Keys A. Palladino, 2011-08-11 Keys is an exploration of thought A sometimes cerebral look at

the taboos of humanity and the attributes that make us who we are The beautiful and the ugly sides of being human It is a sometimes hard to accept look at the psychological conditions we all share and fight to keep in check In our society we have made even the thought of some acts taboo Some inspiration has come from current events but most come from a mind let loose to wander and explore these forbidden thoughts and fantasies Much inspiration came from disgust in myself and of what we call humanity Even in these I hope the reader will find some hope and solace There is an underlying sense that we acknowledge these shortcomings and in that change On the lighter side there are brief bits of humor and irony along with purely fantastic muses sparked from a single untamed thought From the dramatic imagery to the ethereal you will be taken to the edge of sanity and move beyond what is comfortable and be urged to take a closer look at who we are as individuals and as a people

Harnessing the Technicolor Rainbow Scott Higgins, 2009-02-17 Like Dorothy waking up over the rainbow in the Land of Oz Hollywood discovered a vivid new world of color in the 1930s The introduction of three color Technicolor technology in 1932 gave filmmakers a powerful tool with which to guide viewers attention punctuate turning points and express emotional subtext Although many producers and filmmakers initially resisted the use of color Technicolor designers led by the legendary Natalie Kalmus developed an aesthetic that complemented the classical Hollywood filmmaking style while still offering innovative novelty By the end of the 1930s color in film was thoroughly harnessed to narrative and it became elegantly expressive without threatening the coherence of the film's imaginary world **Harnessing the Technicolor Rainbow** is the first scholarly history of Technicolor aesthetics and technology as well as a thoroughgoing analysis of how color works in film Scott Higgins draws on extensive primary research and close analysis of well known movies including *Becky Sharp* *A Star Is Born* *Adventures of Robin Hood* and *Gone with the Wind* to show how the Technicolor films of the 1930s forged enduring conventions for handling color in popular cinema He argues that filmmakers and designers rapidly worked through a series of stylistic modes based on the demonstration restraint and integration of color and shows how the color conventions developed in the 1930s have continued to influence filmmaking to the present day Higgins also formulates a new vocabulary and a method of analysis for capturing the often elusive functions and effects of color that in turn open new avenues for the study of film form and lay a foundation for new work on color in cinema
