Film, Theory and Philosophy Felicity Colman, 2014-12-05 Philosophy and in particular continental philosophy has provided a conceptual underpinning for cinema since its beginnings especially in the development of cinematic aesthetics In its turn film has rethought the abstractions of space and time and the categories of sex and gender and has created new concepts which illuminate phenomenology metaphysics and epistemology Film and Philosophy brings together leading scholars to provide a detailed overview of the key thinkers who have shaped the field of film philosophy The thinkers include continental and post continental philosophers analytic philosophers film makers film reviewers sociologists and cultural theorists The essays reveal how philosophy can be applied to film analysis and how film can be used to illustrate philosophical problems But more importantly the essays explore how film has shaped what philosophy thinks and how philosophy has lead to a reappraisal of film The book will prove an invaluable reference and guide to readers interested in a deeper understanding of the issues and insights presented by film philosophy Film and Philosophy

Making Theory/Constructing Art Daniel Alan Herwitz, Daniel Herwitz, 1996-05-15 Artists and critics regularly enlist theory in the creation and assessment of artworks but few have scrutinized the art theories themselves Here Daniel examines and critiques the norms assumptions historical conditions and institutions that have framed the development and uses of art theory Spurred by the theoretical claims of Arthur Danto a leader in the philosophy of the avant garde Herwitz reexamines the art and theory of major figures in the avant garde movement including John Cage Jean Francois Lyotard Jean Baudrillard and Andy Warhol

Conspiracy Theories and the People who Believe Them Joseph E. Uscinski, 2019 Conspiracy theories are inevitable in complex human societies And while they have always been with us their ubiquity in our political discourse is nearly unprecedented Their salience has increased for a variety of reasons including the increasing access to information among ordinary people a pervasive sense of powerlessness among those same people and a widespread distrust of elites Working in combination these factors and many other factors are now propelling conspiracy theories into our public sphere on a vast scale In recent years scholars have begun to study this genuinely important phenomenon in a concerted way In *Conspiracy Theories and the People Who Believe Them* Joseph E Uscinski has gathered forty top researchers on the topic to provide both the foundational tools and the evidence to better understand conspiracy theories in the United States and around the world Each chapter is informed by three core questions Why do so many people believe in conspiracy theories What are the effects of such theories when they take hold in the public What can or should be done about the phenomenon Combining systematic analysis and cutting edge empirical research this volume will help us better understand an extremely important yet relatively neglected phenomenon

Making Theory/Constructing Art Daniel Herwitz, 1993-11 Artists and critics regularly enlist theory in their creation and assessment of artworks but few have scrutinized the art theories themselves *Making Theory Constructing Art On the Authority of the Avant Garde* is among the first philosophical texts to provide a close encounter with this theoretical tendency in twentieth century art and aesthetics exploring the norms assumptions historical conditions and institutions that have framed the development and uses of theory in art In a series of intricate readings of constructivism Mondrian and John Cage Daniel Herwitz outlines the avant garde s belief that theory can perfectly prefigure the avant garde art object and invest it with utopian force Through similarly insightful treatments of Arthur Danto Andy Warhol Jean Francois Lyotard Jean Baudrillard and postmodern art and theory Herwitz demonstrates how the contemporary art world is heir to the avant garde s theoretical assumptions and practices In fact avant garde art objects live as art only by partly resisting the

master theories of their makers and interpreters Skillfully resisting the lure of grand theory himself Herwitz urges the art world to be more self critical and self reflective about its uses of theory Making Theory Constructing Art is as accessible and entertainingly written as it is philosophically incisive Since the book is both a philosophical and a cultural encounter with theory in twentieth century art it will engage all those who have tried to grapple with the inscrutability of the theoretical art muse Theories and Models in Scientific Processes William E. The Method of Response Function in Psychology & Sociology Irina G. Malkina-Pykh,Y. A. Pykh,2013 Social psychological and sociological systems present considerable difficulties for modellers due to their complexity multidimensionality uncertainty and irreducibility The book proposes that response functions MRF be used as a method of constructing purposeful credible and integrated social systems models from data and prior knowledge or information A semi empirical or grey box MRF model may be regarded as a trade off between a knowledge based model and a black box empirical model It may embody all the existing knowledge on the process or a part thereof and in addition it relies on parameterised functions whose parameters are determined from measurements Observations contain hidden information on the processes under consideration and one of the main purposes of the proposed method is to extract and describe these hidden relationships Parameterisation offers ways to couple qualitative with quantitative analysis This combination makes it possible to take into account all the phenomena that are not modelled with the required accuracy through prior knowledge Although only a simplified picture of the processes is modelled a grey box system model provides some insight into the system processes These processes are featured by chains of causality highlighting stressors and variables responsive to stressors The method of response functions is a nonlinear regression method that implies credible models in the sense that they are identifiable and hopefully explain system output behaviour satisfactorily For case studies the authors have selected the problems usually studied by psychologists and sociologists with statistical procedures such as investigation of variance and discriminant analysis based on the general linear model or one of its multivariate generalisations structural equation models etc disordered eating and obesity subjective well being and alexithymia An accompanying CD ROM contains the demonstration

versions of three models that are discussed in the various chapters The Method of Response Functions in Psychology and Sociology is aimed at Mathematical Psychologists Mathematical Sociologists Applied Psychologists Sociologists and Social Practitioners It will also be suitable for use on undergraduate as well as graduate and postgraduate courses specializing in these areas *Psychotherapy of the Combat Veteran* Harvey J. Schwartz, 2012-12-06 AN OVERVIEW OF THE PSYCHOANALYTIC APPROACH TO THE WAR NEUROSES The survivors of traumatic events have long been known to suffer psychological sequelae Of all possible stressors combat is one of the most devastating Wartime exposes its victim to a myriad of stimuli that are far beyond those of civilized life The impact that remains can affect generations to come In recent years there has been a paucity of research on the long term effects of battle Particularly after the recent war there was initially an inclination to minimize the psychological impact of combat It was only after concerted effort by a few dedicated clinicians that formal recognition was granted to the current version of the war neuroses In the parlance of the day it was called the Post traumatic Stress Disorder Figley 1978 This phenomenologic diagnosis has been instrumental in bringing the necessary attention to this condition Its applicability has been tested across a wide range of stressors from man made to natural Few workers in the field now doubt the power of traumatic events to leave a profound impression on the victim Contrary to previous thought it has now been found that this imprint often becomes a chronic scar Copyright 1984 by Spectrum Publications Inc *Psychotherapy of the Combat Veteran* edited by H Schwartz
