Black Death Natural And Human Disaster In Medieval Europe:

Black Death Robert S. Gottfried, 2010-05-11 A fascinating work of detective history The Black Death traces the causes and far reaching consequences of this infamous outbreak of plague that spread across the continent of Europe from 1347 to 1351 Drawing on sources as diverse as monastic manuscripts and dendrochronological studies which measure growth rings in trees historian Robert S Gottfried demonstrates how a bacillus transmitted by rat fleas brought on an ecological reign of terror killing one European in three wiping out entire villages and towns and rocking the foundation of medieval society and civilization *The Black Death* Robert S. Gottfried, 1986 *The Black Death* Emily Mahoney, Don Nardo, 2016-12-15 The Bubonic Plague terrorized Europe and North Africa in the 14th century killing millions of people Readers learn many fascinating facts about what became known as the Black Death They discover that the cause of the disease was unknown for most of the epidemic and many unlikely things were blamed including bad smells and occult rituals Detailed sidebars and a comprehensive timeline augment the compelling text as it examines how the disastrous events of the plague were exacerbated by people's ignorance of scientific facts *Plague and the Poor in Renaissance Florence* Ann G. Carmichael, 2014-05-08 Originally published in 1986 this book uses Florentine death registers to show the changing character of plague from the first outbreak of the Black Death in 1348 to the mid fifteenth century Through an innovative study of this evidence Professor Carmichael develops two related strands of analysis First she discusses the extent to which true plague epidemics may have occurred by considering what other infectious diseases contributed significantly to outbreaks of pestilence She finds that there were many differences between the fourteenth and fifteenth century epidemics She then shows how the differences in the plague reshaped the attitudes of Italian city dwellers toward plague in the fifteenth century This book will be of value to anyone with an interest in the history of the plague Renaissance Italy and the history of medicine *The Black Death* Therese Harasymiw, 2021-07-15 As the COVID 19 pandemic has swept around the globe people have looked to the past for other examples of deadly disease outbreaks In the mid 14th century an outbreak of bubonic plague or the Black Death killed more than 25 million Europeans within a five year span Through informative maps critical thinking questions and in depth sidebars readers learn the similarities and the vast differences between the Black Death the 2020 pandemic and other disease outbreaks in history Understanding past pandemics enables readers to keep a level head when evaluating current and future outbreaks reducing panic and leading to positive effective solutions **The Black Death** Stephanie True Peters, 2005 Describes the 1347 1351 outbreak of plague in Europe known as the Black Death which killed one out of three people and changed the course of European history *The Black Death, Updated Edition* Louise Slavicek, 2021-04-01 In 1347 Europe was hit by the worst natural disaster in its recorded history the Black Death Now believed to be a combination of bubonic plague and two other rarer plague strains the Black Death ravaged the continent for several terrible years before finally fading away in 1352 Most historians believe that the pandemic which also swept across

parts of Western Asia and North Africa annihilated 33 to 60 percent of Europe's population roughly 25 to 45 million men women and children This massive depopulation had a deep impact on the course of European history speeding up or initiating important social economic religious and cultural changes

Plagues and the Paradox of Progress Thomas J. Bollyky, 2018-10-09 Why the news about the global decline of infectious diseases is not all good Plagues and parasites have played a central role in world affairs shaping the evolution of the modern state the growth of cities and the disparate fortunes of national economies This book tells that story but it is not about the resurgence of pestilence It is the story of its decline For the first time in recorded history virus bacteria and other infectious diseases are not the leading cause of death or disability in any region of the world People are living longer and fewer mothers are giving birth to many children in the hopes that some might survive And yet the news is not all good Recent reductions in infectious disease have not been accompanied by the same improvements in income job opportunities and governance that occurred with these changes in wealthier countries decades ago There have also been unintended consequences In this book Thomas Bollyky explores the paradox in our fight against infectious disease the world is getting healthier in ways that should make us worry Bollyky interweaves a grand historical narrative about the rise and fall of plagues in human societies with contemporary case studies of the consequences Bollyky visits Dhaka one of the most densely populated places on the planet to show how low cost health tools helped enable the phenomenon of poor world megacities He visits China and Kenya to illustrate how dramatic declines in plagues have affected national economies Bollyky traces the role of infectious disease in the migrations from Ireland before the potato famine and to Europe from Africa and elsewhere today Historic health achievements are remaking a world that is both worrisome and full of opportunities Whether the peril or promise of that progress prevails Bollyky explains depends on what we do next A Council on Foreign Relations Book

Bubonic Plague Kevin Cunningham, 2011-01-01 This title examines an important historic event the bubonic plague Easy to read compelling text explores the history of the disease how it spread key players and happenings during the black death and the event's effects on society up through modern times Features include a table of contents a timeline facts additional resources Web sites a glossary a bibliography and an index Essential Events is a series in Essential Library an imprint of ABDO Publishing Company

