Crack Cosmic Egg:

The Crack in the Cosmic Egg Joseph Chilton Pearce, 2002-08-01 The classic work that shaped the thought of a generation with its powerful insights into the true nature of mind and reality Defines culture as a cosmic egg structured by the mind's drive for logical ordering of its universe Provides techniques allowing individuals to break through the vicious circle of logic based systems to attain expanded ways of creative living and learning The sum total of our notions of what the world is and what we perceive its full potential to be form a shell of rational thought in which we reside This logical universe creates a vicious circle of reasoning that robs our minds of power and prevents us from reaching our true potential To step beyond that circle requires a centering and focus that today's society assaults on every level Through the insights of Teilhard Tillich Jung Jesus Carlos Castaneda and others Joseph Chilton Pearce provides a mode of thinking through which imagination can escape the mundane shell of current construct reality and leap into a new phase of human evolution This enormously popular New Age classic is finally available again to challenge the assumptions of a new generation of readers and help them develop their potential through new creative modes of thinking With a masterful synthesis of recent discoveries in physics biology and psychology Pearce reveals the extraordinary relationship of mind and reality and nature's blueprint for a self transcending humanity

Exploring the Crack in the Cosmic Egg Joseph Chilton Pearce, 2014-02-15 The classic follow up to the bestselling *The Crack in the Cosmic Egg* Explains the process of acculturation and the mechanisms that create our self limiting cosmic egg of consensus reality Reveals how our biological development innately creates a crack in our cosmic egg leaving a way to return to the unencumbered consciousness of childhood Explores ways to discover and explore the crack to restore wholeness to our minds and reestablish our ability to create our own realities In this classic follow up to his bestselling *The Crack in the Cosmic Egg* Joseph Chilton Pearce explains the process of acculturation and the mechanisms that create our self limiting cosmic egg of consensus reality Laying the groundwork for his later classic *Magical Child* Pearce shows that we go through early childhood connecting with the world through our senses With the development of language and the process of acculturation not only do our direct experiences of the world become much less vivid but our innate states of nonordinary consciousness become suppressed Trapped in a specific cultural context a cosmic egg we are no longer able to have or even recognize mystical experiences not mediated by the limitations of our culture Motivated primarily by a fear of death our enculturation literally splits our minds and prevents us from living fully in the present Drawing from Carlos Castaneda's writings about Don Juan and the sense of body knowing Pearce explores the varieties of nonordinary consciousness that can help us return to the unencumbered consciousness of our infancy He shows that just as we each create our own cosmic egg of reality through cultural conditioning we also innately create a crack in that egg Ultimately certain shifts in our biological development take place to offset acculturation leaving an avenue of return to our primary state Pearce examines the creation of the egg itself and ways to discover its inherent cracks to restore wholeness to our minds

release us from our fear of death and reestablish our ability to create our own realities through imagination and biological transcendence

The Death of Religion and the Rebirth of Spirit Joseph Chilton Pearce, 2007-03-02 Social visionary Joseph Chilton Pearce s indictment of cultural imprinting as the cause of humankind s cruel and violent behavior Refutes the Neo Darwinist assumption that violence is inherent in humanity Identifies religion as the sustaining force behind our negative cultural imprinting Shows how infant adult interactions unconsciously block the creative spirit We are all too aware of the endless variety of cruel and violent behavior reported to us in the media reminded daily that in every corner of the world someone is suffering or dying at the hands of another We have to ask Is this violence and cruelty endemic to our nature Are we at our foundation really so murderous In *The Death of Religion and the Rebirth of Spirit* Joseph Chilton Pearce life long advocate of human potential sounds an emphatic and convincing no Pearce explains that beneath our awareness culture imprints a negative force field that blocks the natural rise of the spirit toward its innate nature of love and altruism Further he identifies religion as the

