Borobudur International Symposium on Humanities and Social Science 2022 (BIS-HSS 2022) Zulfikar Bagus Pambuko, Muji Setiyo, Chrisna Bagus Edhita Praja, Agus Setiawan, Fitriana Yulastuti, Lintang Muliawanti, Veni Soraya Dewi, 2023-10-10 This is an open access book Related to the big theme of the SDGs reinforcement at our previous conference we try to invite all

academics and researchers around the world to participate in the 4th Borobudur International Symposium 2022 4thBIS 2022 As we know the COVID 19 pandemic and its impact on all the 17 SDGs have demonstrated how what began as a health catastrophe swiftly transformed into a human socioeconomic and environmental crisis The 4th BIS brought up The Innovation Chain A Contribution to Society and Industry as the main theme to respond this condition This conference is expected to support the UN Agenda Additionally this conference will also provide avenues for participants to exchange ideas and network with each other as well as domain experts from their fields Overall this event is aimed at professionals across all spheres of technology and engineering including the experienced inexperienced and students as well The conference will be held virtually on Wednesday December 21st 2022 in Magelang Central Java Indonesia Funny Business Jeffrey Cooley Jr.,2012-10-04 Funny Business The Simple Truth About Money is an extraordinary educational read for children This book manages to effectively simplify some of the technical concepts of business and finance that affect each of us within our day to day interactions The author thinks it important to give our children of today a resource that they can use for pre exposure to fundamental financial concepts It is important to note that throughout the last 6 years of economic adversity and financial crises people have opted to speak out about the elephant in the room that was once commonly ignored during more favorable economic times Ladies and gentlemen that elephant in the room is financial literacy Today people are questioning business credit economics investment and cost inflation Well this book provides a proactive approach to financial education by simplifying these concepts for our children so that they don't seem so unfamiliar when they become adults If we've ever considered the future of our children important then we have to come to terms with the fact that literacy is not limited to appropriate sentence structure or the mastery of a particular language Literacy also involves business economics and finance This book is a great resource for children ages 7 and up but even adults may think these concepts to be important in an open market economy Instilling financial education requires that someone take the time to explain and this book's author does just that within 6 chapters of explanations and examples that are designed to encourage practical application Why wait

More specifically, it o Provides a comprehensive set of methods for water footprint assessment o Shows how water footprints can be calculated for individual processes and products as well as for consumers, nations, and businesses o Contains detailed worked examples of how to calculate green, blue, and grey water footprints o Describes how to assess the sustainability of the aggregated water footprint within a river basin or the water footprint of a specific product o Includes an extensive library of possible measures that can contribute to water footprint reduction

Kuldja Eugene Schuyler, 2024-06-18 Reprint of the original first published in 1876 **Movie Monsters of the Deep** Faith Roswell, 2024-07-30 Is there a shark movie that is scarier than Jaws? What is the sneaky secret hidden in the Loch Ness monster's name? How did the Gill man in Creature from the Black Lagoon become a romantic hero? Do mermaids count as sea monsters? What terrifying sea creature was discovered to really exist and just what on earth is a globster? From Kraken to kaiju, Open Water to The Shallows, monsters of the deep have fascinated and horrified us for centuries. There's even a name for the fear of deep bodies of water: thalassophobia. Humans have a natural fear of predators in the water, and yet we just can't stop thinking about them. There are a lot of deep water monster movies out there: good, bad, strange, and so bad it's good. This book has collected some of the best, worst, and most interesting out there to tell you about. If you ever wanted to know your crocodile from your Cthulhu and find out how they make the monsters come alive, whether you like your monsters in the ocean or in lakes based on real animals or totally made up with fins or tentacles, one head or five, if you love your movie monsters of the deep, then this book was written for you.
