**Contrast-Enhanced Ultrasound of Liver Diseases** L. Solbiati,A. Martegani,E. Leen,J.M. Correias,P.N. Burns,D. Becker,2012-12-06 In the last few years the development of sonographic contrast agents or microbubbles has stimulated increasingly intensive studies on the relationships between ultrasound and contrast media As a result contrast specific hardware and software systems have been introduced by different ultrasound manufacturers with impressive speed This has

finally led to the birth of a very new imaging modality contrast enhanced sonography CEUS Since 1999 the introduction of second generation contrast agents has represented a decisive step towards the extensive clinical use of CEUS and has simultaneously made obsolete most if not all scientific publications available so far This book is to our knowledge the first to deal entirely with second generation contrast agents and the most updated contrast specific software for noncardiologic uses The reasons why the liver has been chosen as the only target of the book are easily understandable by radiologists and hepatologists alike The study of vascularity is the only purpose of CEUS and the liver has a unique vascular system with two different inflow systems resulting in a single outflow Furthermore the pathologically different focal liver lesions FLLs are mostly characterized by different models of vascularity CEUS can mimic contrast enhanced computed tomography and magnetic resonance imaging basing differential diagnosis on the morphological and temporal characteristics of enhancement but with the additional unique advantage of the study being done in real time

**Vox Petri** Gene L. Green,2019-11-12 Peter stands at the beginning of Christian theology Christianity's central confessions regarding the person of Jesus the cross salvation the inclusive nature of the people of God and the end of all things come to us through the apostle who was not only the church's leader but also its first theologian Peter is the apostle for the whole church and the whole church resonates with his theology We sing his song though we may not have glanced at the bottom of the page in the hymnbook to see who wrote the words and composed the tune Peter is the lost boy of Christian theology a person overlooked as a theological innovator and pillar but his rightful place is at the head of the table If we look closely however we may recognize that he has been seated there all along

**The Braided Dream** Randolph Paul Runyon,2014-07-15 Robert Penn Warren's reputation as a poet though always considerable has soared in the last decade as indicated by his recent selection as America's first poet laureate The Braided Dream is one of the first book length studies of the poetry that has led to Warren's recent rise to eminence and the first to consider his final collection Altitudes and Extensions In a communicable jargon free style that will appeal to the nonacademic reader as well as the serious scholar Randolph Paul Runyon provides a detailed and illuminating guide to a body of poetry that despite its greatness has until now seemed resistant to full understanding Every poem of Warren's last four sequences Now and Then Being Here Rumor Verified and Altitudes and Extensions is given a close reading with a precise laying out of words phrases and recurring images that not only enrich the texture of the poetry but are themselves the texture Runyon demonstrates the relevance of Freud's concept of the dream work of the unconscious to a reading of this tightly interwoven poetry He shows how Warren's poems assume additional meanings by the poet's very arrangement of them deepening his thesis by arguing that poems eat poems as each reuses and reconceptualizes the imagery of its predecessor frequently with ironic or parodic effect

**Echocardiology** N. Bom,2012-12-06 Echocardiology comprises all aspects of diagnostic application of ultrasound to cardiac patients It is probably the fastest growing non invasive technique today Almost all progress in this young and exciting field has been the positive result of close co operation

between medical and technical scientists This book contains a series of lectures held at Erasmus University Rotterdam in June 1977 and is divided in three sections clinical echocardiology consisting of both an introduction to the basic principles as well as a wide variety of applications aimed at the clinically oriented reader Doppler methods where in addition to its clinical applications also the engineering of new developments will be presented the two dimensional real time imaging where many new techniques including computer methods holography and acousto optical systems will be discussed We hope that this book will stimulate communication between scientists of various disciplines and nationalities N Bom J Roelandt P G Hugenholtz Rotterdam June 1977

III Preface The last three decades have seen a remarkable advance in diagnostic instrumentation in diseases of the circulation In the 1940 s the only diagnostic aids were the electrocardiogram and simple X ray These were quickly followed by the cardiac catheter phonocardiography radio isotope methods and angiocardiology The development of cardiac surgery provided the impetus to developing more accurate methods of diagnosis preferably those that did not need invasion of the patient The introduction of ultrasound has contributed towards this aim in the last few years