Disease and the Modern World: 1500 to the Present Day Mark Harrison, 2013-05-02 Mark Harrison's book illuminates the threats posed by infectious diseases since 1500 He places these diseases within an international perspective and demonstrates the relationship between European expansion and changing epidemiological patterns The book is a significant introduction to a fascinating subject Gerald N Grob Rutgers State University In this lively and accessible book Mark Harrison charts the history of disease from the birth of the modern world around 1500 through to the present day He explores how the rise of modern nation states was closely linked to the threat posed by disease and particularly infectious epidemic diseases He examines the ways in which disease and its treatment and prevention changed over the centuries under the impact of the

Renaissance and the Enlightenment and with the advent of scientific medicine For the first time the author integrates the history of disease in the West with a broader analysis of the rise of the modern world as it was transformed by commerce slavery and colonial rule Disease played a vital role in this process easing European domination in some areas limiting it in others Harrison goes on to show how a new environment was produced in which poverty and education rather than geography became the main factors in the distribution of disease Assuming no prior knowledge of the history of disease Disease and the Modern World provides an invaluable introduction to one of the richest and most important areas of history It will be essential reading for all undergraduates and postgraduates taking courses in the history of disease and medicine and for anyone interested in how disease has shaped and has been shaped by the modern world Pestilence in Medieval and Early Modern English Literature Bryon Lee Grigsby, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company Jewish Martyrs in the Pagan and Christian Worlds Shmuel Shepkaru, 2006 This book presents a linear history of Jewish martyrdom from the Hellenistic period to the high Middle Ages Following the chronology of sources the study challenges the general consensus that martyrdom was an original Hellenistic Jewish idea Instead Jews like Philo and Josephus internalized the idealized Roman concept of voluntary death and presented it as an old Jewish practice The centrality of self sacrifice in Christianity further stimulated the development of rabbinic martyrology and the talmudic guidelines for passive martyrdom However when forced to choose between death and conversion in medieval Christendom Ashkenazic Jews went beyond these guidelines sacrificing themselves and loved ones Through death not only did they attempt to prove their religiosity but also to disprove the religious legitimacy of their Christian persecutors While martyrs and martyrologies intended to show how Judaism differed from Christianity they in fact reveal a common mindset

The Imaginary Puritan Nancy Armstrong, Leonard Tennenhouse, 2023-11-10 Nancy Armstrong and Leonard Tennenhouse challenge traditional accounts of the origins of modern Anglo American culture by focusing on the emergence of print culture in England and the North American colonies They postulate a modern middle class that consisted of authors and intellectuals who literally wrote a new culture into being Milton's Paradise Lost marks the emergence of this new literacy The authors show how Milton helped transform English culture into one of self enclosed families made up of self enclosed individuals However the authors point out that the popularity of Paradise Lost was matched by that of the Indian captivity narratives that flowed into England from the American colonies Mary Rowlandson's account of her forcible separation from the culture of her origins stresses the ordinary person's ability to regain those lost origins provided she remains truly English In a colonial version of the Miltonic paradigm Rowlandson sought to return to a family of individuals much like the one in Milton's depiction of the fallen world Thus the origin both of modern English culture and of the English novel are located in North America American captivity narratives formulated the ideal of personal life that would be reproduced in the communities depicted by Defoe Richardson and later domestic fiction This title is part of UC Press's Voices Revived program

which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992 **In the Wake of the Plague** Norman F. Cantor, 2015-03-17 The Black Death was the fourteenth century's equivalent of a nuclear war It wiped out one third of Europe's population taking millions of lives The author draws together the most recent scientific discoveries and historical research to pierce the mist and tell the story of the Black Death as a gripping intimate narrative *Trade, Travel, and Exploration in the Middle Ages* John Block Friedman, Kristen Mossler Figg, 2013-07-04 Trade Travel and Exploration An Encyclopedia is a reference book that covers the people's places technologies and intellectual concepts that contributed to trade travel and exploration during the Middle Ages from the years A D 525 to 1492 **A Companion to Global Environmental History** J. R. McNeill, Erin Stewart Mauldin, 2025-02-06 A COMPANION TO GLOBAL ENVIRONMENTAL HISTORY Equips both specialists and newcomers with the historical intellectual and political context for engagement with the environment Providing multiple points of entry into a dynamic fast growing field A Companion to Global Environmental History explores the many contours of the relationship between human societies and the natural world on which they depend Bringing together essays by an international roster of both established experts and emerging scholars this volume covers a uniquely broad range of temporal geographic thematic and contextual approaches to the practice of global environmental history Thirty three detailed chapters describe how the relationship between society and nature has changed over time examine the various drivers of change and environmental transformations survey different types of environmental thought and action around the world and more Now in its second edition the Companion is fully revised to reflect major research developments and new trajectories within the field Updated chapters that present new evidence for longstanding debates and innovative applications of environmental history are accompanied by six entirely new chapters on India China Africa early modern cities global environmental governance and European environmentalism Offering fresh insights into environmental thought culture policy and politics A Companion to Global Environmental History Second Edition is an ideal textbook for undergraduate and graduate students and an invaluable reference for scholars researchers and environmental historians **Teaching Literature and Medicine** Anne Hunsaker Hawkins, Marilyn Chandler McEntyre, 2016-01-01 Both the actualities and the metaphorical possibilities of illness and medicine abound in literature from the presence of tuberculosis in Franz Kafka's fiction or childbed fever in Mary Shelley's Frankenstein to disease in Thomas Mann's Death in Venice or in Harold Pinter's A Kind of Alaska from the stories of Anton Chekhov and of William Carlos Williams both doctors to the poetry of nurses derived from their contrasting experiences These are just a few examples of the cross pollination between literature and medicine It is no surprise then that courses in literature and medicine flourish in undergraduate curricula medical schools and continuing education programs throughout the United States and Canada This volume in the

