## **Becoming And Being:**

**Being and Becoming** Franklyn Sills, 2008-09-23 Being and Becoming is a wide ranging analysis of the nature of being and selfhood The book presents an original integrated paradigm with the aim of creating a comprehensive overview of the human condition and finding ways to alleviate suffering In essence the book explores the question What does it mean to be Being and Becoming begins with fresh interpretations of the work of Martin Heidegger and Buddhist Taoist and Christian writings as they relate to this question Most of Being and Becoming however is about the nature of self and selfhood as a process of I am this my becoming rather than my being Author Franklyn Sills interweaves concepts from object relations theories psychodynamics pre and perinatal psychology and Buddhist self psychology along with his own rich experience as a Buddhist monk somatic therapist and psychotherapist into his inquiry The works of Fairbairn and Winnicott are discussed in depth as are Winnicott and Stern s insights into the nature of the early holding environment the infant mother relational field and early perceptual dynamics A thoughtful guide for psychologists therapists counselors and other health professionals the book is also ideal for Buddhists and anyone looking for alternative therapy models **Ontology in Heidegger and Deleuze**

G. Rae, 2014-05-07 The first book in English to offer an extended comparative analysis of Heidegger and Deleuze Those familiar with Heidegger s and Deleuze s thinking will find a detailed well researched book that comes to an innovative conclusion while those new to both will find a clear well written exposition of their key concepts **Philosophy of Being**

Gerard Smith, Lottie H. Kendzierski, 2020-04-08 **The Poetics of Philosophy [A Reading of Plato]** David Ross, 2008-12-18 The Poetics of Philosophy is my attempt to hear what academic philosophy attempts to silence namely how reason resonates with madness It is thus a stinging of the great steed of academia in order to recover and re experience what otherwise would be repressed by the exigencies of bureaucratic commodity life in the late capitalist world An analysis of Plato s principal dialogues with a view towards developing the author s conception of thinking knowing and loving it incorporates the insights of Heidegger Nietzsche and Derrida Provoking the world mind to reflect upon its phenomenological possibility for Being dispersed within its daily routines or business the book argues for the metaphysicality of physical reality articulated through the narrative trope of fractal dialectical logic The present volume s more general implications extend the insights of the author s previous work in the area of social science I refer to the possibility for world communist revolution which is predicated on communism s thorough ridding itself of its na ve materialist perspective the relics of a Newtonian Universe and its embracing of a fractal dialectical logic or similar that is better able to incorporate the yearning for immortality desire to experience beauty and the need to have a meaningful life that define human species life To articulate such a framework is the aim of my general research THE TREADMILLS OF TIME Richard John Koscijew, 2014-10-16 If the universe is a seamlessly interactive system that evolves to an assigning of some levelling plexuity and that the lawful regularities of this universe are emergent properties of this system we can legibly assume that the cosmos as a legitimate

point of singularity as an undivided totality in the contributions for making of its whole In that for evincing to the progressive principal order of complementarity as placed within the intertwining relations within its given parts Minded that this collective and undivided whole exists in some sense within all contributions of its parts then one can declare positively or firmly maintain that it operates in self reflective fashion and is the evidence for all emergent plexuities Since human consciousness evinces self reflective awareness in the human brain and since this brain is equivalently matched to all physical phenomena as this can be viewed as an emergent property in the possessive nature of totality such that it can be found within the whole for existing by its reason of certainty As can be feasible as plausibly concluded that locality presupposes the consciousness of the universe as we are conscious to its existing conventions within this prevalent response to approaching the expeditions into which of the past present future dimensions allow to some marginal glimpse into the unthinkable

**Groundwork for a New Kind of African Metaphysics** Aribiah David Attoe, 2022-01-05 It is not far fetched to say that much of what is termed African metaphysics remains a traditional affair without the sort of critical analysis that sheds away the burden of myths and ethnocentric rigidity African ideas about the nature of being God causality death etc have largely remained the same and unchallenged mainly due to the hesitancy of some African scholars to question these suppositions or build beyond them In this book Aribiah David Attoe presents a unified African metaphysics that first interrogates important notions held by many traditional African thinkers and then builds upon them to propose a largely materialistic account of African metaphysics The book re imagines and reconstructs the idea of God being causality and death in African metaphysics tackling some of the problems associated with these concepts in African thought It also opens up new vistas of thought while engaging and encouraging African metaphysicians to explore a previously ignored perspective

