ethically expanded concept to nine key topics in international development education leadership procurement food security conflict urbanization gender identity and sexual orientation deliberative participation and the measurement of ethical performance Throughout the book the author draws on her thirty years of experience as a development practitioner in thirty poor countries around the world to give vivid real life illustrations of the classic moral dilemmas in development ethics and to show how moral reasoning can clarify and resolve them

The Nature of Suffering and the Goals of Medicine Eric J. Cassell Clinical Professor of Public Health Cornell University Medical College, 1991-10-03

The Nature of Suffering underscores the change that is taking place in medicine from a basic concern with disease to a greater focus on the sick person Cassell centers his discussion on the problem of suffering because he says its recognition and relief are a test of the adequacy of any system of medicine He describes what suffering is and its relationship to the sick person bodies do not suffer people do An exclusive concern with scientific knowledge of the body and disease therefore impedes an understanding of suffering and diminishes the care of the suffering patient The growing criticism that medicine is not sufficiently humanistic does not go deep enough to provide a basis for a new understanding of medicine New concepts in medicine must have their basis in its history and in the development of ideas about disease and treatment Cassell uses many stories about patients to demonstrate that despite the current dominance of science and technology there can be no diagnosis search for the cause of the patient's disease prognostication or treatment without consideration of the individual

sick person Recent trends in medicine and society Cassell believes show that it is time for the sick person to be not merely an important concern for physicians but the central focus of medicine He addresses the exciting problems involved in such a shift In this new medicine doctors would have to know the person as well as they know the disease What are persons however and how are doctors to comprehend them The kinds of knowledge involved are varied including values and aesthetics as well as science In the process of knowing the experience of patient and doctor move to center stage He believes that the exploration of the person will engage medicine in the 21st century just as understanding the body has occupied the last hundred years

Gender and Multiculturalism Amanda Gouws, Daiva Stasiulis, 2015-12-22 Multiculturalism is a concept that has been stretched to include a variety of political conditions mainly in countries that have liberal democratic political systems and traditions In this North South comparison we illuminate remedies pursued by governments and various political interests to address the binary Tensions of culture and rights may not be the same everywhere An interesting point of comparison is in the treatment of liberalism often assumed in the global North to be the universal norms to be defended whereas in the global South liberalism itself may be viewed as the problem Colonial histories are fraught with discriminatory legislation aimed at accommodating indigenous populations often a trade off for more structural redistributive justice through for example land reform In Africa for example the codification of customary law has reinforced misogynistic and static interpretations of African culture This book will show how varied and complex the embodiment of multiculturalism as a political practice or policy discourse in different political contexts can be and how often the outcome of multicultural discourses creates a binary between culture and universal human rights The aim of this book is to grapple with dislodging this binary This book was published as a special issue of *Politikon*

The Moral Status of Persons, 2021-11-08 The advances in molecular biology and genetics medicine and neurosciences in ethology and environmental studies have put the concept of the person firmly on the philosophical agenda Whereas earlier times seemed to have a clear understanding about the moral implications of personhood and its boundaries today there is little consensus on such matters Whether a patient in the last stages of Alzheimer's disease is still a person or whether a human embryo is already a person are highly contentious issues This book tackles the issue of personhood and its moral implications head on The thirteen essays are representative of the major strands in the current bioethical debate and offer new insights into humanity's moral standing its foundations and its implications for social interaction While most of the essays approach the issue by drawing on the rich intellectual tradition of the West others offer a cross cultural perspective and make available for ethical consideration the philosophical resources and the wisdom of the East The contributors to this book are highly recognized philosophers ethicists theologians and professionals in health care and medicine from East Asia China Japan Europe and North America The first part of the book

probes the foundations of personhood Examining critically the main theories on personhood in contemporary philosophy the authors offer alternatives that better respond to contemporary challenges and their implications for bioethics The focus of the second part is firmly on the Confucian relational concept of the person and on the social constitution of personhood in traditional Japanese culture While the essays challenge the individualistic features of personhood in the Western tradition they lay the foundations for a richer concept that holds great promise for the resolution of moral dilemmas in modern medicine and health care The third part of the book enters into a dialogue with the Christian tradition and draws on its spiritual heritage in the search for answers to the contemporary challenges to human dignity and value Its focus is on the Catholic social thought and Lutheran theology The fourth part addresses the moral status of persons in view of specific issues such as the effects of brain injury gene therapy and human cloning on personhood It extends the scope of research beyond human beings and inquires also into the moral status of animals

Acorn to an Oak Harry Davis, 2014-09-22

1 Corinthians 10 1 13 Having escaped the bondage of sin and set free for the promised land we are traveling to the river of death and pass over into a way that we have never traveled before God is leading the way with the assurance of victory based upon obedience The failure of the Church to fight the enemy and allow corruption to exist has kept the Church from possessing all that God has allotted to it Just like Israel the Church is surrounded by a host of enemies that is seeking to destroy it Compromise has caused defeat by deception but God will not let that happen to the Church or Israel We as well as Israel shall be victorious We are to stand fast in the liberty with which Christ has set us free and not be entangled with the world This book addresses these victories and failures and ours as well so that the lessons learned can be applied to insure further victories

