mechanisms in accordance with EU and international economic law In particular the book identifies the four main concerns in the EU regarding FDI from third countries distortive competition effects the lack of reciprocity on FDI treatment between the EU and the investor s home country objectives of the investor or their home country that may be detrimental to EU interests and safety of private information On this basis the book analyzes the Screening Regulation Regulation EU 2019 452 and its newly introduced screening ground security or public order and asks whether this and other similar screening grounds based on the notions of security public order and public policy can address these concerns with regard to foreign investors Based on an analysis of WTO law and EU primary law it argues that they cannot Thus the question arises Do the EU and Member States have the flexibility to adopt broader FDI screening mechanisms To answer this question the book examines the freedoms of capital movement and establishment in EU primary law as well as various sources of international economic law such as first and foremost the WTO s General Agreement on Trade in Services but also other bi and plurilateral trade and investment treaties including the EU China Comprehensive Agreement on Investment In closing the book identifies various legislative options for broader FDI screening mechanisms and their shortcomings