MLA series Options for Teaching presents a variety of approaches to the subject It is intended both for literary scholars and for physicians who teach literature and medicine or who are interested in enriching their courses in either discipline by introducing interdisciplinary dimensions The thirty four essays in Teaching Literature and Medicine describe model courses deal with specific texts authors and genres list readings widely taught in literature and medicine courses discuss the value of texts in both medical education and the practice of medicine and provide bibliographic resources including works in the history of medicine from classical antiquity

Pre-modern Towns at the Times of Catastrophes Michaela Antonín Malaníková, Beata Mozejko, Martin Nodl, 2023-09-26 Covering areas in today s Ukraine Poland Bohemia Moravia Silesia and Slovakia this book studies the impact of both natural and human inflicted disasters on pre modern towns Various kinds of catastrophes starting with major natural disasters such as fires floods earthquakes and epidemics caused high population mortality Others such as protracted war conflicts were caused by human activity and could be just as if not more destructive for cities their populations and the urban economy Crises affected not only the population as a whole but also townsmen and women in their individual lives Case studies of renewal and resilience in the volume illustrate that in many cases successfully overcoming disaster brought positive changes for urban people The collection presents analytical research anchored in the contemporary historiographical discourse on studying social and cultural relations in urban environments in the Middle Ages and early modern period and it incorporates interdisciplinary approaches in the forms of geography archaeology and literary theory This volume is an engaging resource for students and researchers of pre modern history social history and disaster studies

Death, Disease and Mystical Experience in Early Modern Art Michael Hill, Jennifer Milam, 2025-10-01 Fear of death and disease preoccupied the European consciousness throughout the early modern era becoming most acute at times of plague and epidemics In these times of heightened anxieties images of saints and protectors served to reassure the faithful of their religious protection against infection Modes of visual engagement and devotional subject matter were coupled in new ways to reinforce the emotive impact of art works and to reaffirm the perceived reality of the afterlife In this context a visual language of mystical devotion which overcame the limits of the body and even eroticised its suffering could serve the needs of the desolate and the pained In this series of essays focused on spiritual sensibilities in Renaissance art and its legacies authors present original ideas about the themes of death disease and mystical experience based primarily on the study of objects and their documented historical contexts Methodologically wide ranging in approach the resulting volume provides novel insights into the interplay between suffering and art making in the Western world

The Global Genome Eugene Thacker, 2006-09-08 How global biotechnology is redefining life itself In the age of global biotechnology DNA can exist as biological material in a test tube as a sequence in a computer database and as economically valuable information in a patent In The Global Genome Eugene Thacker asks us to consider the relationship of these three entities and argues that by their existence and their interrelationships they are fundamentally redefining the notion of biological life itself Biological science

and the biotech industry are increasingly organized at a global level in large part because of the use of the Internet in exchanging biological data International genome sequencing efforts genomic databases the development of World Intellectual Property policies and the borderless business of biotech are all evidence of the global intersections of biology and informatics of genetic codes and computer codes Thacker points out the internal tension in the very concept of biotechnology the products are more tech than bio but the technology itself is fully biological composed of the biomaterial labor of genes proteins cells and tissues Is biotechnology a technology at all he asks or is it a notion of life itself that is inseparable from its use in the biotech industry The three sections of the book cover the three primary activities of biotechnology today the encoding of biological materials into digital form as in bioinformatics and genomics its recoding in various ways including the biocolonialism of mapping genetically isolated ethnic populations and the newly pervasive concern over biological security and its decoding back into biological materiality as in tissue engineering and regenerative medicine Thacker moves easily from science to philosophy to political economics enlivening his account with ideas from such thinkers as Georges Bataille Georges Canguilhem Michel Foucault Antonio Negri and Paul Virilio The global genome says Thacker makes it impossible to consider biotechnology without the context of globalism
