OECD Trade Policy Studies Liberalisation and Universal Access to Basic Services Telecommunications, Water and Sanitation, Financial Services, and Electricity OECD, The World

Bank, 2006-10-26 This volume explores whether and how trade liberalisation can contribute to achieving universal service goals in telecommunications water and sanitation financial services and electricity and the types of complementary policies that may be required

Australian Telecommunications Regulation Alasdair Grant, 2004 Australian Telecommunications Regulation provides an accessible but comprehensive review of Australia's telecommunications regulatory framework

Written by experienced insiders it describes the laws and policies affecting competitors and consumers and the regulatory and self regulatory bodies that administer them The third edition features a new chapter on interconnection pricing and incorporates all recent legislative reforms and policy initiatives including those affecting the telecommunications competition regime and discusses recent key decisions of the ACCC and other agencies

Universal Service in WTO and EU law Olga Batura, 2015-10-07 This book is a systematic comparative study of WTO and EU law relevant for universal service provision and a timely contribution to the ongoing scholarly and policy debates about the concept and scope of universal service

Universal service is one of the most significant regulatory issues worldwide and it is likely to remain so The central question dealt with by the author is how the technologically intensive sector of telecommunications services can be regulated in a socially fair way in the light of liberalisation and the immense importance of ICTs in the Information Society The author investigates whether the legal frameworks of WTO and EU can meet the challenges of the rapid and dramatic technological and social change and formulates relevant policy recommendations The book is of interest to both scholars and practitioners in several disciplines such as EU and WTO law telecommunications law and regulation political science regarding market regulation and governance as well as European integration and WTO Olga Batura is affiliated to the Leuphana Law School University of Lüneburg Germany and to the European Humanities University in Vilnius Lithuania

The Future of Universal Service United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications and the Internet, 2003

Governance of Communication Networks Brigitte Preissl, Jürgen Müller, 2007-01-30 Few would doubt the potential of information technology to connect individuals firms and organisations Whether this will actually lead to the integration of markets and societies is a different issue The articles collected in this book shed light on crucial considerations for the success of global communication networks These include frameworks for regulation inclusion of customers in defining product and service strategies access to advanced technology and networks for all groups and more

Congress. House. Committee on the Judiciary,2000 Universal Service in a Competitive Local Exchange Telecommunications Environment Donald Gale,2006-05-22 The telecommunications industry has evolved into a very competitive industry since 1980 Aggressive competition is the norm in the long distance equipment operator services and many other segments of the industry The remaining segment of the market without widespread meaningful competition is the last mile wireline service to the customer premise Incumbent local exchange carriers enjoy a monopoly to serve nearly all residences and most business customers collecting over 99% of all local exchange service revenues Using their monopoly status incumbents have developed a cross subsidy system which uses the rates paid by some customers to lower the rates paid by others to support a policy known as universal service This policy has resulted in telephone service reaching 94% of America s households Carriers claim that this policy cost them 20 billion annually potential entrants claim the true cost is as low as 4 billion and the rest is profit In the Telecommunications Act of 1996 Congress ordered the end of the local exchange monopoly and opened the local markets to competition Congress also specified the continuation of universal service specified that telephone penetration should be increased and specified that the universal service concept will be applied to America s schools libraries and rural health centers Congress also specified that unlike today all carriers will contribute fairly and equitably fairly to the universal service fund and that all carriers providing local service including new competitors will be eligible to receive support from the fund The cost to meet these requirements in a competitive environment totals 7 2 billion or 5 1% of net carrier revenue This thesis addresses the definition of universal service and the services that should be eligible for support the new competitive environment how to collect the universal service support fund and how to best distribute the funds to customers targeted to receive support from the system those in high cost areas low income consumers and schools and libraries for advanced communications services USF Distribution United States.
