Birthing Autonomy Womens Experiences Of Planning Home Births:

Birthing Autonomy Nadine Edwards, 2013-04-03 *Birthing Autonomy* brings some balance to the difficult arguments that arise from debates about home births and focuses on women's views and their experiences of planning home births. It provides an in-depth exploration of how women make decisions about home births and what aspects matter most to them. Comparing how differently the pros and cons of home births are constructed and contemplated by mothers and by the medical profession, the book looks at how current obstetric thinking and practices can disempower and harm women emotionally and spiritually as well as physically. Written in an accessible style, this book is enlightening for student and practicing midwives and obstetricians as well as researchers and students of nursing, medical sociology, health studies, gender studies, feminist practitioners and theorists. It will also be invaluable to expectant mothers who want to be more informed about the choices they are facing and the wider context within which their birth options are considered. *Women's*

Supporting

Women to Give Birth at Home Mary Steen, 2012-03-12 *Supporting Women to Give Birth at Home* describes and discusses the main challenges and issues that midwives and maternity services encounter when preparing for and attending a home birth. To ensure that a home birth is a real option for women, midwives need to be able to believe in a woman's ability to give birth at home and to promote this birth option providing evidence-based information about benefits and risks. This practical guide will help midwives to have the necessary skills, resources and confidence to support homebirth. The book includes the present birth choices a woman has, the implications homebirth has upon midwifery practice, how midwives can prepare and support women and their families, the midwife's role and responsibilities, national and local policies, guidelines and available resources, pain management options. With a range of recent home birth case studies brought together in the final chapter, this accessible text provides a valuable insight into those considering homebirth. *Supporting Women to Give Birth at Home* will be of interest to students studying issues around normal birth and will be an important resource for clinically based midwives in particular, community-based midwives, home birth midwifery teams, independent midwives and all who are interested in homebirth as a genuine choice. *Home Birth* Mary Nolan, 2010-11-08 *Home Birth* focuses on the experiences of women whose choices were opposed by health professionals during their pregnancy. It explores ideas of risk and informed choice in pregnancy and birth and uses ten women's narratives to explore why women might want to give birth at home.

Reproduction, Childbearing and Motherhood Pranee Liamputtong, 2007 Although reproduction including infertility, abortion, childbearing and motherhood is a significant human experience, its social meaning is shaped by the culture in which birthing women live. Reproduction and its management therefore occur within the social and cultural context of the event. As such, reproductive beliefs and practices differ across social and cultural settings. This book focuses on reproduction, childbearing and motherhood. In this volume, the authors show that despite the modernisation of the society and advanced

medical technology and knowledge in reproduction traditions continue to exert influence on how the women and their families manage their reproduction childbearing and motherhood in their societies

Breastfeeding in Hospital Fiona Dykes, 2006-09-27 Breast is best is today s prevailing mantra However women particularly first time mothers frequently feel unsupported when they come to feed their baby This new experience often takes place in the impersonal and medicalized surroundings of a hospital maternity ward where women are seen to by overworked midwives Using a UK based ethnographic study and interview material this book provides a new

radical and critical perspective on the ways in which women experience breastfeeding in hospitals It highlights that in spite of heavy promotion of breastfeeding there is often a lack of support for women who begin to breastfeed in hospitals thus challenging the current system of postnatal care within a culture in which neither service user nor provider feel satisfied Incorporating recommendations for policy and practice on infant feeding Breastfeeding in Hospital is highly relevant to health professionals and breastfeeding supporters as well as to students in health and social care medical anthropology and medical sociology as it explores practice issues while contextualising them within a broad social political and economic context

