*Management and Development of Agricultural and Natural Resources in Egypt's Desert* Ahmed A. Elkhoully, Abdelazim  
Negm, 2021-05-31 This book reviews the economic potential of various natural resources found in the Egyptian deserts that  
could help fill the food gap in Egypt e.g. the date palm, olives and domestic animals. Bearing in mind that the entire country is  
subject to arid or hyperarid climatic conditions, only a small portion (3% of total area) is agriculturally productive. In  
comparison, the dominant deserts. These aspects combined with a growing population (ca. 100 million citizens) and water  
resources scarcity have produced severe adverse effects on natural resource utilization. This book presents innovative  
methods for addressing desert soil's key problems: soil erosion, salinity, pollution, decreased fertility, minerals, and weed and  
pest control. Its goal is to help authorities reclaim the desert and optimally utilize the minerals and the available natural  
resources to support the sustainability agenda 2030. Besides, it offers researchers guidance on remaining gaps and future  
research directions. Lastly and importantly, it provides essential information on investment opportunities in desert cultivation  
such as the fields of food, fodder, and medicinal plants. **Sailing Directions for the Red Sea and Gulf of Aden** United
