All That Divides Us:

The Bias That Divides Us Keith E. Stanovich, 2021-08-31 Why we don't live in a post truth society but rather a myside society what science tells us about the bias that poisons our politics In *The Bias That Divides Us* psychologist Keith Stanovich argues provocatively that we don't live in a post truth society as has been claimed but rather a myside society Our problem is not that we are unable to value and respect truth and facts but that we are unable to agree on commonly accepted truth and facts We believe that our side knows the truth Post truth That describes the other side The inevitable result is political polarization Stanovich shows what science can tell us about myside bias how common it is how to avoid it and what purposes it serves Stanovich explains that although myside bias is ubiquitous it is an outlier among cognitive biases It is unpredictable Intelligence does not inoculate against it and myside bias in one domain is not a good indicator of bias shown in any other domain Stanovich argues that because of its outlier status myside bias creates a true blind spot among the cognitive elite those who are high in intelligence executive functioning or other valued psychological dispositions They may consider themselves unbiased and purely rational in their thinking but in fact they are just as biased as everyone else Stanovich investigates how this bias blind spot contributes to our current ideologically polarized politics connecting it to another recent trend the decline of trust in university research as a disinterested arbiter

Race Paul C. Taylor, 2013-04-29 In *Race A Philosophical Introduction* Second Edition Paul C Taylor provides an accessible guide to a well travelled but still mysterious area of the contemporary social landscape As in the first edition the book blends metaphysics and social philosophy analytic philosophy and pragmatic philosophy of experience In this thoroughly updated and revised volume Taylor outlines the main features and implications of race thinking while engaging the ideas of such important figures as Linda Alcoff K Anthony Appiah W E B Du Bois Michel Foucault Sally Haslanger and Howard Winant The result is a comprehensive but accessible introduction to philosophical race theory and to a non biological and situational notion of race The book unfolds in a sequence of five chapters each devoted to one of the following questions What is race thinking Don't we know better than to talk about race now Are there any races What is it like to have a racial identity And how important ethically is colorblindness On the way to answering these questions *Race* takes up topics like mixed race identity white supremacy the relationship between the race concept and other social identity categories and the impact of race thinking on our erotic and romantic lives The second edition's new concluding chapter explores the racially fraught issues of policing immigration and global justice and interrogates the thought that Barack Obama has ushered in a post racial age This volume is suitable for the

educated general reader as well as for students and scholars in ethnic studies philosophy sociology and other related fields