primary cultural force behind this negative imprinting Drawing from recent neuroscience neurocardiology cultural anthropology and brain development research Pearce explains that the key to reversing this trend can be found in the interaction between infants and adults The adult mind set effectively compromises the infant s neural and hormonal interactions between the heart and the higher evolutionary structures of the developing brain thus keeping us centered primarily in our most primitive and defensive neural foundations generation after generation Pearce shows us that if we allow the intelligence of the heart to take hold and flourish we can reverse this unconscious loss of our true nature John S.,2011-05 John Stevens should have been a mortality statistic after 25 years of a life of alcoholic insanity As a child he endured the violence and chaos of alcoholism in his family and he chose to perpetuate those family traditions in his own marriage But today thirty five years later John lives a life which is rich vital and above all sober filled with friends music and service to others The story of his metamorphosis is a compelling saga a journey from the pit of addiction and degradation to a sane and useful life in recovery John offers his story as a testimonial to the transcendent power of faith trust and love to utterly transform a man s life As his tale reveals this can sometimes begin in a sudden and dramatic way on a fall walk through the bare trees of a still Minnesota woods **God, Science, and Religious Diversity** Robert T. Lehe,2018-07-24 Two major obstacles to belief in God in the twenty first century are the idea that science is incompatible with religious faith and the idea that the diversity of religions undermines the credibility of belief that any one religion could be truer than the others This book addresses both of these challenges to belief in God and explores a connection between them It argues that science and religion are not only compatible but that some recent scientific discoveries actually support belief in the existence of the Creator God The diversity of religions is widely believed to undermine the credibility of religious truth claims because of the assumed lack of any way to settle disagreements between different religions This book argues that one rational way to adjudicate disagreements between the claims of diverse religions is to assess their consistency with contemporary science The book considers how Christian theism and Buddhism fare in harmonizing their metaphysical frameworks with contemporary scientific cosmology Although both theistic and Buddhist worldviews resonate with many recent scientific discoveries the Big Bang theory and cosmic fine tuning favor the Christian doctrine of creation **The Living Church** ,1976-07 Frightful Stages Robert B. Marchesani,Mark Stern,2014-05-22 Face stage fright and self doubt with new courage The experience of awe has rarely been considered by psychologists but this extraordinary book makes up for that neglect Frightful Stages explores all the shades of that strange emotion from reverence to terror At its heart awe is the condition of human suffering in situations that require you to act in all the senses of that deceptively simple word whether on stage or off whether in the presence of many or alone Frightful Stages provides a multifaceted view of the semiotics of awe It deals with its manifestations in film on stage in poetry in ordinary lives as well as in the more extraordinary ones including Bessie Smith Carl Van Vechten Barbra Streisand Federico Fellini Thomas Merton and John

