Blue Justice:

Blue Justice Svein Jentoft, Ratana Chuenpagdee, Alicia Bugeja Said, Moenieba Isaacs, 2022-03-07 For small scale fisheries around the world the Blue Growth and Blue Economy initiatives may provide sustainable development but only insofar as they align with the global consensus enshrined in the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries in the context of Food Security and Poverty Eradication If states do nothing to fulfill the promises they made when they endorsed these guidelines in 2014 the Blue Economy will come at a loss for small scale fisheries and further their marginalization in the ocean economy Under the umbrella of Blue Justice this book demonstrates that these risks are real and must be considered as states implement their sustainable ocean development plans These are human rights issues which are embedded into governance principles and institutions and which make a difference for small scale fisheries people in their daily lives In stressing the importance of policies and institutions that build on the experiences of small scale fisheries people in the contexts in which they operate this book draws on case studies of small scale fisheries from countries on all continents to clarify what Blue Justice entails for small scale fisheries and make suggestions for real change Through the Blue Justice paradigm this book flags the relevance of recognizing the potential impact that different factors including the Blue Economy approach could bring to fishing communities their livelihoods cultural traditions and other potential multidimensional conflicts Vulnerability in fishing communities can increase and inequalities can be reinforced at different levels if individuals and community capabilities are not strengthened A first of its kind not to be missed this book is informative purposeful and pertinent in an era of change Silvia Salas CINVESTAV Marine Resources Department Mrida Mexico The studies reveal that Blue Justice is a governability issue which requires establishing right institutions that are transdisciplinary integrated participatory and holistic It is implicit from these writings that the SSF Guidelines and Blue Growth initiatives do not form two different discourses and that the implementation of the former would resolve many of the justice issues caused by the latter in favor of small scale fisheries and their communities Oscar Amarasinghe Professor Chancellor Ocean University of Sri Lanka and President Sri Lanka Forum for Small Scale Fisheries SLFSSF

Global Challenges in Maritime Security Lisa Otto, Anja Menzel, 2024-10-22

Achieving sustainability is perhaps the single most important task for our generation In the face of a looming climate disaster calls for the sustainable use of the world s resources are getting louder As the sea covers more than 70 per cent of the earth s surface this holds even more true for the use of ocean resources Despite its vastness the sea has often been a securitised and politicised space where the concepts of sustainability and security meet at sea in the form of a myriad of important contemporary issues In this volume we set out the intersection between sustainability and security alongside the security development nexus and examine these issues under four dimensions of security economic security ecological security human security and traditional security Within sections dedicated to each of these we explore both theory and practice by offering cases alongside a conceptual discussion and in so doing cover topics ranging from the Blue Economy and the net zero agenda to natural disasters and climate change from food security and the future of Small Island Developing States to the geopolitics of the Arctic This book takes a bird s eye view connecting the dots between these issues of security and sustainability and ending with scenarios for the future with policy making in mind This volume presents a timely and compelling argument that policymakers and scholars need to come to terms with the intersection of sustainability and security at sea The editors detail a clear and insightful conceptual approach for grasping the simultaneity and interplay of security and sustainability concerns that will give inspiration to further research in the field Chapter contributors convincingly illustrate aspects of this approach across regions scales and sites of political engagement from port cities to the UN A must read for students researchers and practitioners of ocean politics
