these tools to joyfully birth our beautiful baby girl Christa Rose therapist This is a beautiful and intuitive book exploring the spiritual approach to birth preparation Connection with your baby is the primary focus of this gentle programme by Ishtara Blue encouraging each mother to envision and create her ideal birth using visualisation and empowerment techniques drawing wisdom from a variety of traditional and New Age sources Claire Arnold doula *One Family's Journey Through Ten Centuries* William Lilly, 2024-01-05 We trace one family generation by generation throughout the one thousand years of the second millennium The trilogy sets the family within its social environment describing its migration from the continent and across England Scotland and Ireland to settle in the New World From that we get a vivid picture of what affected motivated worried and encouraged this Saxon family and how they coped Since the migration of this family was typical for the time this study is relevant to millions of people in the United Kingdom Canada and the United States whose ancestors followed the same general migratory path Book I specifically covers the feudal period in the Middle Ages 1000 1560 where a feudal autocrat and an avaricious pope between them owned and controlled everything Throughout the family became our witnesses to many of the historic events of the feudal period the Battle of Hastings Anglo Saxon resistance the plague the Little Ice Age the Great Starvation Guilds the building of great cathedrals and castles and the gradual decline in the king's power and control In 1067 William the Conqueror appointed Honfroi de Insula de Llle as the Dominus of the area around the feudal village of Combe Wiltshire He permitted Honfroi to live and build a motte and bailey castle there to assist in keeping the peace The front image is Castle Combe as it appears today Normal Childbirth Susan Downe, 2008-05-30 This new edition builds on the strengths of the popular first edition with updated national and international data and the most recent debate around the controversial area of childbirth With the increasing risk of litigation there can be a tendency to classify women as at risk if they present with even a hint of a problem This is a contentious area and midwives need to be aware of the wide parameters of normal in order to practise autonomously effectively and safely This book provides an evidence based source for all midwives and other health professionals with an interest normal birth Explores the wider range of normal childbirth that is unique to individual mothers and babies Challenges the assumptions underpinning current beliefs and attitudes Updated statistics both national and international Latest research and debate *Motherhood in Literature and Culture* Gill Rye, Victoria Browne, Adalgisa Giorgio, Emily Jeremiah, Abigail Lee Six, 2017-06-26 Motherhood remains a complex and contested issue in feminist research as well as public discussion This interdisciplinary volume explores cultural representations of motherhood in various contemporary European contexts including France Italy Germany Portugal Spain and the UK and it considers how such representations affect the ways in which different individuals and groups negotiate motherhood as both institution and lived experience It has a particular focus on literature but it also includes essays that examine representations of motherhood in philosophy art social policy and film The book's driving contention is that through intersecting with other fields and disciplines literature and the study of literature have an important role to play in nuancing

dialogues around motherhood by offering challenging insights and imaginative responses to complex problems and experiences This is demonstrated throughout the volume which covers a range of topics including discursive and visual depictions of pregnancy and birth the impact of new reproductive technologies on changing family configurations the relationship between mothering and citizenship the shaping of policy imperatives regarding mothering and disability and the difficult realities of miscarriage child death violence and infanticide The collection expands and complicates hegemonic notions of motherhood as the authors map and analyse shifting conceptions of maternal subjectivity and embodiment explore some of the constraining and or enabling contexts in which mothering takes place and ask searching questions about what it means to be a mother in Europe today It will be of interest not only to those working in gender women s and feminist studies but also to scholars in literary and cultural studies and those researching in sociology criminology politics psychology medical ethics midwifery and related fields