The Midwife's Labour and Birth Handbook Vicky Chapman,Cathy Charles,2018-02-05 Praise for the previous edition An outstanding handbook It will be a familiar volume on most midwifery bookshelves providing an excellent guide to midwifery focused care of both woman and child in the birthing setting Nursing Times Online Providing a practical and comprehensive guide to midwifery care The Midwife s Labour and Birth Handbook continues to promote best practice and a safe satisfying birthing experience with a focus on women centred care Covering all aspects of care during labour and birth from obstetric emergencies to the practicalities of perineal repair including left hand suturing the fourth edition has been fully revised and updated to include Full colour photographs of kneeling extended breech and footling breech births New water birth and breech water birth photographs Female genital mutilation Sepsis Group B streptococcus Care of the woman with diabetes Neonatal hypoglycaemia Mental health Seeding microbirthing It also addresses important issues such as Why are the numbers of UK women giving birth in stirrups RISING rather than falling Why are so few preterm babies given bedside resuscitation with the cord intact Would the creation of midwife breech practitioners specialists enable more women to choose vaginal breech birth and is breech water birth safe What is the legal position for women who choose to free birth and their birth partners Why are midwives challenging the OASI care bundle Incorporating research evidence and anecdotal observations The Midwife s Labour and Birth Handbook remains an essential resource for both student midwives and experienced practising midwives

Supporting Women for Labour and Birth Nicky Leap,Billie Hunter,2022-01-12 This new edition provides an up to date and thoughtful guide to supporting women in labour looking at a range of techniques and approaches that promote a safe and positive experience of birth for women and their families Across the world support in labour has been shown to reduce obstetric interventions and improve outcomes for women and babies Written by two highly experienced midwifery authors this text draws on a wide range of cutting edge research on this topic identifying how the evidence can be applied to everyday practice Narratives from women and practitioners including midwives doulas childbirth educators and students are used to illustrate a range of situations where the quality of support is central to the quality of the experience and outcome Supporting Women for Labour and Birth encourages readers to reflect on their experiences and examine the evidence provided by both research and experiences of women and practitioners in order to explore how this could be incorporated into their practice The only book to deal directly with the practical and emotional issues associated

with labour support this is an ideal text for student midwives and an important reference for practising midwives doulas and other childbirth practitioners

Sociology for Midwives Carol Kingdon,2014-09-22 This book introduces key topics from sociology which are relevant to midwifery audiences Introductions to the classical theorists and the more recent sociological perspectives that shape contemporary sociology are presented in the context of their applicability to midwifery practice Complex sociological debates are presented in a simple manner applying theory to clinical practice

Narratives of Consent and Reproductive Subjects Samantha Halliday,Rebecca Brione,Jacqueline Nicholls,2025-09-02 Consent is the golden principle that determines the legality of most medical treatment However whilst choice is the much vaunted central tenet of maternity care its importance emphasised in policy documents the lived experience is often rather different particularly in the case of individuals constructed as other This collection brings together a range of researchers from multiple disciplines to address the issue of choice in the context of reproduction focussing upon narratives of consent as they pertain to reproductive subjects who all too often are rendered invisible by the law by the healthcare professionals treating them or by society It explores the contours of consent in England and Wales engaging with reproductive justice by focussing upon the way in which reproductive subjects are othered treated differently due to their skin colour their genetic makeup the fact that they have a serious mental illness or even those who do not want to be mothers It presents original research bringing together multiple perspectives in examining the way in which individuals are rendered invisible in the context of reproductive healthcare The book will be essential reading for academics and professionals in law nursing medicine midwifery sociology ethics and anthropology

