Birds Of The Chukchi Peninsula W Volume 1:

Birds of the Chukchi Peninsula and Wrangel Island Leonid Aleksandrovich Portenko, 1989 **Ducks, Geese, and Swans of North America** Guy A. Baldassarre, 2014 Ducks Geese and Swans of North America has been hailed as a classic since the first edition was published in 1942. A must have for professional biologists, birders, waterfowl hunters, decoy collectors, and wildlife managers, this fully revised and updated edition provides definitive information on the continent's forty-six species. Maps of both winter and breeding ranges are presented with images by top waterfowl photographers and the acclaimed original artwork of Robert W. Bob Hines. Originally authored by F. H. Kortright and later revised by Frank Bellrose, this latest edition, which has been meticulously updated by renowned waterfowl biologist Guy Baldassarre, continues the legacy of esteemed authors. Each species account contains in-depth sections on identification, distribution, migration, behavior, habitat, population status, breeding biology, rearing of young, recruitment, and survival, food habits, and feeding ecology, molts, and plumages, conservation, and management. To facilitate identification, the species accounts also include detailed illustrations of wings. An appendix contains comparative illustrations of ducklings, goslings, and cygnets. Guy Baldassarre has hit the target. His remake of the Kortright-Bellrose classic provides good biological descriptions, wonderful photographs, and illustrations, and easy-to-understand information about waterfowl. I would encourage every hunter and enthusiast to have these books as an educational guide to waterfowl and their needs. H. Dale Hall, CEO, Ducks Unlimited Inc. When, as an eleven-year-old in 1942, I read F. H. Kortright's first edition of this book, it altered the trajectory of my life. Every subsequent edition, including this latest update by Guy Baldassarre, has improved the landmark reference. I can't imagine that anyone interested in waterfowl or wetlands can live without this indispensable book. Paul A. Johnsgard, University of Nebraska-Lincoln. Creating a brand new version of such a timeless and previously revised classic is a risky venture, indeed, but nobody could be better suited for this monumental task than Guy Baldassarre. He has created a stunning new classic, at once magnificent in its visual appeal and truly comprehensive in its scientific breadth and depth. Hats off to Guy for dedicating himself to this project with such obvious passion, patience, and skill. This book absolutely belongs on the shelf or coffee table of anyone who has ever marveled at waterfowl, whether through their binoculars or from inside the duck blind. John W. Fitzpatrick, Cornell Laboratory of Ornithology. Guy Baldassarre was a professor of wildlife ecology at the State University of New York College of Environmental Science and Forestry in Syracuse until his death in 2012. He is the coauthor of the textbook *Waterfowl Ecology and Management*, Johns Hopkins University Press, Baltimore. www.press.jhu.edu. Campbell, Neil K. Dawe, Ian McTaggart-Cowan, John M. Cooper, Gary W. Kaiser, Michael C.E. McNall, 2011-11-01 This much awaited final volume of *The Birds of British Columbia* completes what some have called one of the most important regional ornithological works in North America. It is the culmination of more than 25 years of effort by the authors who with the assistance of thousands of dedicated volunteers throughout the province have created the basic reference work on the avifauna of British Columbia. Volume 4 covers the last half of the passerines and describes 102 species including the warblers, sparrows, grosbeaks, blackbirds and finches. The text builds upon the authoritative format of the previous volumes and is supported by hundreds of full colour illustrations including detailed distribution maps, unique habitat shots and beautiful photographs of the birds, their nests, eggs and young. In addition, a species update lists and describes 27 species of birds new to the province since the first three volumes were published. The book concludes with *Synopsis: The Birds of British Columbia into the 21st Century*, which synthesizes data and information from all four volumes and looks at the conservation challenges facing birds in the new millennium. The four volumes in *The Birds of British Columbia* provide unprecedented coverage of the region's birds, presenting a wealth of information on the ornithological history, regional environment, habitat, breeding habits, migratory movements, seasonality and distribution patterns of 472 species of birds. It is the complete reference work for birdwatchers, ornithologists and naturalists.

Birds of the Salton Sea Michael Patten, Guy McCaskie, Philip Unitt, 2003-08-19 The Salton Sea, California's largest inland lake, supports a spectacular bird population that is among the most concentrated and most diverse in the world. Sadly, this crucial stopover along the Pacific Flyway for migratory and wintering shorebirds, landbirds and waterfowl is dangerously close to collapse from several environmental threats. This book is the first thoroughly detailed book to describe the birds of Salton Sea: more than 450 species and subspecies in all. A major contribution to our knowledge about the birds of western North America, it will also be an important tool in the struggle to save this highly endangered area. Synthesizing data from many sources, including observations from their long term work in the area, the authors' species accounts discuss each bird's abundance, seasonal status, movement patterns, biogeographic affinities, habitat associations and more. This valuable reference also includes general information on the region's fascinating history and biogeography, making it an unparalleled resource for the birding community, for wildlife managers and for conservation biologists concerned with one of the most threatened ecosystems in western North America.

Ecology and Conservation of North American Sea Ducks Jean-Pierre L. Savard, Dirk V. Derksen, Dan Esler, John M. Eadie, 2015-04-13 The past decade has seen a huge increase in the interest and attention directed toward sea ducks, the Mergini tribe. This has been inspired in large part by the conservation concerns associated with numerical declines in several sea duck species and populations, as well as a growing appreciation for their interesting ecological attributes.
