Global Lessons from the AIDS Pandemic Bradly J. Condon, Tapen Sinha, 2008-07-22 We began to research for this book in 2000 with the idea that we might contribute to the search for solutions to the global HIV AIDS pandemic by combining perspectives from different disciplines Much has happened in the intervening years First the severity of the HIV AIDS pandemic in sub Saharan Africa and the threat it posed for many others regions of the world led to a movement among several countries to correct the imbalance between producers and users of pharmaceutical products This effort produced a clarification of the right of governments to produce generic medicine under compulsory licenses and an amendment of the World Trade Organization's TRIPS Agreement to allow exports of generic medicines from one WTO Member to another In 2007 the amended rules were put into practice with Canada authorizing the export of generic antiretroviral drugs to Rwanda However at the same time global patent laws have been undermined due to regulatory capture most notably in free trade agreements and through political pressure on countries like Thailand to not to exercise their right to issue compulsory licenses for pharmaceutical products Second the amount of money available for the treatment and prevention of HIV AIDS has increased dramatically with the establishment of the World Bank Multi Country HIV AIDS Program for Africa MAP the Global Fund to Fight AIDS Tuberculosis and Malaria and the US President's Emergency Plan for AIDS Relief PEPFAR among other funding initiatives

Blood County Doris Piserchia, 2015-04-30 Blood was what they called that mountain town and the forbidding land around it and the name was significant Folks there knew a secret that would have shocked the world but nobody was ever going to get out of Blood to tell Not even when Portia Clark arrived hot on a news story for a national magazine Especially not her Clint Breen who had been in the outside world tried to save her But he had to fight a tradition that drove men and women to unspeakable lusts and that ruled secretly the lives and afterlives of everything being in the county Blood was the place where more men and women walked the night than were ever seen by day Horror was their heritage for they were the people that the census dared not count

I Was Trying to Describe What it Feels Like Noy Holland, 2017-12-12 These new and selected stories testify to the fact that there are still fine short

story writers out there doing the hard job of serious literary production in our age of tweets and memes Holland's language is challenging elliptical bristling with sensations and resounding with the interior lives of complicated recognizable people The New York Times Book Review In the twenty years since her first short story collection The Spectacle of the Body Noy Holland has become a singular presence in American writing Her second and third collections What Begins With Bird and Swim for the Little One First secured her reputation as a writer who excels and excites her prose described as unsettling and acutely wrought rhythmic and lyrically condensed Following the recent publication of Bird her first novel I Was Trying to Describe What It Feels Like is a gathering of stories the majority of which have never before been published in book form Set on two continents and ranging in length from a single page to a novella these stories beguile and disrupt they remind us of the reach of our compassion and of the dazzling possibilities of language I Was Trying to Describe What it Feels Like from which the collection takes its title is part love song part fever dream a voice demanding the ecstatic Holland's stories do not indulge in easy emotions and they keep to the blessedly blurred frontier between poetry and prose

The Encyclopaedia Britannica Or Dictionary of Arts, Sciences, and General Literature, 1842 Disease and Mortality in Sub-Saharan Africa Dean T. Jamison, 2006-01-01 Current data and trends in morbidity and mortality for the sub Saharan Region as presented in this new edition reflect the heavy toll that HIV AIDS has had on health indicators leading to either a stalling or reversal of the gains made not just for communicable disorders but for cancers as well as mental and neurological disorders
