Everyday Evils Coline Covington, 2017-01-20 *Everyday Evils* takes a psychoanalytic look at the evils committed by ordinary people in different contexts from the Nazi concentration camps to Stockholm Syndrome to the atrocities publicized by Islamic State and presents new perspectives on how such evil deeds come about as well as the extreme ways in which we deny the existence of evil Concepts of group behaviour morality trauma and forgiveness are reconsidered within a multidisciplinary framework The psychodynamics of dissociation and the capacity to witness evil acts while participating in them raise questions about the origin of morality and about the role of the observing ego in maintaining psychic equilibrium Coline Covington examines how we demonize the other and how violent actions become normalized within communities such as during the Rwandan genocide and Polish pogroms The recent attraction of the millenarian theocracy of the Islamic State also highlights our fascination with violence and death Covington emphasizes that evil comes about through a variety of causes

and is highly contextual It is our capacity to acknowledge the evils we live with witness and commit that is vital to how we manage and respond to violence within ourselves and others and in mitigating our innate destructiveness In conclusion the book addresses how individuals and societies come to terms with evil along with the problematic concept of forgiveness and the restoration of good Everyday Evils blends psychoanalytic concepts together with the disciplines of sociology history anthropology philosophy theology and studies of violence in order to develop a richer deeper and more comprehensive understanding of evil Intending to make the unthinkable thinkable this book will appeal to scholars from across those disciplines as well as psychoanalysts psychotherapists and anyone who has ever asked the question How could anyone do something like that *Protection of Children During Armed Political Conflict* Charles W. Images, Representations and Heritage Ian Russell, 2006-11-24 Recent archaeological theory has shown that images of the past have carried a particularly strong resonance within modern social groups This volume explores the immeasurable impact that the phenomenon of archaeology has had on the representation of the past in the modern world Modern society's archaeological imagination conceives of archaeology as a producer of images of the past which become representations of modern group identities If archaeology is utilized by public groups to construct and represent identities then what are archaeologists to do with that public The very fact that the public is interested in the past and in archaeological research is an opportunity for archaeology to engage that public Participation in the public's modern interest in archaeology however puts archaeology at risk The growing role of archaeology and heritage within the economics of tourism has led to a commodification of archaeological knowledge and experience for consumption This volume begins a discourse on the implications of performing archaeology in a world dominated by modern trends of mass production mass replication and representation of cultural forms and mass consumption of images of the past The contributors explore to what extent we are experiencing a crisis of representation of the past due to contemporary consumption of mass produced replicas simulations images and experiences of the past To work through this crisis the contributors in this volume are exploring opportunities for development within archaeological thought and practice Their arguments illustrate a move towards active participatory and poetic archaeological thought and practice Rather than focusing on what is produced through process artifacts monuments interpretive centers etc they are concerned with what they are doing about taking part about participating reflexively in the tradition of understanding and expressing understanding of the past This volume does

not conjure up romantic beliefs about the project of archaeology but rather it signals a fundamental revision of archaeology not what it is but what it can do