**The Science/Fiction of Sex** Annie Potts, 2014-02-25 What can we learn from exploring the differences in male and female orgasmic experience Is the penis an entity with a mind of its own These issues and others such as the popular portrayals of male sexuality as active and outwardly focused and female sexuality as passive and internally located are discussed in *The Science Fiction of Sex* Contemporary feminist and poststructuralist theories of sex and gender are explored alongside an investigation of how people make sense of such concepts as heterosexuality orgasm sexual dysfunction femininity and masculinity and safer sex practice Potts asks men and women about their actual experiences of heterosex This interview material combined with excerpts from sexological and medical texts and features from film and television draws attention to the ways in which western cultural constructs influence our ideas and experiences of the body sex and gender Potts also uses deconstructive theory as a textual tool concentrating on how binary oppositions such as inside outside and mind body impact on our understandings of heterosex and affect the power relations between women and men She also examines how the radical postmodern theories of the body and sexuality proposed by Irigaray Lyotard and Deleuze and Guattari disrupt such dualistic modes of understanding and experiencing sexualized bodies *The Science Fiction of Sex* will be of interest to those studying women and psychology as well as gender studies cultural studies feminist studies sociology philosophy public health and education

*Commentary on Matthew (Commentary on the New Testament Book #1)* Robert H. Gundry, 2011-11-01 Delve Deeper into God's Word In this verse by verse commentary Robert Gundry offers a fresh literal translation and a reliable exposition of Scripture for today's readers The Gospel of Matthew highlights Jesus messiahship and divine sonship Matthew defines faithfulness in terms of Christian behavior and verbal testimony and warns against unfaithfulness by accenting its eternal consequences Pastors Sunday school teachers small group leaders and laypeople will welcome Gundry's nontechnical explanations and clarifications And Bible students at all levels will appreciate his sparkling

interpretations This selection is from Gundry's Commentary on the New Testament      Handbook of Contrast Echocardiography Harald Becher, Peter N. Burns, 2012-12-06 Although the technology required for the successful application of contrast echo cardiography has evolved rapidly over the past few years the technique has not yet gained widespread clinical acceptance One important reason for the lack of clinical acceptance is the relative complexity of the technique particularly in respect to myocardial perfusion imaging The interaction between micro bubbles and ultrasound is an entire field by itself as is the coronary microvasculature It is in this regard that practicing echocardiographers cardiologists in training radiologists so no graphers and students will find *A Handbook of Contrast Echocardiography* particularly useful Written by two leaders in the field who have presented illustrative cases not only from their own laboratories but also from others around the world this volume is a lucid concise and practical guide for the day to day use of contrast echocardiography Dr Peter Burns has been involved in almost all the technical advances in the imaging methods that have made it possible to detect opacification of the left ventricular cavity and myocardium from a venous injection of microbubbles He has been responsible to a large degree for advancing our understanding of the interaction between micro bubbles and ultrasound which he describes in clear and easy to understand terms in this book Dr Harald Becher has been active in the clinical application of contrast echocardiography for several years and has gained considerable experience with many imaging techniques and microbubbles which he describes in this volume in some detail      *Echoes of Redemption* Charles L. Moore, 1893      **Making Christ Present in China** Michel Chambon, 2020-10-24 An anthropological theorization of the unity and diversity of Christianity this book focuses on Christian communities in Nanping a small city in China It applies methodological insights from Actor Network Theory to investigate how the Christian God is made part of local social networks The study examines how Christians interact with and re define material objects such as buildings pews offerings and blood in order to identify the kind of networks and non human actors that they collectively design By comparing local Christian traditions with other practices informing the Nanping religious landscape the study points out potential cohesion via the centralizing presence of the Christian God the governing nature of the pastoral clergy and the semi transcendent being of the Church      *Lies Like Truth* Arthur F. Kinney, 2001 Kinney proposes a new way of reading this period's texts drawing us closer to the way dramatic plays such as *Macbeth* were understood from early modern times to beyond today's technological revolution In the course of this inquiry he seeks to determine whether the 1623 text of *Macbeth* that we now have is anything like the original 1606 performance