*Perspectives in Group Psychotherapy (RLE: Group Therapy)* P.B. de Maré, 2014-09-19 This book originally published in 1972 aimed to provide a theoretical framework for group therapists to guide them through the mass of variables which beset them Its scope therefore is extremely broad for it also touches on philosophy psychology sociology communication and general systems theory In the last chapter certain conclusions are drawn concerning the relationship between group and psycho dynamics The book will be of interest to those who have already had some experience of small medium or large groups and who want to think about their work in more general terms it was not at the time widely realised how radically different and how potentially powerful are the implications of group procedures not only for therapy but in such fields as education industry and politics Freud recognised this when he pointed out the dilemma of having to procure for the group precisely those features which were characteristic of the individual and which are extinguished in him by the formation of the group Whilst the problem for the individual is the intrusion of unconscious factors for the group it is the group s equivalent of consciousness namely communication and organization which is in a quandary The group model differs crucially from the psychological but they may relate in the sense that as Freud indicated neurosis represents a recapitulation within the individual of mankind s group history The unconscious mind then is a group phenomenon In other words group theory turns psychoanalysis upside down and begins at the point where Freud left off relating neurosis to its social sources In the light of the group approach therefore neurosis and certain of the psychoses can be viewed as localized deposits of unresolved group experiences within

the individual whether they be past current or an expectation of the future a feature which makes traumatic neuroses more understandable since they cannot be explained in terms of infantile neurosis The author suggested the possibility of a new development in group techniques namely that of large group therapy freed of community ties or training considerations in which attitudes and ideologies make themselves evident not as cloudy idealistic non sequiturs but as crucial and clearly definable climates which either impede or promote communication and the flow of information

**Pursuing Excellence for the Glory of God** Keith A. Currivean, 2022-01-13 What is education How and why do educators do what we do And in what way can and ought education be distinctively Christian These are a few of the probing questions for which this book seeks answers Among other contributions Currivean's book explores a biblical philosophy of Christian education with unprecedented breadth and depth To accomplish this objective it considers what education is chapter 1 what philosophy of education is chapter 2 and what the ultimate goal of education is chapter 3 Additionally this book provides a never before Christian overview of twelve philosophies of education chapters 4-15 Each of those chapters provides an introduction of a particular philosophy of education and some of that philosophy's exemplars Each of those chapters also contributes a constructive Christian critique Chapter 16 highlights a biblical philosophy of Christian education featuring some people some principles and some priorities for a biblical philosophy of Christian education viz pursuing excellence for the glory of God

**Thinking with Kierkegaard** Arne Grøn, 2022-12-31 Arne Grøn's reading of Søren Kierkegaard's authorship revolves around existential challenges of human identity The 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of Kierkegaard's text with a constant focus on issues in contemporary philosophy Contrary to many approaches to Kierkegaard's authorship Grøn does not read Kierkegaard in opposition to Hegel The work of the Danish thinker is read as a critical development of Hegelian phenomenology with particular attention to existential aspects of human experience Anxiety and despair are the primary existential phenomena that Kierkegaard examines throughout his authorship and Grøn uses these negative phenomena to argue for the basically ethical aim of Kierkegaard's work In Grøn's reading Kierkegaard conceives human selfhood not merely as relational but also a process of becoming the self that one is through the otherness of self experience that is the body the world other people and God This book should be of interest to philosophers theologians literary studies scholars and anyone with an interest not only in Kierkegaard but also in human identity

**The National Review**, 1885 Being the Church Edward

Rommen, 2017-07-18 If the divine liturgy really is as beautiful as we claim wouldn't more people attend Wouldn't the church grow Driven by our desire for growth we count we analyze we make charts and we strategize but often with few discernible results That is probably the result of focusing on secondary aspects of church life As we know the very existence of a church is a gift of God's presence and not the result of any particular actions taken by human beings For that reason church is primarily about being something rather than doing or achieving something So the growth of the church is not reflected in

ever increasing numbers dollars and activities but rather in steadily growing conformity to the divine ideal So in order to evaluate ecclesial growth we will first have to ask what the church is supposed to be One answer to that question is captured in the four marks of the church given in the creed Oneness Holiness Catholicity and Apostolicity These four characteristics serve as a matrix or framework within which we can focus on the primary aspects of ecclesial being and help it grow and become what it was intended to be

**Cinema and Semiotic** Johannes Ehrat,2005-01-01 Based on Peirce s Semiotic and Pragmatism Ehrat offers a novel approach to cinematic meaning in three central areas narrative enunciation cinematic world appropriation and cinematic perception
