Blue Estuaries:

The Blue Estuaries Louise Bogan, 1975 *The Tragic Life Story of Medea as Mother, Monster, and Muse* Jana Rivers Norton, 2019-11-13 This volume offers a critical yet empathic exploration of the ancient myth of Medea as immortalized by early Greek and Roman dramatists to showcase the tragic forces afoot when relational suffering remains unresolved in the lives of individuals families and communities Medea as a tragic figure whose sense of isolation and betrayal interferes with her ability to form healthy attachments reveals the human propensity for violence when the agony of unresolved grief turns to vengeance against those we hold most dear However metaphorically her life story as an emblem for existential crisis serves as a psychological touchstone in the lives of early twentieth century female authors who struggled to find their rightful place in the world to resolve the sorrow of unrequited love and devotion and to reconcile experiences of societal abandonment and neglect as self discovery *Chicorel Index to Poetry in Anthologies and Collections in Print* Marietta Chicorel, 1974 *Salt Intrusion, Tides and Mixing in Multi-Channel Estuaries* Anh Duc Nguyen, 2008-11-01 Multi channel estuaries such as the Mekong Delta in Vietnam and the Scheldt in the Netherlands have characteristics of both the river and the sea forming an environment influenced by tidal movements of the sea and freshwater flow of the river This study discusses a predictive analytical approach for salinity intrusion and discharge estimate in multi channel estuaries The new approach agrees with 1 D hydrodynamic models and observations indicating its applicability in practice It has successfully developed a new theory and a new equation to quantify tidal pumping due to ebb flood channel residual circulation and the related salt dispersion *Distribution and Abundance of Fishes and Invertebrates in Gulf of Mexico Estuaries* , 1992

Climate Change and Estuaries Michael J. Kennish, Hans W. Paerl, Joseph R. Crosswell, 2023-09-15 Climate change is having an increasing impact on coastal estuarine and marine environments worldwide This book provides state of the art coverage of climate change effects on estuarine ecosystems from local regional and global perspectives With editors among the most noted international scholars in coastal ecology and estuarine science and contributors who are world class in their fields the chapters in this volume consist of comprehensive studies in coastal estuarine and marine sciences climate change and coastal management and provide an extensive international collection of data in tabular illustrated and narrative formats useful for coastal scientists planners and managers Comprised of three sections 1 physical chemical aspects 2 biological aspects and 3 management aspects the book not only examines climatic and non climatic drivers of change affecting coastal estuarine and marine environments but also their interactions and effects on populations of organisms communities habitats and ecosystem structure and function Pulling together today s most salient issues and key literature advances for those concerned with coastal management it allows the reader to see across direct and indirect interactions among disciplinary and ecosystem boundaries *Climate Change and Estuaries* meets the research needs of climate scientists estuarine and marine biologists marine chemists marine geologists hydrologists and coastal engineers while students professors administrators
