What we re trying to do with this book is help the hunter to have another option that option is to call in someone nearby with a trained blood tracking dog **YOU** These dogs can find deer that human hunters might walk right by They are able to scent trail deer even when there is no blood at all to follow A trained tracking dog can lead its handler to a deer even several days after it was shot And that is what this book is all about getting you started on training a dog that can cut your deer tracking time in half and increase your recovery rate by 80 or 90 percent Basically training almost any dog to blood trail is simple It s so simple in fact that I can sum it up in just a few paragraphs You don t have to own a hound to train your own tracking dog Any breed with the nose to follow a trail can be trained I have seen everything from labs to Jack Russell terriers to dachshunds trained to trail deer I personally have a black lab named Tilly and a heeler shepherd mix named Diamond Cut In short you would start out your training by making a game of it You could use a strip of bacon or a piece of calf liver tied to a string as your first scent marker To make sure the dog is following the calf liver or bacon scent and not yours tie the string to the end of a long pole to drag it well away from your own scent trail As your dog become more adept at following the trail you should start to make it more difficult by hopping the calf liver or bacon strip along the ground and lifting it for several feet between touches Getting your dog fully trained to blood trail takes a lot of time and patience But knowing how to get the dog motivated to track and

stay with the right line from the beginning really pays off when working with hunters to recover their harvest The best teacher is time spent with the dog and a lot of it Time spent in the field tracking through the season and training the rest of the year This is what it takes to form a bond And that bond is strengthen and reinforced in life s journey with your blood trail dog If I gave you no more information than what s above you would have enough to get your dog started with blood trailing But in reality there is a lot more to be learned about tracking with a dog So let s get started now to build a complete training course for your new blood trailing student

The Buck that Buries its Poo Quinton Coetzee,2023-05-29 Is a zebra black with white stripes or white with black stripes And why do flamingos stand on one leg while bats hang upside down Did you know that a chameleon s tongue can shoot out at five times the acceleration of a fighter jet In The Buck That Buries its Poo naturalist Quinton Coetzee answers these and many other intriguing wildlife questions He also dispels countless myths and elucidates some of the legends that surround creatures in the South African bush we thought we knew all about For example bats do not get tangled in people s hair because they are far too adept at flying and elephants are not afraid of mice but they do fear bees Other tall tales you might hear around the campfire are that lions roll in animal dung entrails or carcasses to disguise their scent and that rhinos have a predilection for stamping out fires What is true though is that hyenas are more closely related to cats than to dogs This handy guide is based on Coetzee s own research and that of others and his experience gleaned over decades living close to nature and wildlife It seeks to unravel the mysteries of nature in Africa from mammals and birds to arthropods and plants with fascinating information and fun trivia It is a book that will enlighten and entertain PS Zebras are black with white stripes

Scents Jürg Singer, Dr. Rainer Schneider, 2016-06-16 Scents play a much greater role in our daily lives than most people would assume. In fact, the sense of smell is in many ways very fascinating. When properly applied, scents and aromas may calm or activate, balance or invigorate. There is almost no experience which cannot be enhanced by the application of scents. In this compactly written E-Book, you will learn what really matters when it comes to the use of scents. Another main objective of this book is to introduce a new aromatherapeutic method which can readily be used no matter what the circumstances. The authors also provide sound scientific evidence of this effective and ingenious method. In plain words, they outline how this method works and how mind and body can be effectively influenced.
