Bedside Of Death:

The Corpse Christine Quigley, 2015-09-17 Throughout the centuries different cultures have established a variety of procedures for handling and disposing of corpses. Often the methods are directly associated with the deceased's position in life such as a pharaoh's mummification in Egypt or the cremation of a Buddhist. Treatment by the living of the dead over time and across cultures is the focus of this study. Burial arrangements and preparations are detailed including embalming the funeral service storage and transport of the body and forms of burial. Autopsies and the investigative process of causes of deliberate death are fully covered. Preservation techniques such as cryonic suspension and mummification are discussed as well as a look at the recycling of the corpse through organ donation, donation to medicine, animal scavengers, cannibalism and of course natural decay and decomposition. Mistreatments of a corpse are also covered.

Dying, Death and Comfort Measures Pete Webster, 2021-06-22 A new and different complete transformation view of dying, death and hospice to aid patients, patients' family and caregivers. This book is based on the idea that yesterday's has come and gone, today can be achievable and tomorrow can still be attainable and sustainable. There isn't much we can do about the past except learn from it; we do have some control over today and most control tomorrow. Our loved ones' end of life journey should be welcome, cherished and comfortable regardless of the out of control symptoms and other dynamics. We can only achieve the above through knowledge and hence this book is designed to empower the dying, their families and caregivers and society in general especially with so much dying during the COVID-19 pandemic. Our dying loved ones deserve their end of life battles to be tranquil, pain free and comfortable. This book provides all the above in addition with pragmatic solutions on how to accomplish the above with simple, logical, comprehensive education. This book's main premise is relative to life-long wisdom: deduction that there is always something better and subsequently there is always room for improvement if we challenge ourselves to be better and challenging ourselves is knowledge.

Replacement Parts Arthur L. Caplan, James J. McCartney, Daniel P. Reid, 2015-09-24 In *Replacement Parts*, internationally recognized bioethicist Arthur L. Caplan and coeditors James J. McCartney and Daniel P. Reid assemble seminal writings from medicine, philosophy, economics and religion that address the ethical challenges raised by organ transplantation. Caplan's new lead essay explains the shortfalls of present policies. From there, book sections take an interdisciplinary approach to fundamental issues like the determination of death and the dead donor rule, the divisive case of using anencephalic infants as organ donors, the sale of cadaveric or live organs, possible strategies for increasing the number of available organs including market solutions and the idea of presumed consent and questions surrounding transplant tourism and gaming the system by using the media to gain access to organs. Timely and balanced, *Replacement Parts* is a first of its kind collection aimed at surgeons, physicians, nurses and other professionals involved in this essential lifesaving activity that is often fraught with ethical controversy.

Death's Memoir Sif Rose Thaysen, 2023-04-05. Ten gothic short stories illustrated by the author. I'm still in the car. The windshield is cracked. Branches are poking through like hands of death reaching for us. My chest hurts so does my leg. It's hard to breathe, the seat belt tight across my body. Pain shoots up my neck as I turn my head just a little but I can see her out the corner of my eye, her head lolling to one side. She lays against the passenger door which has been pushed in by the tree trunk. Her arm is at a wrong angle. A slim line of blood runs from the corner of her mouth. She turns her head, opens her eyes. Dead pale. You killed me, she says with stiff blue lips. A collection of short stories by Sif Rose Thaysen for a young adult/new adult readership. The ten stories investigate the gothic genre through a modern lens and deal with various aspects of death and loss through different tropes, voices, and settings.

Handbook of Death and Dying Clifton D. Bryant, 2003-10. Dying is a social as well as physiological phenomenon. Each society characterizes and consequently treats death and dying in its own individual ways that differ markedly. These particular patterns of death and dying engender modal cultural responses, and such institutionalized behavior has familiar economical, educational, religious, and political implications. The Handbook of Death and Dying takes stock of the vast literature in the field of thanatology, arranging and synthesizing what has been an unwieldy body of knowledge into a concise yet comprehensive reference work. This two-volume handbook will provide direction and momentum to the study of death-related behavior for many years to come.
