American Representations of Post-Communism Andaluna Borcila, 2014-07-11 With the televised events of 1989 territories of Eastern and Central Europe that had been marked as impenetrable and inaccessible to the Western gaze exploded into visibility As the narratives of the Cold War crumbled new narratives emerged and new geographies were produced on and by American television Using an understudied archive of American news broadcasts and tracing their flashes and echoes through travel guides and narratives of return written by Eastern European Americans this book explores American ways of seeing and mapping communism s disintegration and the narratives articulated around post communist sites and subjects

Pawlowski,2015-08-19 For hundreds of years the Blue Ridge Forest remained silent until just recently It started with something only the insects underground could feel As it grew stronger the birds became aware as they perched in the trees for the night One day someone noticed smoke rising from the old ancient granite peak of the Blue Ridge Mountain Then one early morning hour something was felt but it happened quick with one deep ear splitting sound The sound was deafening Loud enough to be heard all the way to the castle which was three miles away The entity looked at the crack that appeared in front of it For the first time in hundreds of years it has seen light Barely stronger than the light breeze that pushed its way inside the damp cave through the hairline crack The entity slowly made its way out Slithering its way through the eight foot thick crack it stood outside the mountain The entity didn't waste time making its way down the mountain Weakened by being trapped for so many years it needed a host to live in to make it stronger Making its way to the base of the mountain it started seeing animal tracks stopping for a minute to take in all of the scents It knew there were humans close by but it was too weak to take on a human host Finally after a few moments it slithered over a log to track the preferred animal scent Three miles further it came upon its host No more than twenty feet away stood the big deer eating the leaves off the plants that sprouted off the forest floor Even though the deer didn't see hear or smell anything the big buck knew from living its existence in the forest and relying on its senses that some kind of danger lurked nearby The big buck quickly put its head up Standing as still as a statue the buck only moved its eyes to scan the surrounding forest As the moments went by the panic in the deer grew stronger Adrenaline surged through the deer's veins The deer knew it had to run as fast as it could into the safety of the forest But it was too late

Official Gazette of the United States Patent and Trademark Office ,1994 **The Horse: Its Varieties, Breeding, and Management** H. D. Richardson,Matthew Marmaduke Milburn,1852 **Vector Control** Jan A. Rozendaal,1997 The first comprehensive illustrated guide to vector control methods suitable for use by individuals and communities Published at a time when large scale control programs organized by governments are declining the manual aims to help non professionals understand the role of vectors in specific diseases and then select and use control methods that are appropriate effective affordable and safe Hundreds of simple inexpensive and often ingenious techniques developed and used in a host of different settings are presented and described in this abundantly illustrated guide The manual is intended to assist health workers at district and community level in aid organizations in refugee camps or in resource development projects who do not have direct access to experts in entomology yet need methods for controlling the vectors of such important diseases as malaria filariasis leishmaniasis schistosomiasis dengue and trypanosomiasis With this audience in mind the book combines non specialist factual information about vectors and the diseases they cause with practical advice on control measures whether involving the use of insecticides environmental modifications or the construction of simple devices from local materials Details range from a table showing where and when the different groups of biting Diptera are active to a recipe for preparing plaster to protect homes against triatomine bugs from step by step

instructions for the construction of cheap insect traps to advice on how to impregnate bed nets and curtains with suitable insecticides The book opens with a brief description of recent changes in the approach to vector control followed by a discussion of factors that can influence the success of control measures undertaken by individuals and communities The core of the manual consists of eight chapters focused on each of the major vectors and groups of vectors mosquitos and other biting Diptera tsetse flies triatomine bugs bedbugs fleas lice ticks and mites cockroaches houseflies cyclops and freshwater snails Each chapter includes pertinent facts about the vector s life cycle behavior and favorite habitats the diseases it causes and their clinical features including opportunities for prevention treatment and control Against this background methods for control are presented in great detail Since the use of control measures is often constrained by lack of resources as well as lack of knowledge most methods described are simple and cheap do not require much training or supervision and are safe for both the user and the environment The remaining chapters offer guidance on the principles and practice of house spraying with residual insecticides and provide instructions for the safe use of pesticides and the emergency treatment of poisoning

Eldridge,J.D. Edman,2012-12-06 This book is designed primarily as a textbook for graduate and postgraduate courses in Medical Public Health and Veterinary Entomology Its uniqueness is that its emphasis is on disease as opposed to arthropods It includes general discussions of epidemiology transmission disease control vector control and disease surveillance In addition it contains chapters oriented towards the many specific arthropod borne diseases Furthermore the book discusses the many direct impacts that parasitic insects have on human and animal health The arthropods themselves are dealt with in two introductory chapters **Elsevier's Dictionary of Plant Names and Their Origin** ,2000-07-19 The dictionary contains about 30 000 vernacular and literary English names of plants plus a few American both wild and cultivated with their botanical name and a brief account of the names meaning if known It was conceived as part of the author s wider interest in plant and tree lore and ethnobotanical studies Knowledge of plant names can give insight into largely forgotten beliefs Why for example is or was the common red poppy known as Blind Man An old

superstition has it that if the poppy were put to the eyes it would cause blindness Such names were probably the result of some taboo against picking the plant Similarly other names were likely to have been applied as a result of a country mother's warning to her children against eating poisonous berries For the warning carries more weight when the name given to the berry reinforces the warning Many such plants or fruits may be ascribed to the devil Devil's Berries for Deadly Nightshade is an example Names may also be purely descriptive and can also serve to explain the meaning of the botanical name Beauty Berry is an example it is the name given to the American shrub that belongs to the genus *Callicarpa* which is made up of two Greek words that mean beauty and berry Literary or book names have also been included in this dictionary as being a very important part of the whole Many of them provide links in the transmission of words through the ages Thor's Beard for example is a book name for houseleek and has never been used in the dialect But it highlights the legend that houseleek is a lightning plant and by reverse logic is a preserver from fire
