**The Imminent Collapse of America and of the Whole Western Civilization** Angelo Bertolo,2012-09-25 In the 5000 years of the history that we know great empires grew and fell according to certain patterns that repeat themselves like laws of nature The USA rose and grew to prominence in the world reached its zenith in 1945 with the military victory and with the atom bomb but is not destined to stay there forever The book tries to draw the attention to the signs of decadence that match the patterns of the decadence of previous empires in history and the patterns of growth of progress in other cultural milieus very few pundits in America and in the western media in general seem to be aware of this fact The birth rates keep diminishing in America and are very low in Europe In other civilisations the birth rates have been high and those countries count more in the world today politically and economically than a few generations ago In addition the irrational and passionate attitude of those peoples including the aggressive suicidal attitude with religious and political connotations is a sign of progress for them Those people who are in favour of family planning programs and of a more relaxed morality are acting against the general interests of their countries      *The birth of Western civilization: Greece and Rome; texts by G. The Intellectual Journey of Humanity to Adulthood](#) Hippokratis Kiaris,2022 Civilizations can be perceived as living human beings that are born mature age and ultimately die and disappear passing their legacy to the future generations These transitions may be projected to the different stages of cognitive development of children The Western Civilization which embodies our current state of cultural advancement from the Classic Greek to the modern period can be paralleled by the gradual transitions of human beings toward adulthood From this perspective the ancient Greek era resembles the toddler years of humanity at which the first why type questions are being asked The theocratic period that followed until the Renaissance can be seen as our childhood when people lived their lives under the tight boundaries set by religious authorities The period spanning from the Enlightenment until almost the end of the 20th century can be considered as our teenage years when people rediscover their past are liberated from superstition and set the path forward based on reason by a manner at which the distinction between plausible and feasible is vague Within this scheme postmodernism also finds its place in our teenhood The last few decades from this perspective signify our entrance to adulthood at which major questions are considered answered or at least settled and the only path forward perceived as feasible is the one that is followed already a state that is bringing us closer to our intellectual aging and its inevitable death Some signs of aging related pathologies are already manifested in today s technology intensive society By identifying our intellectual age and by appreciating our health status we may be able to proactively delay or even avert our intellectual aging and death [Western Civilization](#) Paul R.
