Daniels,2012-11-01 Take a look at the science behind the Mayan calendar prophecies and mythology The Maya believed multiple cycles governed civilization They created various calendars to track these cycles Their short count calendar tracked a 256 year cycle believed to control epidemics famines warfare and more Scientists have found a 250 year solar cycle that also appears to affect epidemics famines warfare and more Their long count calendar tracked a 5000 year cycle related to natural disasters and cosmic catastrophes Scientists have also discovered that the Earth is subjected to periodic bombardment by comets and asteroids that plunges the world into long periods of darkness and cold Mayan mythology appears to record such events and in some instances even the exact dates on which these catastrophes occurred in the past By comparing these dates with ice core records sedimentary records and climate records this book reveals the truth about civilization s darkest days And what may lie ahead in the future Harper's ,2003 **Weekly World News** ,2005-01-10 Rooted in the creative success of over 30 years of supermarket tabloid publishing the Weekly World News has been the world s only reliable news source since 1979 The online hub www.weeklyworldnews.com is a leading entertainment news site

the curve the view they had been dreaming of for a long time opened up before them The summit of a mountain which was steeper towards the top was snow covered Around this summit when its size was considered in proportion to the mountain a snake coiled at least fifty meters wide and about a kilometer long Its head at the same level as the rising sun moved ever so slightly Its jet black eyes could be viewed even from this distance It had many bright but faint colors Due to this the contrast it did with the grayish brown rocks of the mountain was weak Its jagged tail stretched all the way down to the broad upper plain of the mountain There was nothing at the summit of the much lower mountain on the right side The view was perfect as the sky was cloudless and the weather was clear

The Naked Truth Kevin Sandler,2007-08-22 From parents and teachers to politicians and policymakers there is a din of voices participating in the debate over how young people are affected by violence strong language and explicit sexual activity in films The Motion Picture Association of America MPAA responded to this concern in 1968 when it introduced a classification and rating system based on the now well known labels G PG PG 13 R and X For some these simple tags are an efficient way to protect children from viewing undesirable content But do the MPAA ratings actually protect children In *The Naked Truth* Kevin S Sandler argues that the rating system does not protect children but instead protects the Hollywood film industry One prime indicator of this is the collective abandonment of the NC 17 rating in 1990 by the major distributors of the MPAA and the main exhibitors of the National Association of Theatre Owners By categorizing all films released by Hollywood and destined for mainstream theaters into R ratings or lower the industry ensures that its products are perceived as responsible entertainment to all audiences and incontestable to politicians and moral reformers By embracing a no NC 17 rule the industry collapses mature subject matter with pornography creating a national cinema where certain representations of sex and nudity are taboo
