**The Action Plan for Australian Birds 2010** Stephen Garnett, Judit Szabo, Guy Dutton, 2011-09-14 The Action Plan for Australian Birds 2010 is the third in a series of action plans that have been produced at the start of each decade The book analyses the International Union for Conservation of Nature IUCN status of all the species and subspecies of Australia s birds including those of the offshore territories For each bird the size and trend in their population and distribution has been analysed using the latest iteration of IUCN Red List Criteria to determine their risk of extinction The book also provides an account of all those species and subspecies that are or are likely to be extinct Each categorisation is justified on the basis of the latest research including much unpublished material that has been made available during workshops conducted with leading ornithologists and conservation biologists around the country as well as phone interviews and correspondence The result is the most authoritative account yet of the status of Australia s birds In this completely revised edition each account covers not only the 2010 status but provides a retrospective assessment of the status in 1990 and 2000 based on current knowledge taxonomic revisions and changes to the IUCN criteria and then reasons why the status of some taxa has changed over the last two decades Maps have been created specifically for the Action Plan based on vetted data drawn from the records of Birds Australia its members and its partners in many government departments The book contains some surprises some alarming some encouraging The status of some birds has improved over the last two decades as a result of dedicated conservation management Some may not have changed status but at least they are holding their own Many however are continuing to decline and a distressing number are new to the list There is also an increasing number of birds for which captive insurance populations need not only to be considered as a future option but actively pursued before it is too late But this is not a book of lost causes It is a call for action to keep the extraordinary biodiversity we have inherited and pass the legacy to our children Every one of Australia s threatened taxa can be saved This book describes the populations of species at greatest risk and outlines ways we can turn them around 2012 Whitley Award Commendation for Zoological Resource

**Korean Buncheong Ceramics from Leeum, Samsung Museum of Art** Soyoung Lee, Seung-chang Jeon, 2011 Bold sophisticated engaging and startlingly modern Buncheong ceramics emerged as a distinct Korean art form in the 15th and 16th centuries only to be eclipsed on its native ground for more than 400 years by the overwhelming demand for porcelain

Elements from the Buncheong idiom were later revived in Japan where its spare yet sensual aesthetic was much admired and where descendants of Korean potters lived and worked This innovative study features 60 masterpieces from the renowned Leeum Samsung Museum of Art in Seoul as well as objects from The Metropolitan Museum of Art and presents current scholarship on Buncheong s history manufacture use and overall significance The book illustrates why this historical art form continues to resonate with Korean and Japanese ceramists working today and with contemporary viewers worldwide
