G. Zerilli,2025-04-25 A critique of the concept of truth presupposed by the post truth debate and a bold new vision for a more pluralistic citizenry We say that we live in a post truth era because disinformation threatens our confidence in the existence of a shared public world Affirming objective truth may therefore seem necessary to save democracy According to political theorist Linda M G Zerilli such affirmation can stifle political debate and silence dissent In fact Zerilli argues that the unqualified insistence on objective truth is as dangerous for democracy as denying it Drawing on Arendt Foucault and Wittgenstein A Democratic Theory of Truth challenges the concept of truth presupposed by the post truth debate It argues

that we the people have an essential role in discovering and evaluating any truth relevant to the political realm The result is a striking defense of plurality dissent and opinion in contemporary democratic societies

The Truth about Self sanjeev sareen, 2023-03-26 Noble award for physics year 2022 Science has proved that the world is not real New discoveries are turning scientists into philosophers God has shifted His position from an extra terrestrial heaven to the inner realm of human psyche What was once explained in terms of divine creation is now in the purview of science Now both science and Scriptures say that We create the world Our own reality with Our own ego desires mind and intellect It cannot thus be said to be the absolute reality Remember our five senses are not our only means of knowledge A fragment of reality sometimes reaches the intelligence in other ways which we are normally not aware of Note that our reality is not the ultimate reality Only we choose and observe it to be our reality Whatever we are experiencing out there in the physical world is finally the experience of consciousness itself As soon as we realize our own observation is the cause of everything then we can decide to create another reality literally Reality and truth are often misunderstood to convey the same meaning but strictly speaking they are not so If we analyze these two words carefully we can notice a subtle difference between them Truth is always real Reality is not always true We need to know the truth which is through actual experience Without realization they are just ideas Truth is within The ultimate truth about Self after knowing which nothing remains to be known is a subject of search and research reasoning and reflection discussion and decision and finally testing and experiencing it within Every advance in knowledge brings us face to face with the mystery of our own being This book is dwelling at length from scientists stand point as to how they say that the realities perceived at all the senses levels are illusions only This book finally throws light on what is The Reality and what is The Truth and at what platform it can be and must be perceived to get spiritual liberation and inner peace Quite a number of mind blowing concepts theories are also given here with few not even researched yet The hidden Truth you are told in this Spirituo scientific exploration will be of spiritual self help nature Finally since it is all about us our own higher dimensions only which normally we are not privy to it is a must read book for everyone and anyone for rising above sufferings of life and quicken our roller coaster journey of life through incarnations
