Birth Of The Modern:

The Birth Of The Modern Paul Johnson, 2013-10-31 A classic study of fifteen crucial years in the formation of the modern world The Birth of the Modern has established itself as a new kind of historical work an examination of the way the matrix of the modern world was formed Paul Johnson one of today's most popular historians takes fifteen critical years and subjects them to a fascinatingly detailed analysis their geopolitics and politics their cultural and intellectual life their technology and science He investigates every area of life in every corner of the world And he makes of this huge variety of elements a coherent narrative told through the lives and actual words of the age's people outstanding and ordinary so that the reader feels he was there

Realism and the Birth of the Modern United States Stanley Corkin, 1996 This book offers an interdisciplinary view of American culture in the late nineteenth and early twentieth centuries Using the conventions of historical study Stanley Corkin draws out the ways in which the works of writers and filmmakers from 1885 to 1925 shaped and were shaped by the business politics and social life of the period Corkin traces the entrance of the United States into the modern age by considering the historical dimension of cinema and literary aesthetics first of realism then naturalism and finally modernism He begins with the work of writer William Dean Howells and the advent of American cinema under the stewardship of Thomas Edison arguing that realism was complexly involved in Progressive political and economic reform Next analyses of Theodore Dreiser's novel *Sister Carrie* and the films of the Edison Company's star director Edwin S Porter detail the relationships of naturalism to the increasingly abstract presentation of the material commodity through mass marketing The study culminates with an examination of the parallels between Ernest Hemingway's *In Our Time* and the D W Griffith film *The Birth of a Nation* These two modernist works Corkin contends illustrate strategies of expression that attempt to move the material commodity away from its economic base and into a pristine apolitical realm These literary and cinematic works both reflect and participate in the economic political and social reorganization of American life from the top down The result Corkin concludes is a world in which a conception of a human being is asserted as differing little from that of a machine a tree or an animal

The Birth of the Modern NBA Josh Elias, 2024-06-28 On August 3 1949 the National Basketball Association was born comprising 17 organizations that ranged geographically from Boston to Denver and culturally from Manhattan to Sheboygan The league being the result of a merger there were two different reigning champions vying for NBA supremacy between the George Mikan led Minneapolis Lakers and the small town Anderson Packers with teams from Syracuse Rochester New York Chicago and Indianapolis all hoping to upset the apple cart enough to take both teams down This history of the BAA NBL merger that created the NBA demonstrates that amid icy executive relations that reflected the league's larger cultural clash between bustling East Coast metropolises and quiet Midwestern towns the relentless march toward integration sneaking up quicker than expected on the segregated league and the Second World War still distinctly visible in the rearview mirror and America's involvement in Korea closer than it may have appeared

it was what lay just beyond basketball that mattered From Tony Lavelli s halftime accordion Lee Knorek s airport escapades and Chicago Stags owner John Sbarbaro s Capone era mob ties to tales of antisemitism systemic racism and prisoners of war with cameos from Jackie Robinson Chuck Connors and President Gerald Ford the book brings back to life in its totality the NBA as it was nearly 75 years ago in the year of the merger

The Birth of the Modern Mind Paul Oppenheimer,1989 This book suggests that the origins of the thought and literature which is termed modern can be traced to the 13th century Italian invention of the sonnet the first literary form since classical times meant not for performance but for silent reading and introspection
