## **Bird Portrait Of A Competitor:**

*Bird Painting Between Art and Science* Hugh Ridley, 2024-02-02 Have you ever wondered why so many scientific handbooks on birds use paintings rather than photographs or why the painters Killian Mullarney and Lars Johnson are such significant figures in ornithology This book gives an account of the 500 years during which bird painting reached such heights and it traces the growth of scientific realism in this field It shows how scientific understanding has shaped the art and how artistic style has left its mark on the science Birds cross frontiers unhindered and the language of painting too knows no national barriers This book explores the huge contribution of German painting to the international tradition It looks at the work of great artists Dürer and Rembrandt It introduces the fascinating but neglected artists who made the landmark handbooks of the past It pays tribute to those major figures of the last 150 years who brought the art to its perfection Josef Wolf and Bruno Liljefors and looks briefly at the competition with photography at the start of the twentieth century It reveals the interlocking of art with the science of ornithology as it was developed by figures such as Buffon and Darwin **Birds**, 2004 *The Publishers Weekly*, 1998 *Familiar wild birds* Walter Swaisland, 1894 *Culture, Courtiers, and Competition* David M. Robinson, 2020-03-23 This collection of essays reveals the Ming court as an arena of competition and negotiation where a large cast of actors pursued individual and corporate ends personal agency shaped protocol and style and diverse people goods and tastes converged Rather than observing an immutable set of traditions court culture underwent frequent reinterpretation and rearticulation processes driven by immediate personal imperatives mediated through social political and cultural interaction The essays address several common themes First they rethink previous notions of imperial isolation instead stressing the court's myriad ties both to local Beijing society and to the empire as a whole Second the court was far from monolithic or static Palace women monks craftsmen educators moralists warriors eunuchs foreign envoys and others strove to advance their interests and forge advantageous relations with the emperor and one another Finally these case studies illustrate the importance of individual agency The founder's legacy may have formed the warp of court practices and tastes but the weft varied considerably Reflecting the complexity of the court the essays represent a variety of perspectives and disciplines from intellectual cultural military and political to art history and musicology *Bird* Roland Lazenby, 1998 Look in his eyes opponent Dominique Wilkins once said of Larry Bird and you see a killer It was that uncompromising competitiveness that marked Bird's storied career as he led the Boston Celtics to three NBA world championships in the 1980s The same unconquerable hunger to win has been captured in this special collection of dramatic work from longtime Boston sports photographer Steve Lipofsky supported by an insightful essay from veteran NBA writer Roland Lazenby Bird Portrait of a Competitor pays tribute to an immensely popular athlete who came from a humble Indiana background on his way to defining the essence of basketball dedication *Ireland's Gramophones* Zan Cammack, 2021-08-10 Because gramophonic technology grew up alongside Ireland's progressively more outspoken and

violent struggles for political autonomy and national stability Irish Modernism inherently links the gramophone to representations of these dramatic cultural upheavals Many key works of Irish literary modernism like those by James Joyce Elizabeth Bowen and Sean O Casey depend upon the gramophone for their ability to record Irish cultural traumas both symbolically and literally during one of the country's most fraught developmental eras In each work the gramophone testifies of its own complexity as a physical object and its multiform value in the artistic development of textual material In each work too the object seems virtually self placed less an aesthetic device than a thing belonging primordially to the text The machine is also often an agent and counterpart to literary characters Thus the gramophone points to a deeper connection between object and culture than we perceive if we consider it as only an image enhancement or instrument This book examines the gramophone as an object that refuses to remain in the background of scenes in which it appears forcing us to confront its mnemonic heritage during a period of Irish history burdened with political and cultural turbulence
