Blue Dog:

What Color Is Your Dog? Joel Silverman, 2011-07-19 This exciting dog training book is based on the original techniques of Hollywood dog trainer and Animal Planet's Good Dog U host Joel Silverman. In *What Color Is Your Dog*, Silverman presents his groundbreaking color coding technique developed over his thirty-year career training dogs for film, television, and commercials, as well as working with killer whales in Sea World. By determining what color is an owner's dog, he is able to recognize and then enhance his dog's behavior following the techniques outlined in the book. Silverman's advice for new puppy owners is to develop a strong trusting relationship with their puppies in their first thirty days. He shuns traditional concepts of beginning the puppy's lessons as soon as the puppy comes home; instead, he proposes that new owners spend time having fun building trust and enjoying the first month of the relationship. By increasing the dog's trust and like of his owner, the dog becomes more willing and eager to please and work with his owner/trainer. The main gist of the book comes from Silverman's color system, in which five basic canine personalities or temperaments are assigned colors. With the descriptions of the five colors in hand: Blue, a fearful rather skittish type dog; Green, a more or less bashful pooch; Yellow, the ideal easygoing companion dog; Orange, excitable but relatively under control dog; and Red, the hyper-high-strung dog that bounces off the walls as soon as bark, an owner is able to determine which color best matches his dog's temperament and approach the dog's lessons accordingly. The dog owner's goal then is to move his dog as close to the middle of the color spectrum (Yellow) as possible by using the training practices outlined in the book. Silverman devotes a full chapter to each of the five colors, explaining what makes each color type tick and how owners should best handle such a dog. The second half of the book focuses on training tools and techniques and teaching specific cues: sit, stay, come, and no. There is also a chapter for the puppy owner giving helpful advice on special techniques to use for puppies.

Haunted USA Heather Alexander, 2025-08-05 We've got spirits, yes, we do. *Haunted USA* is a terrifying treasure trove of supernatural scares from each of the 50 states, from the vengeful witch of New Hampshire, Goody Cole, to Missouri's unlikely icon, Momo, the swamp monster. In this illustrated compendium drawing on fact, folklore, mythology, and urban legend, you'll shine a light on ghosts, ghouls, cryptids, and even a haunted carousel. Some tales will give you chills, like that of Rue, the unfortunate daughter of an Oregon lighthouse keeper who even today wanders the forlorn tower's guest rooms, while others, like the friendly ghost of Dr. Justina Ford, who guides visitors around her old Colorado home, prove that some phantoms still hold on to that friendly American spirit. Some are downright strange. Have you ever heard of the chocolate-loving ghost of Iowa or Delaware's specter who can't stand sneezing? Still others are older than the USA itself, from Hawaii's Night Marchers to the ancient Sleeping Buffalo Rock of Montana, which may not be quite so asleep after all. When you've read all you can handle, turn to the back of the book for a glossary of ghoulish terms and even expert advice on going ghost hunting yourself. Whether you're after a campfire fright, a slice of local lore, or a traditional tale to sink your teeth into, *Haunted USA* is a rich anthology from the land

Reconciling Art and Technology

Subrata Dasgupta, 2024-05-14 This book examines two venerable cultures art and technology and uses the young interdisciplinary of cognitive history combined with case studies of both ancient and modern artifacts to explore and unveil some of the bridges by which this reconciliation of two seemingly distant and oppositional cultures can be effected Art and technology are commonly regarded as oppositional While both are concerned with made things artifacts and both have their origins in pre literate antiquity the primary purposes they are intended for are quite distinct the artifacts of technology serve utilitarian purposes while those of art serve affective needs This opposition between art and technology notably argued by such scholars as Lewis Mumford and George Kubler is challenged in this book For when we consider art and technology as creative phenomena then many significant interesting and often subtle commonalities emerge whereby a reconciliation a unity of these two great cultures seems possible This book utilizes case studies of both ancient and modern artifacts ranging from the Nataraja sculpture of ancient India a great astronomical clock of ancient China and Japanese Samurai swordmaking through Gothic cathedrals and Renaissance paintings of Europe to English Elizabethan machinery to the French Impressionists to modernist concrete structures and paintings in both East and West This book will be of interest to students and professional scholars interested in the histories of art and technology cultural history and creativity studies
