Marra,2005-05-02 For centuries biologists have tried to understand the underpinnings of avian migration where birds go and why why some migrate and some do not how they adapt to a changing environment and how migratory systems evolve Twenty five years ago the answers to many of these questions were addressed by a collection of migration experts in Keast and Morton s classic work Migrant Birds in the Neotropics In 1992 Hagan and Johnston published a follow up book Ecology and Conservation of Neotropical Migrant Landbirds In Birds of Two Worlds Russell Greenberg and Peter Marra bring together the world s experts on avian migration to discuss its ecology and evolution The contributors move the discussion of migration to a global stage looking at all avian migration systems and delving deeper into the evolutionary foundations of migratory behavior Readers interested in the biology behavior ecology and evolution of birds have waited a decade to see a worthy successor to the earlier classics Birds of Two Worlds will complete the trilogy and become indispensable for ornithologists evolutionary biologists serious birders and public and academic libraries **The Reed Warblers** Bernd

Leisler,Karl Schulze-Hagen,2015-03-10 To the untrained eye all reed warblers may look alike Anyone who takes a closer look will quickly realize that there is in fact an amazing spectrum of different ecological and adaptive strategies across the world s 53 species Members of the reed warbler family have been models for this diversity in a large number of biological studies of avian lifestyles Many of these have resulted in outstanding findings and set new standards in behavioural and evolutionary ecology The authors rise to the challenge of determining how the members of the family have diversified by comparing their relationships and ecologies This comparative approach runs like a thread throughout this book and touches on almost all biological aspects ranging from habitat use competition and communication to reproduction and brood parasitism mating systems migration population dynamics island life and convergent evolution The life strategies of these little brown jobs exemplify some of the key topics in 21st century ornithology Winner of the BB BTO Best Bird Book of the Year 2012 award the members of the reed warbler family display an astonishing diversity in ecology and life strategies and have been used extensively as models in research this integrative overview combines published and unpublished information and is richly illustrated with large numbers of photographs drawings and maps a fascinating read for bird watchers and bird researchers alike In cooperation with Max Planck Institute for Ornithology Where to Watch Birds in Africa Nigel Wheatley,2014-07-14
