Black Antony:

Black Theater, City Life Macelle Mahala, 2022-08-15 Macelle Mahala's rich study of contemporary African American theater institutions reveals how they reflect and shape the histories and cultural realities of their cities. Arguing that the community in which a play is staged is as important to the work's meaning as the script or set, Mahala focuses on four cities' arts ecologies to shed new light on the unique relationship between performance and place. Cleveland home to the oldest continuously operating Black theater in the country, Pittsburgh birthplace of the legendary playwright August Wilson, San Francisco a metropolis currently experiencing displacement of its Black population, and Atlanta a city with forty years of progressive Black leadership and reverse migration, *Black Theater, City Life* looks at Karamu House Theatre, the August Wilson African American Cultural Center, Pittsburgh Playwrights Theatre Company, the Lorraine Hansberry Theatre, the African American Shakespeare Company, the Atlanta Black Theatre Festival, and Kenny Leon's True Colors Theatre Company to demonstrate how each organization articulates the cultural specificities, sociopolitical realities, and histories of African Americans. These companies have faced challenges that mirror the larger racial and economic disparities in arts funding and social practice in America, while their achievements exemplify such institutions' vital role in enacting an artistic practice that reflects the cultural backgrounds of their local communities. Timely, significant, and deeply researched, this book spotlights the artistic and civic import of Black theaters in American cities.

Scientific and Industrial History of Aniline Black Emilio Noelting, 1889

Guild and State, Guild and State examines the values of social solidarity and fraternity that emerged from medieval guilds and city communes and the effect of traditional corporate organization of labor on socioeconomic attitudes and theories of the state. What ordinary guildsmen and townsmen thought about these issues can be gleaned from chronicles, charters, and reported slogans. But in tracing attitudes toward the guilds of early Germanic times to today's equivalent trade unions, a distinction must be made between popular ethos and learned philosophy. In Europe from the twelfth to the seventeenth centuries, the corporate organization of labor and of town market communities developed side by side with the ideals of personal liberty, market freedom, and legal equality. Self-governing labor organizations and civil freedom developed together as coherent practices. The values of mutual aid and craft honor on the one hand, and of personal freedom and legal equality on the other, formed the moral infrastructure of our civilization. Alternate ideals balanced, harmonized, and even cross-fertilized one another, as in the principle of freedom of association. Contrary to preconceptions, however, corporate values were seldom expressed philosophically in the Middle Ages. Political theory and the world of learning from the start emphasized liberal values. It was only after the Reformation that guild and communal values found expression in political theory. Even then, only a few philosophers acknowledged that solidarity and exchange, the poles around which the values of guild and civil society respectively rotate, are not opposites but complementary and attempted to weave these together into a texture as tough and complex as that of urban society itself. By

showing that the ideals of social solidarity and workers rights have often been intertwined with liberty and equality rather than in opposition to them this book provides an unexpected explanation and rationale for the Third Way The Enlightenment and industrialization led to an apotheosis of liberal values Guilds disappeared and were only in part replaced by labor unions the values of market exchange have since been in the ascendant though Hegel Durkheim and more recently advocates of liberal corporatism maintain the possibility of a symbiosis between corporate and liberal values In Guild and State there emerges an alternative history of political thought which will be fascinating to the general as well as the specialist reader

Freedom's Progress? Gerard Casey, 2021-10-04 In Freedom s Progress Gerard Casey argues that the progress of freedom has largely consisted in an intermittent and imperfect transition from tribalism to individualism from the primacy of the collective to the fragile centrality of the individual person and of freedom Such a transition is he argues neither automatic nor complete nor are relapses to tribalism impossible The reason for the fragility of freedom is simple the importance of individual freedom is simply not obvious to everyone Most people want security in this world not liberty Libertarians writes Max Eastman used to tell us that the love of freedom is the strongest of political motives but recent events have taught us the extravagance of this opinion The herd instinct and the yearning for paternal authority are often as strong Indeed the tendency of men to gang up under a leader and submit to his will is of all political traits the best attested by history The charm of the collective exercises a perennial magnetic attraction for the human spirit In the 20th century Fascism Bolshevism and National Socialism were Casey argues each of them a return to tribalism in one form or another and many aspects of our current Western welfare states continue to embody tribalist impulses Thinkers you would expect to feature in a history of political thought feature in this book Plato Aristotle Machiavelli Locke Mill and Marx but you will also find thinkers treated in Freedom s Progress who don t usually show up in standard accounts Johannes Althusius Immanuel Kant William Godwin Max Stirner Joseph Proudhon Mikhail Bakunin Pyotr Kropotkin Josiah Warren Benjamin Tucker and Auberon Herbert Freedom s Progress also contains discussions of the broader social and cultural contexts in which politics takes its place with chapters on slavery Christianity the universities cities Feudalism law kingship the Reformation the English Revolution and what Casey calls Twentieth Century Tribalisms Bolshevism Fascism and National Socialism and an extensive chapter on human prehistory

Shakespearean Adaptation, Race and Memory in the New World Joyce Green MacDonald, 2020-08-24 As readers head into the second fifty years of the modern critical study of blackness and black characters in Renaissance drama it has become a critical commonplace to note black female characters almost complete absence from Shakespeare's plays Despite this physical absence however they still play central symbolic roles in articulating definitions of love beauty chastity femininity and civic and social standing invoked as the opposite and foil of women who are fair Beginning from this recognition of black women's simultaneous physical absence and imaginative presence this book argues that modern Shakespearean adaptation is a primary means for materializing black women's often elusive presence in the plays serving as a vital staging place for historical and political inquiry into racial formation in Shakespeare's world and our own Ranging geographically across North America and the Caribbean and including film and fiction as well as drama as it discusses remade versions of Othello Romeo and Juliet Antony and Cleopatra and The Taming of the Shrew Shakespearean Adaptation Race and Memory in the New World will attract scholars of early modern race studies gender and performance and women in Renaissance drama

Craft Theory and Contemporary Architecture Grant Alford, 2025-05-28 This book offers a comprehensive exploration of craft theory in relation to contemporary architecture Craft is an old and familiar idea but the line between craft and art or craft and mere manufacturing for example is notoriously hard to describe In architecture a similarly blurred line between the design process on one hand and the physical making of buildings on the other lies at the center of various debates about what it means to do architecture The growth and development of craft theory in recent years suggest new insights into these architectural debates but situating the meaning of craft within architecture within today's technological landscape is a complex problem Alford responds to this challenge by collecting various narratives from craft theory and other fields and discerning among them new lenses through which to view contemporary architectural practice Episodes from this expanded view of craft in architecture go beyond predictable accounts of Ruskin and Morris to envision new models of practice new ways of engaging other building professionals and new ways for architects to understand their own labor and the nature of how and what kinds of things they themselves craft Architecture is changing and within the ongoing story of craft explored in this book are new
