**Australian High Country Raptors** Jerry Olsen, 2014-06-18

Australian High Country Raptors covers raptor species that regularly breed in the high country above 600 metres from Goulburn in New South Wales down to the hills outside Melbourne Victoria Author Jerry Olsen explores the nature of these striking animals that are classified as Accipitriformes diurnal hawks falcons kites and eagles Falconiformes and Strigiformes nocturnal owls Comparisons between these high country raptors and lower elevation breeders are also provided in addition to comparisons with raptors found overseas especially from North America and Europe The book begins with a description of habitats and vegetation types in the high country and which raptors are likely to be seen in each habitat type It continues with sections on finding and watching raptors raptor identification hunting styles food breeding and behaviour and conservation Appendices provide species accounts for diurnal breeding species in the high country with basic information about their ecology distribution and conservation as well as detailed instructions about handling an injured or orphaned raptor Illustrated throughout with photographs and drawings Australian High Country Raptors offers readers a chance to look into the lives of Australia's fascinating birds of prey

*Raptors* Keith L. Bildstein, 2017-05-02 Raptors are formally classified into five families and include birds such as eagles ospreys kites true hawks buzzards harriers vultures and falcons that are familiar and recognized by many observers These diurnal birds of prey are found on every continent except Antarctica and can thrive in seemingly inhospitable spots such as deserts and the tundra They have powerful talons and hooked beaks for cutting and tearing meat and keen binocular vision to aid in their hunting prowess Because of their large size distinctive feeding habits and long distance flight patterns raptors intrigue humans and have been the subject of much general interest as well as extensive scientific research Keith L Bildstein has watched and studied raptors on five continents and is well prepared to explain their critical importance not only as ecological entities but also as inspirational tokens across natural and human dominated landscapes His book offers a comprehensive and accessible account of raptors including their

evolutionary history their relationships to other groups of birds their sensory abilities their general natural history their breeding ecology and feeding behavior and threats to their survival in a human dominated world Biologically sound but readable Raptors is a nontechnical overview of this captivating group It will allow naturalists birders hawk watchers science educators schoolchildren and the general public along with new students in the field of raptor biology to understand and appreciate these birds and in so doing better protect them **The Great Journeys** Barrett Williams, ChatGPT, 2025-04-02
