Dressed to Rule Philip Mansel, 2005-01-01 Throughout history rulers have used clothes as a form of legitimization and propaganda While palaces pictures and jewels might reflect the choice of a monarch's predecessors or advisers clothes reflected the preferences of the monarch himself Being both personal and visible the right costume at the right time could transform and define a monarch's reputation Many royal leaders have known this from Louis XIV to Catherine the Great and from Napoleon I to Princess Diana This intriguing book explores how rulers have sought to control their image through their appearance Mansel shows how individual styles of dress throw light on the personalities of particular monarchs on their court system and on their ambitions The book looks also at the economics of the costume industry at patronage at the etiquette involved in mourning dress and at the act of dressing itself Fascinating glimpses into the lives of European monarchs and contemporary potentates reveal the intimate connection between power and the way it is packaged

Bismarck-Literatur Paul I Schulze, 1895 *Recent Additions by Classes*, 1898 *British Museum Catalogue of printed Books*, 1884 Der Grundgedanke der Politik Bismarcks Ulrich Kühn, 2001 The Splintered Party Dan S. White, 1976 As a study of the greatest middle class party of Imperial Germany The Splintered Party is inevitably in its broadest aspect an inquiry into the weaknesses of liberalism in the Empire of Bismarck and Wilhelm II How did the National Liberals the dominant force in the Reichstag of the 1870s become by 1914 a spent and divided power Professor White explores this question from a new perspective emphasizing regional circumstances as primary agents of the party's decline The resulting portrait underscores the paradox of the National Liberals a party with strength in all areas of the Empire a rarity before 1914 yet a party whose impact was undermined by divisions among its regional branches In The Splintered Party the former Grand Duchy of Hessen serves as a testing ground where the regional foundations of National Liberalism can be exposed As Professor White points out the party's reversals on the Imperial plane after 1878 rejection by Bismarck electoral defeats internal splits not only ended its early primacy in German affairs but also shifted political initiative from Berlin and the Reichstag delegation to the National Liberal branches in the states and provinces which had maintained unity power and alliances with local government in spite of the upheaval above them The consequences of this change become visible through close examination of the political and social structure in Hessen On the regional level a liberalism based on the claim to majority representation by the notables Honoratioren of bourgeois society a creed no longer plausible in national politics remained defensible Through the Heidelberg Declaration of 1884 the National Liberals of the German Southwest attempted to buttress this approach with an economic and social platform and simultaneously to make it the impulse of the national party's revival But they succeeded only in deferring National Liberalism's adjustment to democratic politics and in subordinating their movement to the clash of regional and constituency interests The result was a chronically splintered party Against the backdrop of this main theme White delineates several additional features of the changing political and social scene in Imperial Germany the local power of the notables Bismarck's skills as a political manager the character of agrarian discontent and rural anti-Semitism the steady advance of socialism The uniquely German element in National Liberalism's failure is assessed in a concluding comparison with the development of liberal politics in Britain and Italy
