Library,1963      **Gulls of Europe, Asia and North America** Klaus Malling Olsen,2010-06-30 This eagerly awaited guide offers the most comprehensive treatment ever published on the gulls of Europe Asia and North America A total of 43 species is treated and every species is described in considerable detail with a full description of each plumage and racial variation Gulls are intelligent versatile opportunistic and ecological generalists As such they exploit a variety of habitats both coastal and inland take a wide range of food and are often extremely abundant They are also great wanderers with several American species regularly appearing in Western Europe and vice versa As well as identification criteria this book includes an up to date assessment of the range and status of every species together with information on patterns of vagrancy This important guide is published at a critical time in the development of dull taxonomy The large white headed forms occurring in the region comprise a superspecies complex with the precise relationships between the various components still under considerable debate A thorough illustrative and textual treatment of the group is much needed and this book provided the most complete overview of the complex The text is complemented not only by superb colour paintings by Hans Larrson but also by a large selection of colour photographs sourced from some of the finest bird photographers in the world This is the essential reference to a fascinating and endlessly challenging group of birds      **Irish Birds** ,1998

**Collaborative Form** Thomas Jensen Hines,1991 Collaborative Form attempts to show the nature and limits of works of art that are made up of two or more artistic forms The first task of this book is to analyze and interpret a set of such combinations Each chapter treats one collaborative work and attempts to show that the principles of collaboration are the same whether the components are poetry and graphic works as in *Lettera Amorosa* by Rene Char and George Braque poetry and music as in *Herzgewachse* by Maurice Maeterlinck and Arnold Schoenberg or more complex sets that include painting music dance lighting and drama as in *Der gelbe Klang* by Wassily Kandinsky *Morder Hoffnung der frauen* by Oskar Kokoschka and *Triad* by Alwin Nikolais Hines breaks down disciplinary barriers and then emphasizes the effects of the interactions between the arts The first step in methodology is that of refusing to make a priori commitments to the critical methodologies of the arts involved Each art is treated from its own perspective and each interpretation attends to interactions of the arts rather than to the contribution of any one art Once the collaborative works are examined the book shows that such works are similar to other art forms They obey the laws of temporal necessity non addition multiple interpretation and unity that any poem painting or musical composition might be said to obey Unlike other arts though collaborative forms are unique examples of the combinative effects of the arts In the process of interpreting individual works and attempting to summarize this form we are forced to see beyond the conventions of the constituent arts      **Frank Leslie's New York Journal** ,1856
