Biz Jets Almarin Phillips,A. Paul Phillips,Thomas R. Phillips,2012-12-06 Biz Jets Technology and Market Structure in the Corporate Jet Aircraft Industry traces the development of business jet aircraft from the mid 1950s through early 1993 It begins with a discussion of the technological and market opportunities existing in the period prior to the introduction of the Lockheed JetStar and the North American Sabreliner The subsequent appearances of other biz jets the Learjets HS 125s Jet Commanders Falcons Gulfstreams Citations Challengers Mitsubishis and derivative aircraft are treated in considerable detail Biz Jets also covers planes involved in many unsuccessful attempts to enter the industry from 1955 through 1993 The study shows that while the industry has been quite concentrated throughout its history the positions of the leading firms have always been contestable Indeed leaders at one point in time have often been displaced by others who succeeded in marshalling technological and market opportunities to their advantage Manufacturers have had to undertake continuous efforts to improve the price performance characteristics of their aircraft to gain and hold their market shares Rivalries in the effective use of the stream of new technologies have brought forth new aircraft with both better performance and lower operating costs At the same time however participation in the market has been extremely risky Only a few companies have been able to earn profits Entries exits and mergers have altered the structure of the industry but it remained decidedly unstable at least through 1992 *The Quantum Economy* Fabrizio Poli,2023-03-31 In a world where technology is driving rapid change and connecting us like never before one thing has remained stagnant air travel Since the retirement of the Concorde in 2003 supersonic civilian flights have become a thing of the past Entrepreneurs and aspiring business leaders must turn to private jet travel to stay ahead of the competition This book explores the opportunities available to those who act fast using real life stories of successful entrepreneurs who have leveraged the speed and convenience of private jets to build their businesses and stay ahead in the quantum economy Discover how you too can use private jets to connect compete and succeed in today s fast paced business world

this subject Master Thesis With the impressive maximum range of nearly 13 000 km the G650 can connect Dubai with New York or London with Buenos Aires within almost 14 hours Maximum Range Normal Cruise Speed 7 000 nm 12 964 km Normal Cruise Speed Mach 0 85 904 km h Mmo Maximum Operating Mach Number Mach 0 925 Maximum Cruise Altitude 51 000 ft 15 545 m Maximum Takeoff Weight MTOW 99 600 lb 45 178 kg Maximum Fuel Weight 44 200 lb 20 049 kg Passengers 11 18 Price appr 60 70 million USD Gulfstream business rival Bombardier Aerospace also announced in October 2010 two new high end models the Global 7000 and 8000 with a maximum range of 7 300 nm 13 520 km and 7 900 nm 14 631 km at cruise speed Mach 0 85 Entry Into Service is scheduled for 2016 Global 7000 and 2017 Global 8000 A comprehensive overview of business jets in service and in development is given in attachment 13 1 A Supersonic Business Jet flying at Mach 2 cruise speed could virtually halve the travelling time which would enormously enhance the mobility and flexibility In order to achieve this ambition a paradigm shift is required New technologies must be established the impact on the environment must be understood and minimised existing regulations must be changed to permit overland flight restrictions and the product still needs to be economically viable All of the above aspects must be considered and will be subject for discussion within this Master Thesis See also figure
