Birthing Rooms Concept And Reality:

Birthing rooms Philip E. Sumner, Celeste R. Philips, 1981 **A Good Birth, a Safe Birth** Diana Korte, Roberta Scaer, 1992-09-16 Essential guide to the bewildering array of delivery options available **Reconstructing Architecture** Thomas A. Dutton, Lian Hurst Mann, 1996 Reconstructing Architecture was first published in 1996 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions To create architecture is an inherently political act yet its nature as a social practice is often obscured beneath layers of wealth and privilege The contributors to this volume question architecture's complicity with the status quo moving beyond critique to outline the part architects are playing in building radical social movements and challenging dominant forms of power The making of architecture is instrumental in the construction of our identities our differences the world around us much of what we know of institutions the distribution of power social relations and cultural values is mediated by the built environment Historically architecture has constructed the environments that house the dominant culture Yet as the essays in Reconstructing Architecture demonstrate there exists a strong tradition of critical practice in the field one that attempts to alter existing social power relations Engaging the gap between modernism and postmodernism each chapter addresses an oppositional discourse that has developed within the field and then reconstructs it in terms of a new social project feminism social theory environmentalism cultural studies race and ethnic studies and critical theory The activists and scholars writing here provide a clarion call to architects and other producers of culture challenging them to renegotiate their political allegiances and to help reconstruct a viable democratic life in the face of inexorable forces driving economic growth destroying global ecology homogenizing culture and privatizing the public realm Reconstructing Architecture reformulates the role of architecture in society as well as its capacity to further a progressive social transformation Contributors Sherry Ahrentzen U of Wisconsin Milwaukee Bradford C Grant California Polytechnic State U San Luis Obispo Richard Ingersoll Rice U Margaret Soltan George Washington U Anthony Ward U of Auckland New Zealand Thomas A Dutton is an architect and professor of architecture at Miami University Ohio He is editor of Voices in Architectural Education 1991 and is associate editor of the Journal of Architectural Education Lian Hurst Mann is an architect and editor of Architecture California A founding member of the Labor Community Strategy Center in Los Angeles she is editor of its bilingual quarterly Ahora Now and a coauthor of Reconstructing Los Angeles from the Bottom Up 1993 **Make Room for Daddy** Judith Walzer Leavitt, 2009-06-21 Using fathers' first hand accounts from letters journals and personal interviews along with hospital records and medical literature Judith Walzer Leavitt offers a new perspective on the changing role of expectant fathers from the 1940s to the 1980s She shows how as men moved first from the hospital waiting room to the labor room in the 1960s and then on to the delivery and birthing rooms in the 1970s and 1980s they became progressively more involved in the birth experience and their influence over events expanded With careful attention

to power and privilege Leavitt charts not only the increasing involvement of fathers but also medical inequalities the impact of race and class and the evolution of hospital policies Illustrated with more than seventy images from TV films and magazines this book provides important new insights into childbirth in modern America even as it reminds readers of their own experiences

Intersex and Identity Sharon E. Preves, 2003 Approximately one in every two thousand infants born in America each year is sexually ambiguous in such a way that doctors cannot immediately determine the child's sex Some children's chromosomal sexuality contradicts their sexual characteristics Others have the physical traits of both sexes or of neither Is surgical intervention or sex assignment of intersexed children necessary for their physical and psychological health as the medical and mental health communities largely assume Should parents raise sexually ambiguous children as one gender or another and keep them ignorant of their medical history Drawing upon life history interviews with adults who were treated for intersexuality as children Sharon E Preves explores how such individuals experience and cope with being labeled sexual deviants in a society that demands sexual conformity Preves frames their stories within a sociological discussion of gender the history of intersex medicalization the recent political mobilization of intersexed adults and the implications of their activism on identity negotiation medical practice and cultural norms By demonstrating how intersexed people manage and create their own identities often in conflict with their medical diagnosis Preves argues that medical intervention into intersexuality often creates rather than mitigates the stigma these people suffer

AWHONN's Single Room Maternity Care Celeste R. Phillips, Loel Fenwick, 2000 This text describes the key dimensions of the Phillips and Fenwick model of single room maternity care SRMC and helps providers implement it successfully The model was designed to strengthen families and to reduce operating costs while enhancing patient provider and family satisfaction This volume explains the philosophy that drives the SRMC the elements necessary for its success new elements that fit into the overall programme and new clinical and interpersonal skills that practitioners need to implement such a programme The appendices provide detailed information about numerous successful SRMC programmes across the country

Bodies of Knowledge Wendy Kline, 2010-10-15 Throughout the 1970s and 80s women argued that unless they gained access to information about their own bodies there would be no equality In *Bodies of Knowledge* Wendy Kline

considers the ways in which ordinary women worked to position the female body at the center of women's liberation As Kline shows the struggle to attain this knowledge unified women but also divided them according to race class sexuality or level of professionalization Each of the five chapters of *Bodies of Knowledge* examines a distinct moment or setting of the women's movement in order to give life to the ideas expectations and pitfalls encountered by the advocates of women's health the making of *Our Bodies Ourselves* 1973 the conflicts surrounding the training and practice of women's pelvic exams the emergence of abortion as a feminist issue the battles over contraceptive regulation at the 1983 Depo Provera FDA hearings and the rise of the profession of midwifery Including an epilogue that considers the experiences of the daughters of 1970s feminists *Bodies of Knowledge* is an important contribution to the study of the bodies that marked the lives of feminism's second wave