Ashbery This unprecedented book delineates the experience of awe in moments of stage fright performance anxiety and everyday interpersonal relations *Frightful Stages* takes place on and off stage before the curtain and behind in the audience and on the screen It explores the mysterious experience of awe in a multitude of contexts including Thomas Merton's psychoanalytic showdown with Gregory Zilboorg the chronic tensions between Apollonian reason and Dionysian instinct in myth psychoanalysis creation and performance the ill fated encounter between the greatest of all blues singers and a brilliant self loathing literary critic the moment of awe in experiential psychotherapy as seen by both the analyst and client the differences and similarities between stage fright and social phobia the intricate interrelationships between pernicious envy emotional awkwardness and fear a personal diary chronicling one man's crisis of panic anguish and self doubt the complexities of feeling offering and accepting reverence in the psychotherapeutic relationship *Frightful Stages* gives clinicians and lay readers a variety of approaches from the analytic to the unanalytic from the psychodynamic to the humanistic It will appeal to a diverse audience including therapists clients social theorists cultural anthropologists performers and writers Additionally this book is intended to help artists deal with creative blocks therapists cope with their own terrors and all helping professionals understand bizarre phenomena *The Myth of the Great Ending* Joseph M. Felser, 2025-09-12 From Christian believers in the Apocalypse and the Rapture to New Age enthusiasts of prophecies concerning the year 2012 Doomsday lore has been a part of culture a myth that colors how we perceive the world Why do we remain obsessed with Doomsday myths even when they fail to materialize What if we haven't recognized the true message of these myths Blending history psychology metaphysics and story philosopher and author Joseph Felser explores the spiritual questions raised by these enduring myths Along the way he consults the work of Joseph Campbell Carl Jung Marie Louise von Franz Black Elk Wovoka Itzhak Bentov Jane Roberts Seth Hermann Hesse Ingo Swann David Bohm Fred Alan Wolf J Allen Boone William James and Robert Monroe through ever widening circles of understanding Felser suggests that our obsession with The End of the World hides a repressed healthy longing for reconciliation with our inner and outer worlds with nature and our own natural spirituality He urges us to recognize and act upon that longing When we begin to listen to nature's voice and pay heed to our own dreams including visions intuitions and instinctive promptings the greatest revolution in all history will unfold We can create a future of our own choosing a beginning rather than an ending ***The Relative Speed Of Light*** Patrick Naughton, 2014-08-29 Analysis of the motion of the planets and their orbits around the sun raises an interesting possibility for the theory of General Relativity A simple spreadsheet model is presented which examines various factors that could influence the orbits of the planets It appears that variations in the speed of light could play an important role in determining the time taken for the planets to orbit the sun *Cobblestones* Dirk de Vos, 2015-10-22 Dirk de Vos's journey which has taken him across continents within dynamic cultures and into direct experience within divergent ideologies originated in the land of apartheid South Africa and ended in the far north of another continent *Cobblestones* follows the

path of this personal journey while embarking on a journey of political discovery as well With understanding rooted in his childhood in apartheid South Africa and spanning work experience in law multinational business government and academics de Vos is uniquely positioned to comprehend the origins and nature of transformative and manipulative political processes especially as they bear on the growing importance and problematic of the interplay between human rights and multiculturalism A central argument that emerges in this intricate mix of personal experience and sociopolitical analysis echoes Gene Veith's view of political postmodernism as rejecting of individual identity This results in a collectivist mentality in which individual claims are lost in the demands of the group de Vos expands on such an idea demonstrating its origins addressing the results of social experiments driven by such beliefs and analyzing the influence of groupism on recent politics in Europe Africa and North America Cobblestones is certain to evoke important expansive thought and discussion among readers and students alike

Ascending the Heights Rev. Gretchen A.L. Schork, OCL:AL,2018-03-19 Transcendence is a word that will scare some away from spiritual experiences they have had all their lives But when pursued consciously such experiences can lead to a deeper relationship with the inner being as well as with Deity The rituals and prayers in this book are designed to be used by anyone no matter the faith they follow The name used is Ultimate Deity which can be accepted by most faiths Or you can add the Name you use in your own practice In this way those of various faiths are encouraged to work together and experience the common goals that they share with those of other paths The elements included may be used as presented but they can also be used as separate pieces in your own rituals designed to suit your own needs **An**

Nigro Sansonese,1994 Long ago the ancestors of the Greeks Romans and Hindus were one people living on the Eurasian steppes At the core of their religion was the shamanic trance a natural state but one in which consciousness achieves a profound level of inner awareness Over the course of millennia the Indo Europeans divided and migrated into Europe and the Indian subcontinent The knowledge of shamanic trance retreated from everyday awareness and was carried on in the form of myths and distilled into spiritual practices most notably in the Indian tradition of yoga J Nigro Sansonese compares the myths of Greece as well as those of the Judeo Christian tradition with the yogic practices of India and concludes that myths are esoteric descriptions of what occurs within the human body especially the human nervous system during trance In this light the myths provide a detailed map of the shamanic state of consciousness that is our natural heritage This book carries on from the works of Carl Jung and Joseph Campbell to show how the portrayal of consciousness embodied in myth can be extended to a reappraisal of the laws of physics before they are descriptions of the world these laws like myths are descriptions of the human nervous system
