## **Birkhauser Architectural Guide France:**

Birkhauser Architectural Guide France Bertrand Lemoine, 2005-01 This illustrious guide provides insight into the buildings that contributed to the making of 20th century architecture in France. Around 1900 Art Nouveau became established as a genre in France; new architectural concepts came into being. This guide reflects the eclectic nature of the works produced throughout the last century. The buildings were selected after reviewing guides, monographs, architectural reviews that were published over the past 100 years. It concentrates on the historical aspects of each built work. There are 470 entries; another 300 buildings that are referred to within these entries. The name, address of each building, start, completion dates of the project, the names of the architects, engineers are included. Maps, photos. *Birkhäuser Architectural Guide* Bertrand Lemoine, 2000. In the 20th century France has proved astonishingly fertile ground for modern architecture. The architectural ideas of Modernism and the avant garde are firmly rooted here and dominate the French architectural landscape, unlike in any other country. Her architects are acclaimed throughout the world. Paris, a center for international architecture, rightly forms the focus of this guidebook with more than 100 notable buildings. However, this guidebook also does justice to the entire country with more than 450 buildings from all regions. The buildings are documented with photographs, drawings and texts providing a comprehensive and portable guide. *Birkhäuser Architectural Guide* Raúl Risa, 1998. **Birkhäuser Architectural**

**Guide** Mercedes Daguerre, Roman Hollenstein, 1997. **Birkhäuser Architectural Guide Japan** Francesco Montagnana, 1997. This book like all volumes in the Birkhauser Architectural Guide series beginning with Germany by Nerdinger/Tafel successfully represents all important developments of the 20th century. This includes work by the masters Kenzo Tange, Arata Isozaki and Tadao Ando, the projects of younger architects such as Itsuko Hasegawa, Hiroshi Naito and Kazuo Shinohara, as well as the buildings designed by foreign architects such as Aldo Rossi, Cesar Pelli, Rem Koolhaas and Norman Foster. Nearly 400 buildings are introduced in separate entries. The addresses locating each building and the weatherproof jacket make the book an indispensable companion for all travelers to Japan. It is also a valuable and inexpensive reference guide by virtue of extensive indices and bibliographical information. **Subject Guide to Books in Print**, 1997.

**Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004. A balance of sophistication and clarity in the writing, authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture. The contents feature major architects, firms and professional issues, buildings, styles and sites, the architecture of cities and countries, critics and historians, construction materials and planning topics, schools, movements and stylistic and theoretical terms. Entries include well selected bibliographies and illustrations. Reference that rocks American Libraries, May 2005.