Childbirth, Midwifery and Concepts of Time Christine McCourt, 2009-09-01 All cultures are concerned with the business of childbirth so much so that it can never be described as a purely physiological or even psychological event This volume draws together work from a range of anthropologists and midwives who have found anthropological approaches useful in their work Using case studies from a variety of cultural settings the writers explore the centrality of the way time is conceptualized marked and measured to the ways of perceiving and managing childbirth how women midwives and other birth attendants are affected by issues of power and control but also actively attempt to change established forms of thinking and practice The stories are engaging as well as critical and invite the reader to think afresh about time and about reproduction

Nursing of the Family in Health and Illness Martha J. Bradshaw, 1988 *Shared Childbirth* Philip E. Sumner, Celeste R. Phillips, 1982 **Birthing Fathers** Richard K. Reed, 2005-01-19 Treating birth as ritual Reed makes clever use of his anthropological expertise qualitative data and personal experience to bring to life the frustrations and joys men often encounter as they navigate the medical model of birthing William Marsiglio author *Sex Men and Babies* *Stories of Awareness and Responsibility* In the past two decades men have gone from being excluded from the delivery room to being admitted then invited and finally expected to participate actively in the birth of their children No longer mere observers fathers attend baby showers go to birthing classes and share in the intimate everyday details of their partners pregnancies In this unique study Richard Reed draws on the feminist critique of professionalized medical birthing to argue that the clinical nature of medical intervention distances fathers from child delivery He explores men's roles in childbirth and the ways in which birth transforms a man's identity and his relations with his partner his new baby and society In other societies birth is recognized as an important rite of passage for fathers Yet in American culture despite the fact that fathers are admitted into delivery rooms little attention is given to their transition to fatherhood The book concludes with an exploration of what men's roles in childbirth tell us about gender and American society Reed suggests that it is no coincidence that men's participation in the birthing process developed in parallel to changing definitions of fatherhood more broadly Over the past twenty years it has become expected that fathers in addition to being strong and dependable will be

empathetic and nurturing Well researched candidly written and enriched with personal accounts of over fifty men from all parts of the world this book is as much about the birth of fathers as it is about fathers in birth **Reality's Fugue** F. Samuel Brainard, 2017-10-15 Science religion philosophy these three categories of thought have organized humankind's search for meaning from time immemorial Reality's Fugue presents a compelling case that these ways of understanding often seen as competing are part of a larger puzzle that cannot be rendered by one account of reality alone This book begins with an overview of the concept of reality and the philosophical difficulties associated with attempts to account for it through any single worldview By clarifying the differences among first person third person and dualist understandings of reality F Samuel Brainard repurposes the three predominant ways of making sense of those differences exclusionist only one worldview can be right inclusivist viewing other worldviews through the lens of one in order to incorporate them all and thus distorting them and pluralist or relativist holding that there are no universals and truth is relative His alternative mode of understanding uses Douglas Hofstadter's metaphor of a musical fugue that allows different voices and melodies of worldviews to coexist in counterpoint and conversation while each remains distinct with none privileged above the others Approaching reality in this way Brainard argues opens up the possibility for a multivoiced perspective that can overcome the skeptical challenges that metaphysical positions face Engagingly argued by a lifelong scholar of philosophy and global religions this edifying and accessible exploration of the nature of reality addresses deeply meaningful questions about belief reconciliation and being

Stranger in the Birth Room Kathryn Gutteridge, 2025-07-03 Fills a critical gap in the literature on maternity care a comprehensive and thoughtful exploration of how we can better understand support and care for survivors of sexual abuse Sheena Byrom in her foreword Trauma informed maternity care is essential for women who are survivors of childhood abuse Pregnancy and birth can bring up long suppressed memories and feelings that have implications for women's health and wellbeing as they become mothers Welcoming a new baby into the family can challenge relationships and distort emotions following birth affecting partners and bonding with their baby Kathryn Gutteridge has spent her career as a midwife advocating for the needs of survivor women in maternity care and this book is the result of that work She explains how and why the needs of survivors must be taken into account and shows that trauma informed care can transform the experiences of women who might otherwise be further traumatised by the maternity care system Drawing on the evidence base personal experience and the words of survivors themselves this carefully conceived and written book will help all those who work in maternity to better understand the needs of survivors of childhood abuse in their care For those clinicians who are themselves survivors this book acknowledges the challenges they face and makes suggestions about how they might find solace in supporting women and their babies **Basic Maternity Nursing** Persis Mary Hamilton, 1984
