the period Drawing on current thinking about the eighteenth century from a range of disciplines the book examines such topics as social and gender identities colonialization and commercialization notions of the rural urban and suburban as well as issues of theory and historiography Canonical constructions of Georgian architecture are explored including current evaluations of the continental intellectual background the relationship with mid seventeenth century Stuart court classicism and the development of the subject in the twentieth century **Antiquarian Book Review** ,2002-07 The magazine for antiquarian and rare book collectors **American Book Publishing Record** ,2001 The Scriblerian and the Kit-Cats ,2002 **British Architectural Theory 1540-1750** Caroline van Eck,2018-02-05 This title was published in 2003 Although it is often assumed that British writing on architectural theory really started in the 18th century there is in fact a large corpus of writing on architecture pre dating the introduction of Palladianism by Lord Burlington Some of it such as the English editions of Serlio and Palladio belongs to the Vitruvian tradition But many texts elude such easy classification such as the prolonged but hardly studied discussions on church architecture which are both in form and content very different from the way that theme was handled in Italian Renaissance treatises This collection of English writing on architecture from 1540 to 1750 offers a large selection of fragments some of them never published before They discuss the nature of architecture the practicalities of building the sense of the past religious architecture and classicism The Eighteenth-century Current Bibliography ,2001 Producing the Past Lucy Peltz,Martin Myrone,2018-12-20 First published in 1999 this volume examines antiquarianism which had its roots in Renaissance thought and was a popular intellectual and cultural pursuit throughout the eighteenth and nineteenth centuries The antiquarian work of collecting compiling and presenting material which exposed the past was seminal to the formation of social and national identities These essays evaluate the cultural and political implications of antiquarianism in the period 1700 1850 The volume also considers how the antiquarians laid the foundations of later museum culture and the discipline of history With a preface by Stephen Bann and introduced by Martin Myrone and Lucy Peltz Producing the Past has contributions from Stephen Bending Alexandrina Buchanan Susan A Crane David Haycock Maria Grazia Lolla Heather MacLennan Martin Myrone Lucy Peltz Annegret Pelz Sam Smiles and Johann Reusch The Rise of the Image Thomas Frangenberg,2017-07-05 The Rise of the Image reveals how illustrations have come to play a primary part in books on art and architecture Italian Renaissance art is the main focus for this anthology of essays which analyse key episodes in the history of illustration from the sixteenth to the twentieth century The authors raise new issues about the imagery in books on the visual arts by Leonardo da Vinci Giorgio Vasari Sebastiano Serlio Andrea Palladio Girolamo Teti and Andrea Pozzo The concluding essays evaluate the roles of reproductive media including photography in Victorian and twentieth century art books Throughout images in books are considered as vehicles for ideas rather than as transparent passive visual forms dependent on their accompanying texts Thus The Rise of the Image enriches our understanding of the role of prints in books on art The Art of Building Auke Van Der Woud,2017-10-23 This title was

first published in 2002 In the second half of the 18th century philosophy provided the fundamental characteristics of architecture The architects of the 19th century then introduced the empirical comparative study of buildings This phenomenon has usually been regarded exclusively in terms of historicism but this is to underestimate the fact that they were architects The problems for which they sought solutions did not belong to the past but were part of their own age or the future The architecture of the past was to the 19th century architect significant to a large degree as a silent witness of a bygone era a representation of beauty Historical architecture provided study material for their inquiries into the aesthetic laws that they hoped would give the 19th century a splendid contemporary architecture The art of building as a way of visibly edifying society was the most important of all the arts with architectural theory showing the way to this lofty purpose This book takes this as a starting point Focusing on place as well as time the text discusses the Dutch architects who contributed to this idea discussing several of the most important but ultimately seeing their activities not as the cause but the expression of movements that continuously changed the face of architecture The particularly Dutch nature of architecture took visual beauty to result from the visible success of technical intelligence and creativity rather than philosophy and aesthetics The grand 19th century themes discussed in the book are the author suggests somewhat un Dutch originating as they did from an idealist intellectual tradition
