Taxonomy of the birds of the world fotolulu, 2018-10-30 How do you come up with the idea to list all the birds in the world including the subspecies and to give all birds English names There is a reason for it my favorite saying whose author is unknown Everyone said that's not possible then there was one who did not know that and just did it I am an animal photographer and probably a little bit crazy I've built a complete animal database for mammals and birds over the last decade This facilitates my work in determining and archiving images and assigning keywords especially among the many subspecies With this book I would like to give all birding friends and ornithologists a complete overview in English For this I have given unique English names to all subspecies The naming should not meet any scientific requirements The names are based on translations from the Latin name geographical distribution areas and the names of the discoverers The entries consist of the scientific name the English name the distribution areas and the author I wish you a lot of fun with this book but

especially while watching the fascinating birdlife of the islands.

Birds of Paradise and Bowerbirds Phil Gregory, 2020-01-09 This authoritative handbook, part of the Helm Identification Guide series, looks in detail at the remarkable and diverse birds of paradise, perhaps the ultimate birders' birds. Renowned for their elaborate and dazzling plumages, the birds of paradise (Paradisaeidae) and bowerbirds (Ptilonorhynchidae) exhibit some of the most astonishing behaviours in the avian kingdom. The former is the most iconic group of birds found in New Guinea, while the bowerbirds extend into Australia and are perhaps best known for the males' construction of avenue bowers used to tempt females on the forest floor. This comprehensive monograph is dedicated to these two families, combining the product of more than two decades of research and scholarship with original observations by the author and many other knowledgeable contributors. *Birds of Paradise and Bowerbirds* is the ultimate reference to these two groups. It provides a thorough guide to their identification, taxonomy, and ecology, with detailed distribution maps accompanying the text. A series of beautifully illustrated plates by Richard Allen cover all of the 108 recognised taxa in these groups, with these supplemented by more than 200 photographs covering a range of racial and age-related plumage variety. This book is an indispensable addition to the libraries of all birders and ornithologists interested in these sensational birds.
