Goldie Hawn Academy Award and Golden Globe winning actress and founder of the Hawn foundation. A must read for all parents. Arianna Huffington founder you are at the helm guiding their course. With this book you can learn how to Harness your power as a parent. Use science to guide and nurture your child so they can achieve all of their dreams. Shape your child's brain in early years and set a healthy foundation that will enrich the rest of their lives. Avoid parenting pitfalls that will set your child's intellectual and social development back by years. The truth is nature and nurture are in a delicate dance if one goes too fast the other one falls. Science tells us that early childhood experiences have the capacity to structure and alter the brain. That means you didn't just supply your child's DNA you're still shaping it. And it's only by wielding this power that your child will activate their full potential. You are truly a gene therapist manipulating and guiding your child's genetic makeup based on the experiences you create for them. Contrary to what modern parenting trends have told us parenting is much simpler than we dared to imagine. Great parenting comes down to one mission to be prepped and present for the windows of your child's development so that you can take full advantage of these formative periods and help your child become a smart successful self sufficient adult. It doesn't require formal training or a fancy degree all it takes is getting involved. Once parents learn how to flip the right gene switches they can expand the limits of their child's potential and lay the emotional and intellectual groundwork that allows them to seize opportunities for

success fearlessly naturally and enthusiastically With a PhD in education and a second in psychology and forty years of experience as an educator Dr Gross combines an understanding of childhood development with practical and realistic tools to teach parents how to best take advantage of their child s developmental windows Your Baby s Brain translates the results from scientific studies about expanding consciousness and performance into day to day interaction between parents and children
