and tourism hot spots of the nineteenth and early twentieth centuries like Sorrento and Flinders Most of the rock outcrops around Western Port are geologically young but Cape Woolamai is formed from Devonian granite around 370 million years old The chapter on landforms will point out these granites as well as the solidified lava of volcanoes and sedimentary rocks deposited by ancient rivers and seas Western Port is renowned for its wildlife and there are wonderful places where nature thrives Visitors come to Phillip Island especially to see little penguins seals and thousands of nesting short tailed shearwaters Almost all of the waters of Western Port are protected for migratory wading birds which feed on its vast mud flats Mushroom Reef Marine Sanctuary and French Island Yaringa Churchill Island and Port Phillip Heads Marine National Parks protect many kinds of sea and shore creatures Belts of mangroves and wide saltmarshes may seem unappealing at first but they will reward any efforts you make to appreciate them The pictures in the chapter on animals and plants will help you to identify the species you are most likely to see
