Birth Of Modern London Development And Design Of The City 1660 17:

The Birth of Modern London Elizabeth McKellar, 1999 This text offers a radical re assessment of late 17th century architecture and a pioneering investigation of the beginnings of the modern middle class town houses *The birth of modern London*, 2021-02-23 The period 1660 1720 saw the foundation of modern London The city was transformed post Fire from a tight warren of medieval timber framed buildings into a vastly expanded regularised landscape of brick houses laid out in squares and spacious streets This work for the first time examines in detail the building boom and the speculative developers who created that landscape It offers a wealth of new information on their working practices the role of craftsmen and the design thinking which led to the creation of a new prototype for English housing The book concentrates on the mass produced houses of the middling sort which saw the adoption of classicism on a large scale in this country for the first time McKellar shows however that the new city maintained a surprising degree of continuity with existing patterns of urban used and traditional architecture The book presents the late seventeenth and the early eighteenth century as a distinct phase in London s architectural development and offers a radical reinterpretations of the adoption of Renaissance styles and ideas at the level of the everyday challenging conventional interpretations of their use and reception in this country **Built from**

Below: British Architecture and the Vernacular Peter Guillery, 2010-09-13 Extending the concept of British vernacular architecture to embrace buildings such as places of worship villas hospitals suburban semis and post war mass housing this book is of use to anyone with an interest in architectural history *London's Waterfront and its World, 1666-1800* John

Schofield, Stephen Freeth, 2023-12-21 This volume covering the period 1666 1800 considers the archaeology of the port of London on a wide scale from the City down the Thames to Deptford During this period with the waterfront at its centre London became the hub of the new British empire contributing to the exploitation of people from other lands known as slavery **Architects and Intellectual Culture in Post-restoration England** Matthew Walker, 2017 Looking to the

works of prominent architects and intellectuals such as John Evelyn Robert Hooke Sir Christopher Wren and Roger North this volume explores the origins of the study of architecture as an intellectual pursuit in late seventeenth century England

Monumental London Richard Barras, 2023-10-26 This book presents an original interpretation of the building history of London in terms of its evolving political economy Each of the seven ages of the city from the Roman to the modern are portrayed through their monumental buildings concentrating in particular on their symbolic purpose as expressions of the status and authority of those who built them The concluding synthesis explores how these successive layers of building can be seen to be a product of the evolving class structure the changing distribution of wealth and the shifting struggle for political power within the city and the nation Although the focus is on London the analysis is applicable to any urbanized economy at any stage of development This book offers unique insight into London as a landscape of power and as a city that has assumed a succession of identities over the last two millennia It will be relevant to students and researchers interested in

urban economy economic history and the political economy *The Gentleman's House in the British Atlantic World 1680-1780* S. Hague, 2015-06-23 The Gentleman's House analyses the architecture decoration and furnishings of small classical houses in the eighteenth century By examining nearly two hundred houses it offers a new interpretation of social mobility in the British Atlantic World characterized by incremental social change **Wicked Intelligence** Matthew C. Hunter, 2013-10-15 In late seventeenth century London the most provocative images were produced not by artists but by scientists Magnified fly eyes drawn with the aid of microscopes apparitions cast on laboratory walls by projection machines cut paper figures revealing the exact proportions of sea monsters all were created by members of the Royal Society of London the leading institutional platform of the early Scientific Revolution Wicked Intelligence reveals that these natural philosophers shaped Restoration London's emergent artistic cultures by forging collaborations with court painters penning art theory and designing triumphs of baroque architecture such as St Paul's Cathedral Matthew C Hunter brings to life this archive of experimental philosophical visualization and the deft cunning that was required to manage such difficult research Offering an innovative approach to the scientific image making of the time he demonstrates how the Restoration project of synthesizing experimental images into scientific knowledge as practiced by Royal Society leaders Robert Hooke and Christopher Wren might be called wicked intelligence Hunter uses episodes involving specific visual practices for instance concocting a lethal amalgam of wax steel and sulfuric acid to produce an active model of a comet to explore how Hooke Wren and their colleagues devised representational modes that aided their experiments Ultimately Hunter argues the craft and craftiness of experimental visual practice both promoted and menaced the artistic traditions on which they drew turning the Royal Society projects into objects of suspicion in Enlightenment England The first book to use the physical evidence of Royal Society experiments to produce forensic evaluations of how scientific knowledge was generated Wicked Intelligence rethinks the parameters of visual art experimental philosophy and architecture at the cusp of Britain's imperial power and artistic efflorescence *Down and Out in Eighteenth-Century London* Tim Hitchcock, 2004-01-01 London in the eighteenth century was the greatest city in the world It was a magnet that drew men and women from the rest of England in huge numbers For a few the streets were paved with gold but for the majority it was a harsh world with little guarantee of money or food For the poor and destitute London's streets offered little more than the barest living Yet men women and children found a great variety of ways to eke out their existence sweeping roads selling matches singing ballads and performing all sorts of menial labor Many of these activities apart from the direct begging of the disabled depended on an appeal to charity but one often mixed with threats and promises Down and Out in Eighteenth Century London provides a remarkable insight into the lives of Londoners for all of whom the demands of charity and begging were part of their everyday world **Between Design and Making** Andrew Tierney, Melanie Hayes, 2024-07-08 The seventeenth and eighteenth centuries represent a high point in the intersection between design and workmanship Skilled artisans creative and technically competent agents within their own

field worked across a wide spectrum of practice that encompassed design supervision and execution and architects relied heavily on the experience they brought to the building site Despite this the bridge between design and tacit artisanal knowledge has been an underarticulated factor in the architectural achievement of the early modern era Building on the shift towards a collaborative and qualitative analysis of architectural production Between Design and Making re evaluates the social and professional fabric that binds design to making and reflects on the asymmetry that has emerged between architecture and craft Combining analysis of buildings archival material and eighteenth century writings the authors draw out the professional pedagogical and social links between architectural practice and workmanship They argue for a process oriented understanding of architectural production exploring the obscure centre ground of the creative process the scribbled sketched hatched and annotated beginnings of design on the page the discussions arguments and revisions in the forging of details and the grappling with stone wood and plaster on the building site that pushed projects from conception to completion