The Jewish Teachers of Jesus, James, and Jude David A.

deSilva, 2012-10-11 Jews have sometimes been reluctant to claim Jesus as one of their own Christians have often been reluctant to acknowledge the degree to which Jesus message and mission were at home amidst and shaped by the Judaism s

of the Second Temple Period In The Jewish Teachers of Jesus James and Jude David deSilva introduces readers to the ancient Jewish writings known as the Apocrypha and Pseudepigrapha and examines their formative impact on the teachings and mission of Jesus and his half brothers James and Jude Knowledge of this literature deSilva argues helps to bridge the perceived gap between Jesus and Judaism when Judaism is understood only in terms of the Hebrew Bible or Old Testament and not as a living growing body of faith and practice Where our understanding of early Judaism is limited to the religion reflected in the Hebrew Bible Jesus will appear more as an outsider speaking against Judaism and introducing more that is novel Where our understanding of early Judaism is also informed by the Apocrypha and Pseudepigrapha Jesus and his half brothers appear more fully at home within Judaism and giving us a more precise understanding of what is essential as well as distinctive in their proclamation This comparative study engages several critical issues How can we recover the voices of Jesus James and Jude from the material purporting to preserve their speech How can we assess a particular text s influence on Jews in early first century Palestine How can we be sufficiently sensitive to the meanings and nuances in both the text presumed to influence and the text presumed to be influenced so as not to distort the meaning of either The result is a portrait of Jesus that is fully at home in Roman Judea and Galilee and perhaps an explanation for why these extra biblical Jewish texts continued to be preserved in Christian circles

What Do You Believe? Michelle Brignone, 2025-03-18 Almost 80 percent of Americans say they believe in God with most religions teaching peace love and understanding yet crime lies hate racism misogyny discrimination and violence all seem to be reaching pandemic proportions Maybe we don't believe what we think we do There is a disconnect between our actions and what we say we believe and it's tearing us apart Society cannot afford for this disconnect to continue Either we don't know what we truly believe or we just don't care anymore I am an optimist and hoping the answer is people don't really know or don't remember what their true beliefs are What Do You Believe does not tell people what to believe it merely asks questions to encourage readers to figure out for themselves what exactly they believe and why they believe it It then asks readers to consider how their beliefs influence or not their actions to help readers bring their actions and beliefs into harmony

Hidden Powers of Positive Thinking Julio Toro, 2006-10-12 This book enters areas of my life and moments that have offered me the wonderful gift of understanding We all believe to understand and know but in reality as the years pass we realize that sometimes we did not but we quickly learned There are angered spats there are cheers there are so many different emotions and feelings in us that we do not always tap into and some we tap into too much This book is not only a collection of thoughts and reflections relevant to positive thinking but more so a rerouting of energy quite often created by negative interjections in my life I have met so many people that have often made me wonder why still a belief in them and why the yearning to help those individuals even if with just words and it sort of struck me with clarity How can people be positive and well natured when some have not learned the methods Ergo comes the initialization of this compilation I will not say that I will touch everyone in America nor will I say that my methods are the best or the only but instead I will classify it functional That is really all we need a functional method of achieving a mental attitude that gives us motivation understanding drive and total belief in what we are doing or plan to do In my eyes and I have seen a great deal there lie views of despair desolation depression anger distrust to name a few that totally eat people up inside and this is not a good thing Individuals tend to keep things bottled up inside for they have no method for release no one to listen no one to really care This in turn converts into introverted people with internal problems which surface as external displays of anger Anger is a scary thing when you keep it all bottled up inside It becomes somewhat like held pressured contents inside you that basically turns you into a ticking time bomb Release of this pressure is completely necessary and must be considered a very serious matter When we bottle things up inside and look the other way of solutions we cause ourselves harm and within the pages of this book I strongly attempt to help decipher when this harm is brewing and how we should attempt to deal with it properly for the sake of mental stability The samples written are real the experiences expressed are real the sincerity with which I offer my resolve is and always will be totally real I bring the point of view of someone who has been through it not someone offering strictly the views of others experiences The pages are raw and to the point yet subtle enough to entice your reading and provide a good clean experience driven account of positive

living through positive thinking There may be some points to agree with and some to not agree with after all this is all based on one man's thought process not necessarily a global following but the lessons are good and the visuals are helpful I simply want people to understand that sometimes we carry the answers to our minor and some major problems and we just need to know where to look Inside ourselves we carry so much and within our minds we potentially harness such power yet we encase it all in a shell of doubt or a cover of question Why What we should be doing is exploring within ourselves and making what works for us priority instead of secondary thoughts to those implanted in our heads by way of negative influences or downplaying environments In order to take hold of our situations we need to take hold of ourselves our thoughts our beliefs our goals and make it all one big effort not for mom not for dad not for uncle Rob but for us You shine your brightest when you feel your finest Feeling positive about yourself and what you do can give you just that That in a summation is my primary goal with this writing to inspire people to just feel positive with themselves and what they do how they do it Granted although we won't be in a completely p
