Language, Gender, and Citizenship in American Literature, 1789-1919 , Keats and Philosophy Shahidha Bari, 2012-09-10 John Keats remains one of the most familiar and beloved of English poets but has received surprisingly little critical attention in recent years This study is a fresh contribution to Keats criticism and Romantic scholarship positioning Keats as a figure of philosophical interest who warrants renewed attention Exploring Keats's own Romantic accounts of feeling and thinking this study draws a connection between poetry and the phenomenological branches of modern philosophy The study takes Keats's poetic evocation of touching hands wandering feet beating hearts and breathing bodies as a descriptive elaboration of consciousness and a phenomenological account of experience The philosophical terms of analysis adopted here challenge the orthodoxies of Keats scholarship traditionally characterised by the careful historicisation of a limited canon The philosophical framework of analysis enhances the readings put forward while Keats's poems in turn serve to give fuller expression of those ideas themselves Using Keats as a particular case this book also demonstrates the ways in which theory and philosophy supplement literary scholarship The Political Representation of Immigrants and Minorities

Karen Bird, Thomas Saalfeld, Andreas M. Wüst, 2010-10-06 This book breaks new ground in the analysis of the political representation of immigrants and visible minorities in European and North American democracies focussing on voting candidate selection political parties and legislative behaviour Jacob Mincer Shoshana Grossbard, 2006-06-26 BY SHOSHANA GROSSBARD In 2004 the Society of Labor Economists announced its first Award for Lifetime Achievement in Labor Economics Jacob Mincer and Gary Becker were the recipients The award was then renamed the Jacob Mincer Award Two years earlier Mincer was the first to win the IZA Award in Labor Economics These awards recognize Mincer's primary role in shaping labor economics but they only hint at the breadth of his reputation and accomplishments he is a member of

the National Academy of Sciences and has been appointed a Fellow of the American Statistical Association and the Econometric Society as well as a distinguished Fellow of the American Economic Association. Mincer is one of the principal architects of Modern Labor Economics (MLE), a premier application of micro economics in the spirit of Chicago's positive economics. There are typically three steps to such application: 1) a theoretical model is developed or borrowed leading to testable implications; 2) empirical work is performed; and 3) the findings are analyzed in light of the theoretical analysis. All of Mincer's work has followed those steps, even when this was a rare occurrence. When he started in the mid 1950s, labor economics was a subfield of institutional economics. Labor economics is now a major field of economics. As a result of his work and that of other pioneers, MLE became an example for other applications of economic models.
