Green Fashion and Sustainability Dr. Sumita Sikka, 2024-01-09. The rising heaps of garbage in urban and rural settlements is a point of concern all across the globe. Thus there is an incessant need to shift the focus to an intricate web of green fashion and sustainability. With its focus on cutting edge technologies and environmentally conscious practices, the book positions itself at the forefront of the evolving landscape of sustainable fashion enterprises. The 15 enlightening chapters contributed by diverse academicians unveil the multifaceted challenges and opportunities inherent in the pursuit of environmentally responsible fashion. Innovative approaches such as zero waste design techniques, upcycling and the rising prominence of thrift stores in India are explored. The collective narrative underscores the urgency of the green fashion movement and the industry's moral obligation to embrace sustainable practices. The book opposes the use and throw approach of consumerism, especially concerning clothing and packaging, and it advocates a careful reevaluation of consumer behavior to bring in ecologically friendly and sustainable techniques. The book is aimed to serve as a compelling resource for academicians, professionals and enthusiasts alike. It not only provides valuable insights into the challenges and opportunities within sustainable fashion but also acts as a catalyst for innovative thinking among emerging fashion professionals.