Survivors of Childhood

Sexual Abuse and Midwifery Practice Lis Garratt,2018-11-05 Many midwives will care for women who are survivors of childhood sexual abuse CSA whether these women disclose this or not Pregnant and birthing women commonly experience their bodies becoming public property a variety of sometimes intimate medical procedures and limited choices on where and how care is provided For CSA survivors who have suffered loss of ownership over their bodies as children and may experience recurring feelings of powerlessness and loss of control these factors can combine with impersonal and medicalised settings and practices to deeply traumatic effect Sexual abuse is all about power not sex interviewee Many midwives also experience powerlessness and loss of control as professionals as a result of these same settings and practices and those midwives who are themselves CSA survivors bring a particularly acute awareness of this and of the needs of survivor mothers This unique study sets out to gain a deeper understanding of the needs of these mothers by exploring them alongside the parallel experiences of survivor midwives It explores the insights and reflections they together bring to midwifery and the positive results of more collaborative personal communicative and ultimately empowering practices for all involved The significance of this book is far wider than its immediate subject for it offers us the opportunity to rethink our professional coping strategies If we seek to make all our professional relationships ones of equality and opportunities for growth as would benefit someone who has suffered abuse then we can all grow and flourish from the Foreword by Mavis Kirkham

Joints and Connective Tissues Kerry Phelps,Craig Hassed,2012-10-31 Joints and Connective Tissues General Practice The Integrative Approach Series In order to diagnose and manage the patient presenting with musculoskeletal symptoms it is important to distinguish whether the pathology is arising primarily in the so called hard tissues such as bone or the soft tissues such as cartilage disc synovium capsule muscle tendon tendon sheath It is also important to distinguish between the two most common causes of musculoskeletal symptoms namely inflammatory and degenerative Birthing in Unprecedented Times Nadia von Benzon,Rebecca Whittle,Jo Hickman-Dunne,2023-10-24 This book shines a light on the way in which risk in and beyond childbirth is highly contextual and the way in which risk management strategies can be understood as socially and materially constructed

The Politics of Maternity Rosemary Mander,Jo Murphy-Lawless,2013-04-12 The evidence surrounding the skills and approaches to support good birth has grown exponentially over the last two decades but so too have the obstacles facing women and midwives who strive to achieve good birth This new book critically explores the complex issues surrounding contemporary childbirth practices in a climate which is ever more medicalised amidst greater insecurity at broad social and political levels The authors offer a rigorous and thought provoking analysis of current clinical managerial and policy making environments and how they have prevented sustaining the kind of progress we need The Politics of Maternity explores the most hopeful developments such as the abundant evidence for one to one care for women and sets these accounts against the background of changes in health service organisation and provision that block these approaches from becoming an everyday occurrence for women giving

birth The book sets out the case for renewed attention to the politics of childbirth and what this politics must entail if we are to give birth back to women Designed to help professionals cope with the transition from education to the reality of the system within which they learn and practise this inspiring book will help to assist them to function and care effectively in a changing health care environment

Pamela E. Klassen, 2001-10-07 Blessed Events explores how women who give birth at home use religion to make sense of their births and in turn draw on their birthing experiences to bring meaning to their lives and families Pamela Klassen introduces a surprisingly diverse group of women in their own words while also setting their birth stories within wider social political and economic contexts In doing so she emerges with a study that disrupts conventional views of both childbirth and

religion by blurring assumed divisions between conservative and feminist women and by taking childbirth seriously as a religious act. Most American women who have a choice give birth in a hospital and request pain medication. Yet enough women choose and advocate unmedicated home birth and do so for carefully articulated reasons that constitute a movement. Klassen investigates why women whose religious affiliations range from Old Order Amish to Reform Judaism to goddess-centered spirituality defy majority opinion, the medical establishment, and sometimes the law to have their babies at home. In considering their interpretations, including their critiques of the dominant medical model of childbirth and their views on labor pain, she examines the kinds of agency afforded to or denied women as they derive religious meanings from childbirth. Throughout, she identifies tensions and affinities between feminist and traditionalist appraisals of the symbolic meaning of birth and the power of women. What does home birth, a woman-centered movement working to return birth to women's control, mean in practice for women's gender and religious identities? Is this supreme valuing of procreation and motherhood constraining, or does it open up new realms of cultural and social power for women? By asking these questions while remaining cognizant of religion's significance, *Blessed Events* challenges both feminist and traditionalist accounts of childbearing while broadening our understanding of how religion is lived in contemporary America.
